An independent Dutch Parliamentary Commission of Inquiry set up in 2020, has new evidence it presented to the International Criminal Court in The Hague about the harmfulness of the Corona vaccinations.

The [BPOC 2020](#) is a committee set up by citizens and is completely separate from government, business and politics. The committee was set up by **Pieter Kuit** and his daughter **Jade Kuit**.

“It comes from a sense of justice. People have needlessly lost their freedoms. But everything the government says is widely reported in the media. You can hardly find any other information.”

Kuit says he receives about 600 to 700 e-mails and 80 telephone calls a day from people who have the [same concerns](#) about the government’s lack of transparency. According to Kuit, the government “cannot provide any scientific substantiation”.

The committee has examined the proportionality of the policy and measures with regard to Covid-19 and also investigates whether the government is complying with the law. To this end, the committee hears experts such as doctors, scientists, lawyers and professors, who focus on the following question:

“Why have restrictive measures been imposed in our country since March 15, 2020 due to Covid19, are these measures effective and are the measures imposed in proportion to the disease caused by the SARS-CoV-2 virus?”

The interviews with experts are public, filmed and streamed. A written report is made of the information sessions. Interim reports and ultimately a final report with findings and conclusions are drawn up which are presented to the House of Representatives and all

relevant social authorities such as youth care, trade unions and the National Ombudsman.

Right of Parliamentary Inquiry

The House of Representatives can independently conduct research into policy and projects and have that research carried out by MPs. Several instruments can be used for this. The most efficient means is research based on the Parliamentary Inquiry Act. Since 2016, the House of Representatives has also been able to hold a parliamentary inquiry.

Thus a large number of views from experts, doctors, virologists, mathematicians, economists, but also entrepreneurs have been videotaped without any editing and live-streamed on Facebook as befits a transparent parliamentary democracy.

Covid vaccines are not safe

The experts consulted by the BPOC2020 believe that the vaccines are not safe for use. This is also apparent from the reports received by the Committee's Vaccination Reporting Center.

Until October 8, 2204 deaths and 2835 cases of serious injury after the Corona vaccine have been registered by the vaccine adverse reaction hotline. The government's database on adverse events *Lareb*, however [refuses](#) to process these reports.

The Rutte administration does not wish to take note of the reports

Cases of serious health damage, leukemia in young people, miscarriages, myocarditis and thrombosis with thrombocytopenia syndrome have been noted.

The BPOC2020 is convinced that the Dutch government is aware of the deaths and serious cases of health damage that have occurred and still occur daily after vaccination.

However, the government does not wish to take cognizance of the reports. *Larebis* also silent about the investigation into the reports that have been received at the center.

This has been the reason for the Committee to hand over all its evidence regarding the deaths and serious vaccine injuries reported, to the International Criminal Court for investigation.

The BPOC2020 also handed over the interview reports of its visit to the Ministry of Health and visit to the *Lareb* to the ICC. It is not yet clear what will happen to the evidence.
