## COVID-19 Vaccines While Pregnant or Breastfeeding

Updated Nov. 3, 2023 [Español](#) [Print](#)

### What You Need to Know

- Everyone ages 6 months and older is recommended to get the updated COVID-19 vaccine. This includes people who are pregnant, breastfeeding, trying to get pregnant now, or those who might become pregnant in the future. Infants ages 6 months and older are recommended to get the updated COVID-19 vaccine even if born to people who were vaccinated or had COVID-19 before or during pregnancy.
  - [If you are pregnant or were recently pregnant](#), you are more likely to get very sick from COVID-19, compared to people who are not pregnant. Additionally, if you have COVID-19 during pregnancy, you are at increased risk of complications that can affect your pregnancy and developing baby.
  - Getting the updated COVID-19 vaccine can help protect both you and your baby from serious illness from COVID-19.
  - People who are pregnant should [stay up to date](#) with their COVID-19 vaccines and get an updated COVID-19 vaccine in fall 2023.
- [Evidence](#) shows that:
  - COVID-19 vaccination during pregnancy is safe and effective.
  - COVID-19 vaccines are not associated with fertility problems in women or men.

For a vaccine to be considered in my practice, the theoretical vaccine efficacy would have to meet a lower bound of the confidence interval of >50%. Because we do not have randomized trials, we must consider the point estimate of VE in non-randomized studies to be a statistical blur. Reality could be any value within the 95% confidence interval. Therefore a conservative position would be to focus on the lower bound of the confidence interval as the FDA does commonly with other products.

[Goh and colleagues](#) from Singapore recently reported on infants testing positive for COVID-19 within 6 months of delivery. There was no mention of any of the babies with adjudicated COVID-19 illness. Nevertheless, the theoretical VE for passive protection to the newborn was abysmal for the poorly conceived vaccines as shown in the table.

### mRNA SARS-CoV-2 Vaccination Before vs During Pregnancy and Omicron Infection Among Infants

Lesson learned, do not be deceived by a vaccine syndicate trying to tap into maternal instincts to “protect” their babies. In contradistinction, an astute mother would recognize the potential dangers of her injection with mRNA coding for the lethal Spike protein.

## **The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*

### **Reviews**

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon*

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia*

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig*

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the*

*deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac*

*A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin*
