In-depth Report: [UKRAINE REPORT](#)

The war against Russia has entered a new and more dangerous phase with the incursion of Ukrainian forces into the Russian region of Kursk. The New York Times calls it “the largest foreign incursion into Russia since World War II,” that is, since Russia was invaded by Nazi Germany and its allies, with Italy at the forefront.

The political media mainstream presents it as a brilliant strategic move by Kyiv to ease the growing Russian pressure on the Donbas front. It therefore hides the heavy losses that Ukrainian forces are suffering from Russian forces in Kursk, in terms of armoured vehicles and men.

The incursion of Ukrainian forces into this Russian region was planned and organized by the US-NATO commands with a much broader strategic purpose. They concentrated the attack in a border area manned only by young conscripts and border guards, who could not withstand the sudden onslaught of tanks and artillery. The rapid conquest of about 1,000 square kilometres of Russian territory, the capture of over 300 conscripts, the destruction of three important bridges with US missiles, and the increasing drone attacks deep into the Moscow region, aim at a goal that is not simply territorial: spreading in Russia mistrust in the ability of the Government and President Putin himself to ensure the security of the country, thus weakening the internal resistance front.

This is happening at a time when the US and NATO are stepping up the deployment of intermediate-range nuclear weapons close to Russian territory and a “secret nuclear strategy” is coming to light: in a classified document – reported by the New York Times – “President Biden has ordered US forces to prepare for possible coordinated nuclear clashes with Russia, China and North Korea.”

Italy’s participation in this catastrophic war strategy is far greater than expected. The incursion into the Russian territory of Kursk involved Italian armoured vehicles, which the government donated to Kyiv and crew training. This is confirmed by the video of the destruction of one of these armoured vehicles by Russian forces in Kursk. Italy is also participating in the preparation for nuclear war. In violation of the Non-Proliferation Treaty, it not only deploys US nuclear bombs on its territory and prepares to use them, but through Leonardo, it builds nuclear missiles for the French arsenal.
