

Britain's NHS to Lose Tens of Thousands of Staff over Mandatory COVID Vaccines

Government admits 'any reduction in the numbers of health and social care staff may lead to reduced or delayed services'

A report by Britain's Independent confirms that health professionals are being obliged to either accept to be vaccinated or lose their job.

This is happening in a large number of countries simultaneously, the result of which is absolute chaos in the delivery of health care services.

The pattern is similar in numerous countries.

Who is "advising" the governments?

Who is behind this engineered collapse of State supported health care services?

Michel C. Global Research, November 10, 2021

Excerpts from The Independent

Mandatory Covid-19 vaccines could drive out tens of thousands of NHS staff leading to pressure on services, the government has admitted.

A government analysis has predicted 73,000 NHS workers, and 35,000 care workers, will not have had their Covid-19 jab by the time mandatory vaccines come into force on 1 April next year.

It has warned, "any reduction in the numbers of health and social care staff may lead to reduced or delayed services. The health system is currently stretched with an elective waiting list of 5.72 million and high levels of vacancies."

“If a proportion of staff decides to leave the NHS, this would put pressure on NHS services.”

Official estimates show it may cost the NHS £185 million to replace the healthcare workers lost as a result of the policy, while replacing care workers could cost £86 million.

All NHS staff will be required to have two jabs, under the new rules, but booster jabs will not initially be mandatory. Only staff who do not have face to face contact or have a medical reason are exempt. As of 4 November, 89 per cent of NHS staff had both doses of the Covid vaccine.
