A secret U.S. airfield, used for the testing and training of unmanned drones, has been found on Google Earth by aviation website Flight Global (via rt.com).

The airfield, located in Yucca Lake, Nevada, has been analyzed and is said to contain a 5,200 foot runway with an Unmanned Aerial Vehicle (UAVs, or drones) on the parking ramp, as well as hangars, a parking lot, a security perimeter and a special clamshell hanger used for housing special drones, called "Beasts."
