Sir [Chris Hoy](#), the six-time Olympic gold medallist, has revealed he has terminal [cancer](#).

The 48-year-old cycling legend has been told by doctors that he has just two to four years left to live.

Hoy first announced in February that he was undergoing treatment for cancer, but said he was 'optimistic' and then worked as a [BBC](#) pundit at the Paris [Olympics](#) in the summer.

However, the father of two has now admitted he has known for a year that his illness is terminal.

The Scot originally went to the doctor in September 2023 for a suspected shoulder strain, only to discover he had a tumour in his shoulder.

A further scan found that the primary cancer was in his prostate and had spread to his bones.

'We were all born and we all die and this is just part of the process,' Hoy told The [Sunday Times](#).

'But aren't I lucky that there is medicine I can take that will fend this off for as long as possible.'

In a statement published to Instagram in February, Hoy described himself as 'optimistic' and 'positive'.

However, in his announcement this week he admitted that he knew even back then that his cancer was incurable.

Despite this, Hoy – who won six Olympic gold medals for [Team GB](#) between 2004 and 2012 – insists that he still feels 'lucky'.

Hoy married wife Sarra in 2010 and they have two children together.

Both children were born prematurely. Son Callum was 11 weeks early in 2014, before daughter Chloe arrived four weeks ahead of schedule.

Against the odds, Callum and Chloe are now both perfectly healthy.

Unfortunately, the same cannot be said of their parents. In addition to Hoy's cancer, Sarra has multiple sclerosis.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. –Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. –Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
