

The impact on mortality and morbidity of the Pfizer-BioNtech vaccine has been confirmed by a [Pfizer Confidential Report](#) — released and made public under Freedom of Information in October 2021. The Confidential Pfizer Report –barely acknowledged by the media– was known to national governments and health authorities Worldwide. It confirms that the so-called Covid Vaccine is a killer.

The negotiation between Pfizer and the President of the EC Mrs. Ursula von Der Leyen was initiated in October 2022, for 4.5 billion doses of Pfizer BioNtech, (namely 10 doses per person) . A contract for one billion doses was subsequently reached for a population of 450 million people who in large part had already been vaccinated.

What was carefully overlooked was the Pfizer report which confirms the impacts (mortality and morbidity) of the Pfizer-BioNtech vaccine to be distributed to the EU’s 450 million people.

“The Confidential report is a bombshell. The vaccine was launched in mid-December 2020. By the end of February 2021, [“Pfizer had already received more than 1,200 reports of deaths allegedly caused by the vaccine and tens of thousands of reported adverse events”](#)

Covid “Vaccine” Triggers Excess Mortality Worldwide

(See Diagrams below)

Below is [a summary of several studies on excess mortality](#) pertaining to the vaccine including Japan.

England and Wales

“The table below pertains to excess deaths related to malignant neoplasm (cancerous tumor) in England and Wales, recorded in three consecutive years: 2020, 2021, and 2022 vs. a 10 year trend (2010-2019).

The data for excess mortality in 2020 (the year prior to the vaccine) are negative with the exception of “malignant neoplasm without specification of site”.

The COVID-19 vaccine was rolled-out in several phases in England and Wales [starting on December 8, 2020](#) and [extending into March-April 2021](#).

The upward movement in excess mortality (%) commences in 2021. The increase in excess mortality related to malignant neoplasm is tabulated for the two first years of the vaccine.

Germany

Below is a similar table pertaining to Excess Mortality in Germany, which points to the Deviation of Observed Mortality from Expected Mortality (by age group) in 2020, 2021, and 2022.

Notice the upward shift in excess mortality in 2021 and 2022 following the rollout of the Covid Vaccine in December 2020

Germany: Excess Mortality by Age Group (%)

Figure 1 illustrates that the deviation of the observed mortality from the expected mortality is not uniform over the different age groups and that the pattern across the age groups changes from 2020 to 2021 and 2022.

Figure 1: Yearly excess mortality. The red bars show the excess mortality in 2020 (left panel), 2021 (middle panel), and 2022 (right panel) in different age groups. The gray bars are the total excess mortality.

United States

The graph below: [“All Deaths reported to Vaers by Year” starting in 1990.](#) (U.S.)

What can be observed is that the number of deaths has increased dramatically in the course of 2021 corresponding to first year of the Covid vaccine which was launched in the U.S. in mid December 2020.

Japanese researchers say their “shocking” systematic review of research papers on COVID-19 vaccines has discovered thousands of side effects “affecting every possible aspect of human pathology.”

The findings were laid out in a 93-minute [press conference](#) (see video below with English subtitles) in Japan held January 11 by the Vaccine Issues Study Group, a panel of esteemed medical experts. The findings followed six months of investigations into the side effects of COVID-19 vaccines.

Professor Emeritus Masanori Fukushima of Kyoto University, long a fierce critic of the vaccines, said the breadth of the harms is “unprecedented” for medical treatments.

“A systematic review of the literature has unveiled some shocking information. Thousands of papers have reported side effects after vaccination, affecting every possible aspect of human pathology, from ophthalmology to psychiatry,” he said.

“For example, the age-adjusted mortality rate for leukemia has increased. And there are significant findings for breast cancer, ovarian cancer and so on.”

Fukushima said there were so many brain-related adverse events, its researchers probably hadn’t found all of them yet. “Mental disorders, psychiatric symptoms, depression, mania, anxiety, came up in abundance, but it’s endless,” he said.

Fukushima, who has 208 [scholarly papers](#) to his name on ResearchGate, said doctors who want to sound the alarm find their message is suppressed. Last February, he [launched a lawsuit](#) against the government for allegedly hiding vaccine harms.

“Japanese doctors are trying hard, but they face various obstructions,” Fukushima said. **and even though I speak out in various places, they don't stop at all**

Professor Yasufumi Murakami from Tokyo University of Science said the responsible course

of action would be to halt the administration of such vaccines.

“It’s very clear what happens when you administer a toxic gene to a human. There are cases that occur within one or two weeks after injection, but there are also many cases that appear after one or two years,” he said before laying out long-term risks.

“Vaccines that have failed are still being administered and the Ministry of Health, Labour and Welfare recognizes these failed vaccines. So I would like them to stop immediately. And even though I speak out in various places, they don’t stop at all. So we will clearly present evidence and publish it as articles, one by one.”

Murakami warned that “with the current messenger-type vaccines, a significant amount of IgG4 is being induced.”

He said this was in excess of a normal vaccine response and could interfere with immune functions.

The researchers found 201 types of diseases had been found among 3,071 papers on side effects. Professor Masayasu Inoue, Emeritus Professor at Osaka City University School of Medicine, said some harms are hitting entire families and are well-documented.

“It is unprecedented in human history for a single vaccine to have this much literature out on it,” said Masayasu.

“You will find diseases of the heart, kidney, thyroid, diabetes, liver, skin, eyes, blood, nerves, systemic diseases, brain, lungs.”

Fukushima said the mRNA vaccine disperses throughout the body and is not contained in the shoulder like most vaccines.

“It doesn’t know where to go. If it goes into the bloodstream, it goes to the brain, liver and kidneys,” he explained.

Fukushima said authorities preaching the safe and effective message ignored a wide body of evidence and should go back to school.

“With fragments of such knowledge, they exaggerate things and think they can go with this,” Fukushima said.

“So, honestly, they need to go back and redo from middle school biology to high school and university entrance exams. As I mentioned earlier, medicine is still immature.”
