I missed this study. So did the mainstream media for some reason. But this study is yet another independent analysis that is difficult to refute: we have been misled by the CDC, FDA, and NIH.

The next time you see you county health officer, President Biden, or Boris Johnson why not ask them if they can find a mistake in this study by Kyle A. Beattie entitled [Worldwide Bayesian Causal Impact Analysis of Vaccine Administration on Deaths and Cases Associated with COVID-19: A BigData Analysis of 145 Countries](#) (the [PDF version is here](#)).

The study found that the COVID vaccines cause more COVID cases per million (+38% in US) and more deaths per million associated with COVID (+31% in US).

The abstract says:

The statistically significant and overwhelmingly positive causal impact after vaccine deployment on the dependent variables total deaths and total cases per million should be highly worrisome for policy makers. They indicate a marked increase in both COVID-19 related cases and death due directly to a vaccine deployment that was originally sold to the public as the “key to gain back our freedoms.” The effect of vaccines on *total cases per million* and its low positive association with *total vaccinations per hundred* signifies a limited impact of vaccines on lowering COVID-19 associated cases.

These results should encourage local policy makers to make policy decisions based on data, not narrative, and based on local conditions, not global or national mandates. These results should also encourage policy makers to begin looking for other avenues out of the pandemic aside from mass vaccination campaigns.

In other words, we were lied to

The vaccines are making this worse, not better. This is why we are not getting ourselves out of the hole. Mandating vaccines are making this

This is hardly the first study to reach those conclusions. These studies, all done independently, found the same thing—the more you vaccinate, the worse things get.

The response to this new study by the health authorities is predictable

I think I’ve figured out the pattern and can now confidently predict how health authorities worldwide will react to this stunning result: they will ignore it. Instead, they will mandate vaccines for everyone of every age ASAP. Am I right?
