*Anyone who thought the US military was preparing to force vaccinate every American with a coronavirus vaccine has just found strong evidence to confirm the plan. [According to a press release from the US Dept. of Defense](#), featuring an announcement from Lt. Col. Mike Andrews, the DoD is partnering with HHS to acquire 500 million Apiject vaccine injection devices, with deliveries expected to begin in October of this year.*

According to the press release:

Spearheaded by the DOD's Joint Acquisition Task Force (JATF), in coordination with the HHS Office of the Assistant Secretary for Preparedness and Response, the contract will support "Jumpstart" to create a U.S.-based, high-speed supply chain for prefilled syringes beginning later this year by using well-established Blow-Fill-Seal (BFS) aseptic plastics manufacturing technology, suitable for combatting COVID-19 when a safe and proven vaccine becomes available.

The Apiject syringes come with an optional RFID tag so that health care workers can track the GPS location and identity of the individual being injected. Via the [Apiject.com website](#):

With an optional RFID/NFC tag on each BFS prefilled syringe, Apiject will make this possible. Before giving an injection, the healthcare worker will be able to launch a free mobile app and "tap" the prefilled syringe on their phone, capturing the NFC tag's unique serial number, GPS location and date/time. The app then uploads the data to a government-selected cloud database. Aggregated injection data provides health administrators an evolving real-time "injection map."

Yes, you will be tracked, tagged, bagged and injected, most likely against your will.

Don't forget that this is being married with President Trump's "Operation Warp Speed" which aims to bypass all the usual protocols of vaccine safety testing and clinical trials, delivering up to 300 million coronavirus vaccine doses before the end of calendar 2020.

500 million prefilled syringes by 2021

The \$138 million contract aims to achieve, "the ultimate production goal of over 500 million

prefilled syringes (doses) in 2021.”

Notably, there are only around 327 million people living in the United States. That means this DoD / HHS project will produce enough coronavirus vaccine doses to cover every man, woman and child in America.

The only reason they would need so many doses is if there is a plan under way to force vaccines on everyone.

If coronavirus vaccines were planned to be optional — respecting the vaccine choice of individuals — not more than 100 million doses would be needed. The fact that 500 million doses are being manufactured is an admission that the DoD and HHS plan to make coronavirus vaccines mandatory.

Present-day vaccines that claim to treat measles, mumps, chicken pox, HPV and other infectious diseases are deliberately manufactured with a bizarre list of toxic and unethical ingredients, including:

- Aluminum
- Mercury (Thimerosal)
- Antibiotics
- Squalene (an inflammatory chemical)
- Aborted human fetal tissue
- Formaldehyde
- MSG
- Live viruses
- HCG, an infertility chemical

Which ingredients are going to be formulated into the coronavirus vaccine?

And if the coronavirus vaccine is going to be produced without any real quality control or clinical trials, how will drug companies or government agencies know whether the vaccine is safe?

Vaccine safety isn't the goal... mass murder and depopulation is the real objective

With LA County recently announcing a plan to keep its residents locked down for another three months, and with the FDA and CDC conspiring with Big Pharma to grant “emergency approval” to vaccines which could not possibly go through the required safety trials, it's abundantly clear that safety is not the issue.

Even Bill Gates now admits that 700,000 people could experience side effects from a coronavirus vaccine, and some of those side effects no doubt include death.

The real goal here is to corral human beings like cattle and subject them to a “kill switch” vaccine injection, which will obviously be engineered with infertility chemicals (soft kill) and engineered elements that cause a cytokine storm death upon a subsequent infection (hard kill). Depopulation has been the goal all along. That's why they need all the RFID tracking technology: to make sure they've injected everyone while tracking now “refuseniks” to be arrested and injected at gunpoint.

And that's why vaccine mandates are going to be aggressively resisted by the "human resistance" members, who are already aware that the US military is being prepared for a vaccine mandate deployment mission on US soil. President Trump, meanwhile, has become the "vaccine president" and has apparently gone all-in with Big Pharma, pushing his "Operation Warp Speed" project that makes a mockery of the very idea of "evidence-based medicine" or vaccine safety.

Resistance against coronavirus vaccines is already accelerating. It looks like even mainstream conservatives are going to fight to resist the coming vaccine mandates, while so-called "pro choice" progressives are going to claim the government owns your body and can forcibly inject you with anything they want, including experimental, unproven vaccine cocktails. One thing that has emerged from all this is how conservatives are now more skeptical of vaccines than ever before... and the battle for medical choice is rapidly gaining awareness.

It's clear that any effort by Trump or various governors to push mandatory vaccines on the public is likely to be met with determined resistance.

The [vaccine wars](#) may be coming to America very soon.

Are you prepared to defend your body against an assault with a deadly vaccine weapon?

From a human rights perspective, a mandatory vaccination is an assault with a deadly weapon and a violation of basic human dignity and the rights of personhood. This is self-evident from the fact that vaccines kill people every year in America, a verified fact that's openly admitted by the government in its quarterly vaccine damage reports ([VAERS.HHS.gov](#)).

If vaccines kill and maim people — which they do — then forcing an especially fast-tracked vaccine on someone against their will is a form of violence and a clear felony assault against that person.

If someone is attempting to assault you with a deadly weapon, you have every right to defend yourself under US law. No emergency declaration nullifies your exclusive ownership over your own body. And no legitimate government would ever attempt to claim the right to penetrate your body with dangerous substances without your consent.

This argument is even stronger when you realize that there are many ways a person can boost their immunity against an infectious disease, including having good nutrition (vitamin D, vitamin C, zinc, etc.) and maintaining a healthy lifestyle that avoids toxic prescription medications such as blood pressure drugs. For a vaccine zealot to claim that vaccines are the one and only way to protect public health, while denying the effectiveness of all other strategies, is a horrifying example intellectual fraud.

The fact that vaccines can and do spread other diseases under certain circumstances — such as polio, chickenpox and even the measles — reveals that vaccines may actually harm more people than they help. Because vaccines present the risk of harm, the choice of whether to agree to a vaccine injection must rest with the patient, not the doctor nor the government. This is a basic principle of western medicine: Informed consent. (And "First, do no harm.") In fact, it is codified under medical ethics rules of the American Medical Association.

Without informed consent, we don't have a system of medicine at all. In its place, we have a system of authoritarian medical tyranny — essentially a *medical police state*. And any such police state should be resisted and defeated by any liberty-minded citizen.

And if Trump is going to push a medical police state on America, he no longer deserves to be president at all and should be voted out of office at the next opportunity. Or pressured to resign before the election.

You can't Make America Great Again if you're running armed vaccine goon squads that "medically RAPE" Americans so that Big Pharma can cash in on a deadly pandemic. Trump is going to need to pick a side here, and if he picks Big Pharma, then Trump becomes the enemy of the People.

It's as simple as that. All the Trump supporters out there need to come to their senses and realize that, based on current observable evidence, it looks like Trump is about to become the anti-Christ by pushing "mark of the beast" RFID vaccine tracking technology that will no doubt be used to deny anti-vaxxers access to commerce and public transportation. Is this even America anymore?
