- *CNBC*: [Best Alternative Financial Websites](#)

One of Mish's trademarks is to speak with knowledgeable people in various subject areas, and report on what they said.

Today, Mish [debunked](#) one of the main pieces of video “evidence” claimed by the mainstream media to prove that Russia was behind the shootdown of the Malaysian plane over Ukraine:

Jacob Dreizin, a US citizen who speaks Russian and reads Ukrainian provided this update three hours ago.

Hello Mish,

On Friday, the Daily Mail, one of the major UK tabloids carried photos and video of what was alleged to be a [rebel “Buk” launcher heading back to Russia](#). The article carried a claim from some Ukrainian source that the launcher was missing several missiles after having shot them at the Malaysian 777. The article was prominently linked to the Drudge Report, and so was probably viewed by several million people.

Today, this meme made it into Uncle Sam's official narrative, as per the following New York Times excerpt:

On the CBS program “Face the Nation,” Mr. Kerry referred to a video that the Ukrainians have made public showing an SA-11 unit heading back to Russia after the downing of the plane with “a missing missile or so.”

The video referenced by the New York Times was, in fact, posted on the Facebook account of the Ukrainian Interior Minister. The allegation was that the launcher was crossing the border with Russia.

However, going by the billboard and other features of the scenery, Russian bloggers and news sources claim to have identified the road in the video as having been taken in or near the town of Krasnoarmeisk ("Krasnoarmiysk" in Ukrainian), which has been under Kiev's control since May.

In fact, the billboard is supposedly advertising a Krasnoarmeisk car dealership. Also, one of the structures in the background is said to be a construction materials store on Gorkii Street, Krasnoarmeisk.

Please note that this town is (very roughly) 120 kilometers from the Russian border and 80 kilometers from where the Malaysian 777 went down. And again, it has been under Kiev's control since May.

At least one other clip of the "Russian Buk" that has been made available also suggests that the Ukrainians are showing their own equipment. I'm still working on researching that one for you.

Jacob

The Video in Question

It is beyond incredibly sloppy for Ukraine to release such a video with a clear billboard of something in Ukraine-held territory, purportedly showing a Buk missile launcher headed back to Russia.

And we are supposed to believe Kiev? Kerry?

Please be serious. If you are really interested in the truth, you do not resort to such easily disproved and sloppy bullshit.

This is - of course - [not the first](#) piece of video "evidence" trumpeted by the MSM which has been debunked.
