Theme: [Science and Medicine](#)

*“Now that dentists have reopened their doors, they’re having patients show up with a nasty set of symptoms, which the doctors have dubbed ‘mask mouth,’” reports [FOX News](#). “The new oral hygiene issue — caused by, you guessed it, wearing a mask all the time to prevent the spread of the coronavirus — is leading to all kinds of dental disasters like decaying teeth, receding gum lines and seriously sour breath.”*

“We’re seeing inflammation in people’s gums that have been healthy forever, and cavities in people who have never had them before,” **Dr. Rob Ramondi**, a dentist and co-founder of [One Manhattan Dental](#), told FOX News.

Beyond embarrassing and painful, dental infections are life-threatening confirms a study by the [American Stroke Association](#):

“Patients with gum disease were twice as likely to have a stroke caused by hardening of large arteries within the brain than those without gum disease.”

One Manhattan Dental told FOX News that they estimate 50% of their patients are suffering from mask-induced dental problems.

The dentists theorize that the oral infections are largely caused by people’s tendency to mouth breathe while wearing a mask. Mouth breathing has many more side-effects other than dental infections. Bypassing the nasal cavity [denies the body of nitric oxide](#) (a critical blood vessel dilator). The nasal cavity also warms and purifies air before hitting the lungs.

Of course, other studies have shown masks [increase infection rates](#) in other ways, so why not in the mouth? Possibly these dental problems are a result of “bacterial growth on a used and loaded mask” as Prof. Denis Rancourt speculates in his paper [Masks Don’t Work](#). Masks create a moist environment in front of the mouth for bacteria to fester, while being unhindered by the body’s immune system.

Call me simple, but I can’t see how stressing one’s immune system with dental infections would help one fight SARS-COV-2. And, when we consider that randomized control trials show masks [can’t even stop flu-like-illnesses](#), these oral objections are yet [just another reason not to wear a mask](#).
