

The “Most Secure” Election in US History? Despite Mounting Evidence of Brazen Fraud in Key Swing States

How Fantasy US Democracy Works

In cahoots with forces running the US, establishment media feed Americans a daily diet of managed news misinformation and disinformation rubbish.

The only way to be informed about major issues affecting our lives, welfare, and futures is by following independent sources, free from state and corporate control, mainly online.

According to the NYT (and other establishment media), Election 2020 “was the most secure in (US) history” — citing a dubious statement by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency.

Despite mounting evidence of brazen fraud in key swing states, below is the DHS statement in full, dated November 12:

“The November 3rd election was the most secure in American history (sic).”

Right now, across the country, election officials are reviewing and double checking the entire election process prior to finalizing the result.”

“When states have close elections, many will recount ballots.”

“All of the states with close results in the 2020 presidential race have paper records of each vote, allowing the ability to go back and count each ballot if necessary (sic).”

“This is an added benefit for security and resilience (sic).”

“This process allows for the identification and correction of any mistakes or errors (sic).”

“There is no evidence that any voting system deleted or lost votes, changed votes, or was in any way compromised (sic).”

“Other security measures like pre-election testing, state certification of voting equipment, and the US Election Assistance Commission’s (EAC) certification of voting equipment help to build additional confidence in the voting systems used in 2020 (sic).”

“While we know there are many unfounded claims and opportunities for misinformation about the process of our elections, we can assure you we have

the utmost confidence in the security and integrity of our elections, and you should too (sic).”

“When you have questions, turn to elections officials as trusted voices as they administer elections (sic).”

The above statement is one of many examples of **state-sponsored mass deception**.

It shows Trump’s DHS abandoned him as well as truth-telling about Election 2020.

Almost daily, new information surfaces about **election fraud in key swing states**.

The only unknowns are precisely how much, in what ways, in which states, and to what extent it shifted the true vote count to Biden/Harris over Trump.

Based on what’s already known, it appears that brazen fraud decided the US presidential election.

While it’s not over until Electoral College electors vote (on Dec. 14), it’s certified by House, Senate, and National Archives representatives (on Dec. 23), and Congress declares the results (on Jan. 6 — the Supreme Court perhaps to have final say — it appears almost certain that Biden/Harris will succeed Trump on January 20.

Though the judicial process, including at the highest level, may side with Trump’s legitimate lawsuits — claiming fraud in designated swing states — it’s highly unlikely as things now stand.

Election 2020 is clear testimony to **how fantasy US democracy works** — ordinary Americans with no say over how the nation is run and by whom.

It’s also more evidence of dominant media mass deception, supporting election fraud over a free, fair and open process.

Since last weekend, a Great Lakes Justice Center lawsuit filed in Michigan claims that Detroit election officials allowed “tens of thousands” of fraudulent ballots to be added to Biden/Harris’ vote count, along with other Wayne County irregularities.

Based on the lawsuit, they included “eyewitness accounts and direct evidence” that “approximately 40,000” unsecured, irregular ballots arrived in vehicles with out-of-state license plates in Detroit.

The vote tally went entirely for Biden/Harris and other Dems on the ballot.

The lawsuit also alleges that after GOP challengers discovered evidence of fraud, they were locked out of the counting room — after which tens of thousands more ballots were counted.

County election officials also “allowed ballots to be duplicated by hand without allowing poll challengers to check if the duplication was accurate,” according to the lawsuit.

There’s more about dubious practices in Detroit that smacks of election fraud.

On Wednesday, GOP attorney generals in 10 states filed an amicus brief with the US

Supreme Court — challenging the illegality of counting late mail-in ballots in Pennsylvania, ignoring state laws banning the practice.

According to Oklahoma **Attorney General Mike Hunter** “actions taken by the Pennsylvania Supreme Court (on this issue) are one of the most breathtaking abuses of judicial authority that I’ve seen in my four-plus years as attorney general.”

On Monday, US **Attorney General William Barr** authorized DOJ officials to investigate alleged election irregularities.

At this time, results of Election 2020 are undecided. **Joe Biden** is NOT president-elect until these issues are settled and the election process is officially completed.

According to Trump campaign attorney **Sidney Powell**, significant statistical evidence of improper ballot counting hasn’t yet been revealed, adding:

Many states breached their own elections laws, including “pallets of ballots” entering through “the back door” of counting centers in the middle of the night.

“There is tons of evidence that hundreds of thousands of ballots are going to have to be discarded and they’re all for Biden.”

Dominion Voting Systems software used in various states swapped, padded, and in other ways altered vote tallies, said Powell.

“There is a substantial problem with the Dominion system,” Powell stressed. “We are reviewing all of that and connecting the dots.”

“There are stacks of evidence and testimony from any number of witnesses - I’ve lost count of how many they have (because) more pour in every day.”

According to Nevada **Attorney General Adam Laxalt**, “(i)t’s important to understand first and foremost how insecure this system is,” adding:

“We have over 600,000 mail-in ballots that have been counted.”

“Those are votes that are official in our system.”

“We also know that we have unclean rolls - ballots that have been mailed to dead people, to people who have moved out of state, and people that got a dozen ballots in their homes, etc.”

At most, signature verification of mail-in ballots was 40%, he said. Most Nevada mail-in ballots are unverified.

Trump may lead Biden/Harris in the state instead of the other way around as reported by major media.

According to Project Veritas, “an anonymous (Pennsylvania) USPS whistleblower...claims **that higher-ups ordered postal workers to discard pro-Trump and pro-Republican**

mail, and only deliver pro-Biden mail from now on,” adding:

“This is the third Pennsylvania USPS insider to blow the whistle on election malfeasance in the last week.”

“There is something going on with USPS and we must get to the bottom of it immediately,” Project Veritas head James O’Keefe said, stressing:

“It’s very concerning that every USPS whistleblower coming forward is telling stories that put our election integrity in serious doubt.”

Election fraud occurred many times throughout US history at the federal, state and local levels.

Election 2020 may one day be remembered as one of the most brazen examples.

Election 2020 the “most secure” in US history? Make your own judgment.
