[COVID Intel](#) 1 September 2024

A leading oncologist is raising the alarm about the staggering surge in cancer cases among young people.

North Carolina's Duke University oncologist Dr. Nicholas DeVito is warning that "every new patient" who now comes to his clinic is under 45 years old.

Dr. DeVito says he and his colleagues have experienced a complete demographic switch in recent years.

Based on what he's seeing every day, talking to patients on the ground and analyzing the data, DeVito is now issuing a red alert to warn the public about the phenomenon.

However, the doctor is raising concerns that U.S. government officials are refusing to address or even acknowledge the dramatic surge in cancer cases.

The physician [wrote](#) for STAT News:

"The desire to protect Americans from substances that cause cancer and other diseases should transcend party affiliation and political motivation to overcome industrial lobbying efforts."

In recent years, multiple studies and oncology experts have warned that cancer cases have been skyrocketing in younger people.

The U.S. has the sixth highest rate of early-onset cancers – disease in people under 50 – with 87 cases per 100,000 people younger than 50 years old.

And studies project diagnoses of early-onset cancers will rise by 31 percent and deaths will rise by 21 percent by 2030.

Cancers increasing the fastest include throat and prostate cancers.

Early-onset cancers with the highest mortality include breast, tracheal (windpipe), lung, stomach and colon.

DeVito wrote: "I hope to have a long career in oncology and eventually practice in an era where the U.S. has turned the tide against early-onset gastrointestinal cancers and few, if any, of my patients are under age 50."

As Slay News [reported](#) earlier, a growing number of experts are demanding answers as

aggressive turbo cancers continue to surge to unprecedented levels in young people.

Two shocking new reports from the American Cancer Society have revealed that various forms of the deadly disease surging among younger citizens.

In response to the reports, the corporate media is promoting several narratives to explain away the rapidly developing and spreading cancers.

However, several doctors have spoken out to warn that Covid mRNA shots are causing the recent emergence of aggressive cancers.

The disease has been found to form and spread so rapidly among vaccinated people that doctors have dubbed the phenomenon “turbo cancer.”

Doctors have revealed that some “turbo cancers” spread so quickly that seemingly healthy patients can die within a week of being diagnosed.

Oncologists are also warning that these aggressive cancers don’t respond to conventional treatments.

A [study](#) published in the August edition of [The Lancet Public Health](#) revealed that the incidence rates for 17 of 34 cancer types were [increasing](#) in progressively younger people in the U.S.

More recent data from the ACS’s “[Cancer Statistics 2024](#)” report shows the trend of cancer rates and related mortality continuing to rise.

The data shows cancer cases spiked dramatically in 2021, shortly after the Covid shots were released for public use.

The cases have continued to surge at alarming rates since then.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of

have no clue. His conclusions are evidenced by renown scientists. Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
