Latest UK Adverse Reactions and Fatalities to 20th October 2021 per the MHRA following the experimental Covid-19 injections (released by the MHRA on 29th October 2021).

A total of 1,738 deaths now reported by the MHRA along with over 1.2 million injuries suffered by over 378,000 people (an average of 3.3 injuries per person) following the experimental Covid-19 injections

Note: The number of injuries /deaths reported are dependent on many factors including numbers of injections administered, how many of these have been second and possibly third doses along with the age groups of those who have received these doses and indeed the work of the MHRA in ensuring all cases by all manufacturers get investigated and reported in a timely and consistent manner.

Deaths in England and Wales continue to rise.

In the 15 week period since the start of July 14,697 more people have died in England and Wales (post injection roll out) compared to the equivalent weeks in 2020 (pre injection roll out), almost an 11% increase.

The week to 15th October 2021 saw 643 more deaths compared to the equivalent week in 2020; 1,021 more deaths compared to this same week in 2019.

Compared to 2019 there have been 14,001 extra deaths in this 14 week period in 2021 almost a 10% rise.

Covid Injections - Reducing Hospitalisations and Deaths?				
15 week period to 15th October 2021 vs same period in 2020				
Total Covid Related Deaths by Place of Occurrence	2021	2020	Difference	%
Home	739	263	476	9%
Hospital	7,196	2,449	4,747	89%
Hospice	77	52	25	0%
Care Home	812	769	43	1%

Elsewhere	50	17	33	1%
Total Covid Deaths	8,885	3,561	5,324	100%
England and Wales Only				

Table shows that 5,324 extra people have died (post injection roll out) with Covid in the 15 week period to 15th October 2021 compared to the equivalent, pre-injection period, in 2020 with an increase in Covid deaths in all settings.

The overwhelming majority of these Covid related deaths have been in a hospital where most Covid deaths are now occurring, this is in stark contrast what we saw at the start of the "pandemic" where most deaths with Covid were in Care Homes.

"Excess Deaths" in 2021 vs 2020	2021 vs 2020	%
Extra Deaths (non Covid related)	9,373	64%
Extra Covid Related Deaths	5,324	36%
Total extra deaths in 2021 vs 2020	14,697	100%
England and Wales Only		

Table shows the breakdown of the 14,697 extra people who have died in the 15 week period to 15th October 2021 compared to the equivalent period in 2020.

It shows that of these extra deaths 9,373 (64%) were not, per the govt, related to Covid-19.

Are these deaths the result of Covid-19 injection damage not being reported to or by the MHRA?

The extra Covid-19 deaths could also to be due to the Covid-19 injections suppressing the immune system, particularly over the first two weeks post injection, which has seen many people succumb to numerous types of infections.

80-89 yrs	4,151	11,649
90+ yrs	3,048	14,697
Total	14,697	
England and Wales Only		

110 extra deaths in 0-19 year olds in England and Wales in just a period of 15 weeks to 15th October 2021 compared to the equivalent period in 2020.

9 of these extra deaths in 0-19 year olds compared to 2020 were in the last week alone (week to 15th Oct).

Are these Covid-19 injection related deaths in children?

Why are younger children also dying who are not yet receiving the injections? Is this transmission from mothers through breast milk after they themselves are injected or the lack of appropriate care as the health system is diverted towards Covid related issues?
