27 year old Austrian pianist Sabine Wukovnic is permanently disabled after taking three COVID-19 vaccines ([video source](#)).

This is a sad story of a young woman whose life has been destroyed after she took her COVID-19 booster shot in early 2022.

Sabine Wukovnic

February 17 · 🌐

Hey guys! Unfortunately I've been inactive online since I've been very ill with post vac syndrome / Myalgic Encephalomyelitis (CFS). Over the past year I've tried various medications, treatments and doctor's appointments but nothing helped. Instead my health is highly deteriorating and I've been staying at the hospital since one month. My boyfriend, whom I am deeply grateful for, set up a gofundme to help financing upcoming treatments (more information is provided through the link). Any donation/like/share would mean the world to me ❤️ (this post was set up with the help of a friend since Sabine is too weak to do it herself)

GOFUNDME.COM

Post-Vaccine Syndrome: the fight for a real life, organized by Harald Sammer

I am a fortunate guy since I have been in a relationship with this wonderful woman in the picture for two years now. Sabine, a 27-years-old Austrian, studied marketing in Paris and musicology in Vienna. Until last year she had been working as a manager in a restaurant, overseeing the marketing aspects. I have always experienced Sabine as lively, smart, intelligent, caring, charismatic and witty.

However, after getting her third vaccination at the beginning of 2022, her life has changed dramatically since she became severely ill. The symptoms she has been experiencing are alike to those of Long-Covid. After going back and forth between several doctors and trying out plenty of medication, she was diagnosed with the "Post-Vaccine-Syndrome".

More concretely, the symptoms are among others:

- ME (myalgic encephalomyelitis)/ chronic fatigue syndrome (CFS)
- "crashes" (PEM = post-exertional malaise)
- "brain fog": has problems memorizing things and can't think clearly
- neurological disorders
- skin rash (MCAS = mast cell activation syndrome)
- developed an intolerance towards histamines which are basically in every type of food
- headache
- increased heartbeat (POTS = postural orthostatic tachycardia syndrome)
- vertigo
- muscle weakness: feels like "electric shocks"

Although there are already plenty of cases of the "Post-Vaccine-Syndrome", politics in Austria has failed to take action and support these people who made an advance payment to society by getting vaccinated. For the time being, there is no financial support to be expected, or maybe a minuscule one.

She not only had to quit her job because she is not able to work anymore but also she has to be taken care of basically 24/7. She can't even prepare food on her own and she needs a wheelchair to master even short walking distances. She basically hasn't been able to live a normal life since the vaccination. To make ends meet, she can financially rely on her family (which is demanding for them as well). However, this is only a short-term solution.

The donations are used for - at least the mid-term:

- doctors of choice and specialists
- medication (makes up roughly €1000 a month, tendency rising)
- insurances
- transportation back and forth to doctors and medical institutions
- caregiver
- therapies upcoming within the next months (several five-figure treatments)

e.g. intravenous immunoglobulins, hyperbaric oxygen therapy,

Interestingly, in Europe she was diagnosed with a "Post-Vaccine Syndrome".

She is suffering from multiple injuries: neurological injuries of central nervous system (spike protein in the brain - brain fog, ME), POTS (injury of autonomous nervous system) due to an autoimmune process involving spike protein, and MCAS which is like having a severe allergic syndrome.

UK Piano Teacher Julianna Bransden suffered catastrophic injuries starting Jan. 1, 2023 ([click here](#))

Julianna was a dedicated and popular teacher and musician. Since becoming a teacher 19 years ago in Aylesbury, Julianna devoted the last 10 years to the rural school of Llanmiloe in South Wales.

Julianna was fully COVID-19 vaccinated. On Dec. 23, 2022 she developed flu like symptoms and on Jan. 1, 2023 she had two cardiac arrests, went into septic shock, multiple systemic organ failure, needing full life support.

She was diagnosed with sepsis resulting from an aggressive form of pneumonia.

After weeks of fighting, she had to undergo surgery to amputate both of her legs below the knee and will lose most of her fingers.

“The pneumonia was caused by a combination of both invasive Strep A and Influenza, resulting in a level of sickness that several experienced ICU nurses said they had never seen anyone manage to recover from before.”

I have seen this situation before. I believe she experienced severe COVID-19 vaccine induced immune dysfunction and damage which predisposed her to catastrophic infections such as the Influenza/Strep A combination that has killed several COVID-19 vaccinated kids in Canada, and dozens around the world including 30+ kids in the UK. Celine Dion Diagnosed with Neurological disease Dec. 15, 2022

Singer [Céline Dion](#) revealed Dec. 15, 2022 in a tearful Instagram video that she's been diagnosed with Stiff-Person Syndrome, sharing that the condition would force her to postpone and cancel a series of upcoming concert dates. ([click here](#))

Stiff Person Syndrome is a rare and incurable neurological disease that affects the central nervous system, specifically the brain and spinal cord, causing symptoms like “hyper-rigidity, debilitating pain, chronic anxiety,” and muscle spasms “so violent they can dislocate joints and even break bones”.

Only one of every one million people have been diagnosed with the condition.

Justin Bieber reveals facial paralysis in June 2022

Justin Bieber reveals facial paralysis after shows cancelled

🕒 11 June 2022

INSTAGRAM/JUSTIN BIEBER

Singer Justin Bieber has revealed he is suffering from facial paralysis after cancelling shows this week.

The 28-year-old said in an Instagram video that the condition is due to a diagnosis of Ramsay Hunt syndrome.

"As you can see this eye is not blinking. I can't smile on this side of my face... So there's full paralysis on this side of my face," he said.

The 28-year-old said in an Instagram video that the condition is due to a diagnosis of Ramsay Hunt syndrome, when a shingles outbreak affects the facial nerve near someone's ears, say medical experts. ([click here](#))

Other stories of injured musicians:

Emaline Delapaix
@emalinedelapaix

I was injured by 1 Pfizer vaccine 16 months ago. Healthy touring musician before + no Covid (did in depth testing). Now I have small fiber neuropathy, POTS, pain 24/7, trouble walking + can't work. Never again, my eyes are wide open.

Bogota, Colombia - 50 year old drummer for the Foo Fighters died suddenly on March 25, 2022 - he complained of chest pain before collapsing in his hotel room ([click here](#))

Taylor Hawkins may have suffered from a heart attack, health chiefs in Bogota have suggested after "white powder" was reportedly found in his hotel room. The tragic Foo Fighters drummer, 50, suffered "chest pains" which sparked a medical emergency, the City Health Department said in a statement. Mar 26, 2022

 Irish Mirror

Taylor Hawkins' cause of death is suspected heart attack

Shanghai - 43 year old violin teacher Patrick Sabberton at a British International school died of a hemorrhagic stroke Feb. 9, 2022 ([click here](#))

1st UK COVID-19 vaccine damage compensation was awarded to dead rock musician Lord Zion's wife ([click here](#))

The 1st UK COVID-19 Vaccine damage compensation was awarded for the death of rock singer Lord Zion, who died of a brain hemorrhage 14 days after taking AstraZeneca, on May 19, 2021. His wife received government compensation of 120,000 pounds.

Jessica Sutta (Pussycat Dolls Singer/Dancer) & Eric Clapton

I've previously written substacks on COVID-19 vaccine injuries in musicians who have come forward:

Mar. 24, 2023, Jessica Sutta had neurological injuries including peripheral neuropathy after Moderna mRNA vaccine. ([click here](#))

Feb. 10, 2023, Eric Clapton had neurological injuries after AstraZeneca, mainly peripheral neuropathy ([click here](#))

My Take...

As a Royal Conservatory of Music trained musician myself, I feel deeply for these musicians who have suffered horrific COVID-19 vaccine injuries or have died following vaccination.

COVID-19 vaccine induced neurological injuries are catastrophic and usually career ending for any musician. Eric Clapton can't play the guitar or piano anymore, Jessica Sutta can't dance anymore.

Then there are the usual post COVID-19 vaccination cardiac arrests, strokes, and blood clots to contend with as well.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
