[Donation Drive: Global Research Is Committed to the "Unspoken Truth"](#)

Very few of us saw the COVID-19 pandemic back decades. Yet the underpinnings and timeline for the pandemic response go back many years and date stamped by the [2005 PREP Act](#) which provided immunity to "countermeasures" which we later learned included masks, lockdowns, vaccines, etc.

In the tome [COVID-19 and the Global Predators](#), the Dr. Peter and Ginger Breggin constructed a timeline near the end of the book indicating 36 or more pandemic preparedness events including the PREP Act, 25 of which were written documents, and 6 were filmed like [Johns Hopkins Event 201 in 2019](#) featuring many public health leaders, Senators, the [Chinese CDC Director Dr. George Fu Gao](#), and the now [US National Intelligence Director Avril Haines](#). These events should have been in the media and caught our attention. Honestly I missed them all!

Now with Disease X being openly planned as a next pandemic, likely emerging from a biolab where gain-of-function research is being done on organisms to make them more contagious and deadly to humans, the entire world is paying attention to a dangerous game of biological threats and counter-measures (therapeutics, vaccines) being played by high-stakes rollers within the [Bio-Pharmaceutical Complex](#). We are told Disease X is an unknown future organism, but it will have 20-times the mortality rate of SARS-CoV-2. How does Bill Gates, WHO, WEF, or anyone in the Complex know? I had a chance to sit down for this part of an interview with [Dan Shumway of Kla.TV](#) which is a global network to discuss these developments and the new calculus of public awareness developing for man-made biological threats. [Shumway publishes an excellent Substack](#) for you to check out.
