In-depth Report: [Nuclear War](#)

## Abstract

*This paper, written by co-authors from the Gandhian Global Harmony Association (GGHA), commemorates the 79th anniversary of the tragic actions of civilians that occurred in the Japanese cities of Hiroshima and Nagasaki (HaN). These cities were the first to experience the devastating and terrifying effects of US nuclear attacks, marking a dark moment in history.*

*For nearly eight decades, the West and its “nuclear alliance” of 32 NATO countries have perpetuated the threat of global nuclear catastrophe, leading to the potential of a “nuclear winter” that could impact the entire world. In order for humanity to survive in this nuclear age, a paradigm shift for change is necessary.*

*The launch of an alternative globalization of peace science is crucial to this transformation. This science offers a universal and verifiable framework for the global community, promoting peace, justifiable harmony, prosperity, an equitable society, and sustainable development. By embracing this paradigm, nations can move away from conflict and toward a future of lasting and justifiable peace, as envisioned by Kantian concept of “perpetual peace”, Gandhian “Non-violence movement” and Galtung’s “conflict transformation by peaceful means”. This shift is essential to avoid a cycle of fragile truce amidst ongoing informal-formal wars.*

HaN: The Nuclear Criminal Civilization Birth and Its Globalization

HaN is the symbol of a deadly and criminal nuclear civilization. It was born in August 1945 and has since thrived, fueling, and escalating the nuclear arms race with top priority budgets for 79 years. It shows no sign of letting go, disregarding or suppressing all fundamental peaceful and scientific alternatives. This symbol is presented in Figure 1, showcasing all the objective parameters of this civilization's emergence: source, process, location, timing, and the scale of historical nuclear terror and genocide.

Image: Fig. 1. Hiroshima/Nagasaki Symbol

The criminal nature of nuclear civilization and the falsehood of so-called "*nuclear deterrence*" are exposed in the monograph by the famous lawyer Francis Boyle. "*The nuclear age was born from the original sins of Hiroshima and Nagasaki on August 6 and 9, 1945. The atomic bombings of Hiroshima and Nagasaki were crimes against humanity and war crimes...*" [1]. The nuclear terror of HaN is the criminal creation of the USA, and the West as a whole, originating from Hitler in 1939 in the "*German Nuclear Program*", which was provided with all necessary resources [Wiki] for racist, Nazi purposes. Therefore, the Western nuclear civilization that emerged from it is the criminal Western "*nuclear age*" and a criminal "*suicidal civilization*" [2 & 3]. This compelled other countries and civilizations of humanity, to respond with nuclear weapons for self-preservation and security against the existential Western threat, sparking a deadly, suicidal, and ecocidal global race that persists to this day.

Since the time of HaN, nuclear civilization has been marked by the ominous sign of its suicidal globalization, leading to an ongoing and accelerating nuclear arms race. This includes unlimited "*modernization*" and expansion in both genocidal potential power and the number of countries involved. This trajectory ultimately dooms this criminal civilization and all of humanity to an inevitable nuclear Armageddon and Auschwitz.

The potential for genocide in this civilization has reached an extreme level of risk surpassing 99%, as indicated by the symbolic “Doomsday Clock” set by American nuclear scientists [4]. This is accompanied by an intensification of military, psychological, and spiritual conflicts in areas like Gaza and Ukraine serving as a prelude to nuclear genocide in a new and potential world war. This dangerous situation was amplified by the protest self-immolation of US soldier, Aaron Bushnell, in front of the Israeli embassy in Washington on February 25, 2024, at 13:00 [5].

Image: Self-immolation of Aaron Bushnell (Licensed under Fair Use)

Today, nuclear civilization is at the peak of global genocide, a path first set by Adolf Hitler. The diligent students of genocide from the USA and NATO have followed in his footsteps for nearly 80 years. Their training in genocide of about 40 nations in the years after World War II with conventional weapons resulted in the deaths of 20 to 30 million civilians [6, 7 & 8]. Currently, the US and NATO continue to commit genocide against civilians in the Gaza Strip, Ukraine, and around the world. In 2023, there were 183 armed conflicts worldwide, according to Bloomberg [9]. The frantic nuclear arms race initiated by the US and NATO naturally led to increased production of these weapons in countries that were targeted to be the next victims after HaN in plans to “wipe them off the map” [10]. These countries have done everything to resist Western nuclear terror and avoid becoming victims of its crimes: the USSR, Russia, China, Iran, North Korea, India, and Pakistan. One of the latest acts in this criminal race was the suicidal decision of the West to invest 1.2 trillion dollars in the “modernization of nuclear weapons” by 2030, “capable of killing up to 90% of humanity” with the involvement of Australia, Japan, the Republic of Korea, and New Zealand in the new nuclear bloc AUKUS [11].

The globalization of nuclear civilization and its tool - nuclear weapons - is in complete contradiction to all norms of international law, ultimately destroying and rejecting it. “... *Nuclear weapons have never been beneficial instruments of state policy, but rather have always constituted illegitimate instrumentalities of internationally lawless and criminal behavior first of all.* » [1]. *The design, research, testing, production, manufacture, -, transportation, deployment, installation, maintenance, storage, stockpiling, sale, and purchase of nuclear weapons, along with threat to use them and all their essential components are criminal under well-established principles of international law. Thus, government decision-makers in all nuclear weapons states with command responsibility for their nuclear weapons establishments are subject to personal criminal responsibility under the Nuremberg Principles for this criminal practice of nuclear deterrence and terrorism that*

they impose on all states and peoples of the international community. Four components of the threat to use nuclear weapons that are particularly reprehensible from an international law perspective: counter-ethnic targeting; counter-city targeting; first-strike weapons and contingency plans; and the first-use of nuclear weapons even to repel a conventional attack.”[1] “... Humankind must abolish nuclear weapons before nuclear weapons abolish humankind... as doctrine known as “nuclear deterrence,” which is truly a euphemism for “nuclear terrorism” [Ibid].

It is crucial to differentiate between Western nuclear aggressors who use nuclear weapons to dictate over objectionable states, and other countries that develop nuclear weapons for defense against nuclear aggressors. If humanity initially allowed one aggressor to create and use nuclear weapons, then what right does it have to deprive other countries of the right to adequate, nuclear defense, as the USSR did, in response to US aggressive plans to “erase it with a map of nuclear weapons” [10]?. It is immoral to equate the aggressor and its victims.

The NATO Washington Declaration on July 10, 2024 once again confirms the criminal nature of this nuclear alliance.

“As long as nuclear weapons exist, NATO will remain a nuclear alliance... NATO remains committed to taking all necessary steps to ensure the credibility, effectiveness, safety, and security of the Alliance’s nuclear deterrence mission, including by modernizing its nuclear capabilities, strengthening its nuclear planning capability, and adapting as necessary” [12].

Our general assessment of the “golden billion” criminal Western civilization is outlined in our “Anti-NATO Manifesto” with colleagues [13].

For almost 80 years, the nuclear civilization, imposed by force and the threat of force by the West on humanity, has become a turning point in its history. Humanity will either end its existence, or radically change its strategic future towards planetary and scientific “perpetual peace” according to Kant [14] in all spheres of society, Gandhi’s nonviolence, and Galtung’s conflict transformation by peaceful means, as well as in all countries and institutions, including international law, as a common normative bridge to it. For this fateful turn, humanity needs to master the fundamental verified Peace Science, which can become its common mental base and a nonviolent instrument acceptable to all nations for the eradication of nuclear weapons as the West’s “Absolute Evil” [15]. The possibility of its eradication on a scientific basis was first considered by the GGHA in its collective “Anti-Nuclear Manifesto” of 46 coauthors from 26 countries with the participation of four Nobel Peace Laureates in 2020 [16].

## Hiroshima and Nagasaki from the American Political Kitchen Inside in 1945

The American political kitchen of 1945, where the criminal strategic decision to destroy the civilian population of Hiroshima and Nagasaki was made in detailed in various works [8, 17, 18, 19, 20 & 21], from which we will highlight the most important and characteristic attributes.

1. The first attribute is the lie of the main official motive for the HaN atomic bombing that it was allegedly necessary to “stop the war” and that HaN had “military bases”, the destruction of which allegedly “prevented the death of up

to half a million American soldiers". All sources confirm that Japan was ready to surrender in order to end the war and there were no military bases in HaN, so there was no military need for their atomic bombing [Ibid].

2. The true reason for the atomic terror of HaN was the USA's desire to establish its world hegemony. *"The intentional targeting of civilian women and children in a highly populated urban area was intended to create the maximum psychological impact on the minds of the Japanese, the Russians, and the world."* [8] *"Why did they commit such a crime? Well, more than anything, they wanted to show Russia the new weapon the United States possessed. They not only wanted to show Russia, but also to proclaim to the world that the United States would not hesitate to use any means to protect and guard its interests!"* [Ibid].

Another source states, *"In fact, the goal was clear: it was not just to destroy buildings but to instantly kill an unprecedented number of people,"* in order to "send a message" to the Soviet Union that the United States now had a monopoly on nuclear weapons and would henceforth dominate the postwar world. To achieve this, almost half a million Japanese civilians had to die, including those who later became victims of the effects of the bombs; radiation [18]. This sentiment is echoed in all sources.

3. The immorality and barbarity of the HaN bombings are truly shocking. *"Only the utter inhumanity and brutal ruthlessness of man can commit such crimes against civilians in any country! The crime exceeds all limits of barbarity when one realizes the entire tragedy could have been avoided!"* [8].

The immorality of the criminal decision to bomb the innocent inhabitants of Hiroshima and Nagasaki is revealed by the hypocritical detail of its satanic blasphemy. *"It was utter, satanic blasphemy, when the first atomic bomb was called Trinity, the holiest name in all religions... It was blasphemy, when an army chaplain blessed the Hiroshima bomb with holy water. He even blessed the Nagasaki bomb, after he had seen the casualties produced by the Hiroshima bomb, a few days earlier"* [21]. Hiroshima and Nagasaki became an atheistic desecration of all religions and of a nuclear civilization doomed by God to nuclear suicide unless an alternative paradigm is born within it.

The only bright and highly spiritual event in this vile political kitchen is when *"Theodore Hall, a 19-year-old American Los Alamos scientist, the youngest physicist on the Manhattan Project and a Soviet spy, handed complete plans for constructing the "Fat Man" plutonium bomb"* to an American spy courier working for the Soviet Union [18].

4. The extreme cruelty and immorality of America's militaristic foreign policy are revealed by President Truman's decision to exterminate hundreds of thousands of civilians in HaN in order to maintain US global dominance and intimidate the USSR. He became the second state-sanctioned mass murderer after Hitler, now known as the *"atomic butcher"* and a perpetual criminal against humanity in history for ordering the HaN atomic bombings, which had no military justification. His actions will forever tarnish his legacy with a shameful *"Herostratus glory"* of Western *"satanic absolute evil"* depicted in a posthumous portrait showing two nuclear explosions and the devastating aftermath of the Hiroshima bombing which instantly killed 80 thousand children, women, and elderly people in Figure 2.

Fig. 2. “Atomic butcher” Truman and his fruit

Truman continued the legacy of Hitler’s gas ovens in the “death camps” such as Auschwitz with sophistication and brilliance. This was done as means of furthering the racist ideology outlined in “Mein Kampf”, which will mark its 100th anniversary in 2025. This innovative Western policy has been globalizing genocidal HaN practices for 79 years, ultimately in the official policy of the “*NATO nuclear alliance*” which includes 32 European countries [12].

### Globalization of HaN in Numbers for 79 Years: 1945 – 2024

The best illustration of the HaN Western globalization scale over 79 years is the map in Figure 3, created by self-critical Western scientists from the FAS [22].

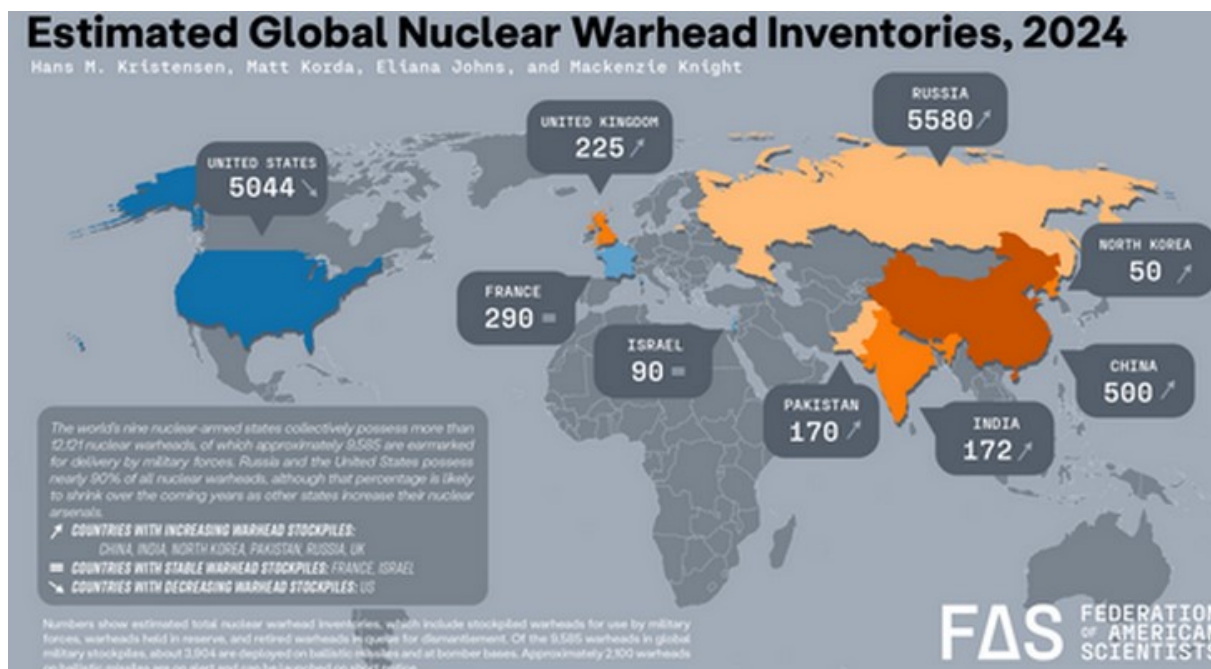

Figure 3. Estimated Global Nuclear Warheads Inventories, 2024

Based on this map and additional sources, we have constructed a table HaN estimating the scale of Western nuclear globalization over 79 years. Why “estimated”? The authors rightly point out,

“The exact number of nuclear weapons in each country’s possession is a closely held

national secret, so the estimates presented here come with significant uncertainty. Most nuclear-armed states provide essentially no information about the sizes of their nuclear stockpiles” [Ibid].

Another, important perspective, in contrast to the double standards of mainstream media, is that “the dangers of nuclear war are not a subject of debate and analysis by the mainstream media. Public opinion is carefully misled... Nuclear weapons are portrayed as peace-making bombs” [17].

Despite the inevitable margin of error, the data from sources provide a general HaN overview of the trend unclear globalization over 79 years and the “constant growth of the number of nuclear warheads towards the inevitable collapse of nuclear civilization in the global Hiroshima and Nagasaki context. This globalization is illustrated in the table in Figure 4.

Table. Globalization of H/N in Numbers for 79 Years: 1945 - 2024			
Globalization Parameters	1945	2024	GG B %
1. NP – NW Producers	1: USA	9: USA, Russia, Great Britain, France, China, India, Pakistan, Israel, DPRK	900%
2. NNCD NW	1: USA	32 (NATO) + 40 (Allies) + 7 (Non-NATO)	7900%
3. NNW NP	2	12121	606000%
4. NWCD	0	2100	210000%
5. H/NNWTC	~ 15+20+35KT		
6. TCNW24		An increase by billions of times (?). "Nuclear Winter" using 3% of NW	10 <sup>9</sup> % ?
7. NVH/N	~ 150K	~ 300K	200%
8. NPPV24		~ 4-7 billions	2x10 <sup>4</sup> %

Fig. 4. Table. HaN Globalization

Abbreviations:

HaN – Hiroshima & Nagasaki; NW – Nuclear Warheads; GG – Growth of HaN Globalization in %

1. NP – Nuclear Powers Producing Nuclear Weapons;
2. NNCD NW – Nuclear and Non-nuclear Countries Whose Military Bases May be Deployed NW;
3. NNW NP – Number of NW at NP;
4. NWCD – NW on Combat Duty;
5. HNNWTC – HaN NW Total Capacity 1945;
6. TCNW24 – Total Capacity of NW 2024;
7. NVHAN – Number of HaN Victims;
8. NPPV24 – Number of Population Potential Victims on 2024.

A few strokes on the table.

The modern “modeling results generally confirm the conclusions of simpler models from the 1980s that a full-scale nuclear conflict between Russia and the United States would lead to a “nuclear winter...” The “nuclear winter” hypothesis, which arose in a tense political

situation, showed that the consequences of a nuclear war have not been sufficiently studied and are little considered in the decision-making process regarding the use of nuclear weapons... [The] inconsistency of the assertion that “the presence of nuclear weapons by two antagonists increases their restraint in the use of military force” has been proven at the distant approaches to the nuclear threshold... Narrowing of strategic choice and short-term thinking in crisis situations cannot guarantee rational decision-making on the issue of using nuclear weapons. Justification of such a decision by national rivalry or the ideology of confrontation cannot be justified” [24].

“It has long been known that a major nuclear war could destroy modern civilization and kill most of humanity... This report summarizes the latest scientific work, which shows that a so-called “limited” or “regional” nuclear war would be neither limited nor regional. On the contrary, it would be a planetary-scale event. In fact, it would be far more dangerous than previously understood. A war that detonated less than 1/20th of the world’s nuclear weapons would still crash the climate, global food supply chains and likely public order. Famines and unrest would kill hundreds of millions, perhaps even billions...Using less than 3% of the world’s nuclear weapons, a nuclear war between India and Pakistan could kill up to every third person on earth [~2,7 billions]”[25].

Potentially, there could be almost 10,000 times more victims HaN than in the Holocaust, a 1,000,000% increase. This is the supposed scale of HaN Western globalization today, stemming from only 3% of the world’s nuclear weapons. In more severe scenarios of “regional” nuclear war, considered by the author, the damage to humanity becomes even more devastating [Ibid].

## Conclusions

- A. The nuclear civilization of humanity is Western in its origin, center, and main driving force of the “golden billion” with its “nuclear alliance” NATO. This alliance has ensured the HaN globalization to a potential planetary nuclear winter with its inevitable probability over 99% for the past 79 years [4].
- B. This civilization was imposed on humanity through the use of force and the threat “nuclear weapons absolute evil”. The race for nuclear weapons has involved practically all countries in some way, making the new HaN danger universal for all nations. The nuclear civilization is signing its own death warrant with its global HaN threat, which is more than 99% ready for launch today.
- C. In a global nuclear war with the HaN billion-fold scaling of HaN in this civilization, humanity will be thrown back in its evolution by tens or hundreds of thousands of years to a stage of savagery and [paleoanthrope](#). The remaining survivors will be doomed to radioactive extinction for many centuries, similar to the Chernobyl disaster zone.
- D. The history of nuclear civilization, spinning 79 years has revealed the increasing militarism of the West and NATO, despite some impressive achievements. This militarism has capacity to not only destroy itself and also most of humanity.
- E. Militarism has emerged as the “Achilles heel” of nuclear civilization, particularly for its “founding father” the West and NATO. For the past 79 years, it has failed to foster of a common, positive approach to

science, and culture of peace, dismissing such efforts as “madness, crazy, dissidence and chimera”.

- F. The cognitive and ideological limitations imposed by militarism have prevented the West from creating a fundamental and verifiable scientific alternative to the inevitable nuclear suicide of its civilization.
- G. Militarism is a pathological attribute of social nature that is aimed at death rather than life. When combined with humanity’s holistic ignorance and impotence, it becomes an insurmountable source of eternal cognitive and ideological confrontation.
- H. Nuclear civilization will mark the final chapter in humanity’s history, crowning and completing a multi-thousand-year period of violent civilizations. The primary instrument of violence, weapons, has reached a level of self-destruction with nuclear weapons, pushing humanity to its planetary nuclear suicide ceiling. This is incompatible with life and our future.

[Michel Chossudovsky](#) is Professor of Economics at the University of Ottawa and Director of the Centre for Research on Globalization (CRG), which hosts the critically acclaimed website [www.globalresearch.ca](http://www.globalresearch.ca). He is a contributor to the Encyclopedia Britannica. His writings have been translated into more than 20 languages.

### Reviews

“This book is a ‘must’ resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since ‘9-11’ against non-nuclear countries to seize their oil fields and resources under cover of ‘freedom and democracy’.”

–John McMurtry, Professor of Philosophy, Guelph University

“In a world where engineered, pre-emptive, or more fashionably “humanitarian” wars of aggression have become the norm, this challenging book may be our final wake-up call.”

–Denis Halliday, Former Assistant Secretary General of the United Nations

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world’s only superpower, and diplomats work as salesmen for the defense industry, the whole world is heart-rending, scary and absolutely endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction.

–Ellen Brown, author of *Web of Debt* and president of the Public Banking Institute
