[Dec. 28, 2023](#) - Archbald, PA - Amy Costanzo was diagnosed with Stage 3C Ovarian cancer. She has had to have extensive "debulking surgery" which included removal of all female reproductive organs and her omentum layer.

Amy Costanzo's Angel Team

Archbald, PA

 Team fundraiser

Linda Gilbride and Kiersten Costanzo are organizing this fundraiser.

On Nov 14, 2023, during a surgical procedure, doctor's discovered that Amy had cancer, her procedure was ended and the next day she was seen by a Gynecological Oncologist. The next several weeks were filled with tears, recovery from surgery, doctor appointments, P.E.T. scans, pre-op tests and caring for Amy and her two children.

On Dec 5, 2023 Amy underwent a "Debulking Surgery", which included removal of all female reproductive organs and her omentum layer to remove her cancer. After surgery, Amy was in the hospital for five days being monitored by her medical team. Since surgery, Amy has been recovering comfortably at home with her family.

Next, on Dec 20, 2023 Amy met with her Oncologist for the results of the pathology and next steps in her care plan. She was diagnosed with Stage 3C Ovarian Cancer. The doctor's shared that the cancer had been removed but Amy will undergo numerous rounds of chemotherapy as next steps in her care plan.

[Dec. 24, 2023](#) - UK - 23 year old Caitlin Tomlinson Button is fighting a rare advanced ovarian cancer. "Up until June 2023 I was living a very normal life, looking after the elderly enabling them to stay in their own homes."

Donate to help me fight Ovarian Cancer

Caitlin Tomlinson Button is organizing this fundraiser on behalf of Caroline Tomlinson Button.

Hi everyone, my name is Caitlin, I'm 23 and am fighting a rare ovarian cancer. Up until June of 2023 I was living a very normal life. I enjoyed working as a community carer, looking after the elderly enabling them to stay in their own homes. I live with my wonderful partner Oli and our rescue dogs, dachshund Cloud and crazy springer spaniel Oxley. I'm very lucky to have a strong, caring family around me. Unfortunately in the summer of 2023, I was admitted to The Royal Marsden hospital in London to begin a gruelling regime of Chemotherapy. I have completed 4 rounds of chemotherapy and my cancer is receding and my team are pleased with my progress. I have 2 more rounds of chemotherapy and possible radiotherapy.

December 24th, 2023 by Caroline Tomlinson Button, Beneficiary

Thank you all for your good wishes and support. Caitlin's operation went well though she had to spend 5 days in intensive care. We are all now home and looking forward to

[Dec. 15, 2023](#) - Bradenton, FL - 31 year old Alyson Bermudez, a softball coach at New College of Florida and pitching instructor, was diagnosed with a 20cm ovarian tumor on right ovary and 13cm tumor attached to her left ovary. She also has cancer on "several surfaces of her abdomen".

Coach Aly Cancer Treatment Expenses

Kate Leavell is organizing this fundraiser on behalf of Alyson Bermudez.

My fellow coach and friend Aly Bermudez is headed into surgery tomorrow and will need to travel for a specific non-covered treatment afterwards, **to treat her chemo-resistant ovarian cancer. Aly is a coach and friend who pours herself relentlessly into others.** She now needs our love and support so she can put her energy into healing and not worrying about getting the treatment she needs to fight this. Aly is a beautiful soul and deserves all they help we can gather for her. ♥

Read more about her story below.

Aly Bermudez, is the head softball coach at New College of Florida and a pitching instructor serving the Sarasota and Fort Myers area. Aly was **diagnosed with a rare type of ovarian cancer in March 2023 and underwent open surgery to have a 20cm mass removed** along with her right ovary.

Last week Aly called an ambulance at 4am as she was experiencing extreme stomach pain and nausea. After being taken to the hospital and undergoing testing, **another mass, this time 13cm, was found attached to her left ovary.** Aly was in the hospital for two days being treated for internal bleeding caused by the mass.

Aly is undergoing surgery on Thursday December 14th to attempt to remove the mass and save at least part of the ovary that is left.

Only 31, she lives alone and has no family in Florida. She faces a difficult road ahead to prevent the cancer from coming back and save her ability to have children of her own some

December 15th, 2023 by Kate Leavell, Organizer

Aly is so appreciative of all the love and support. Please keep sharing so we can get her the treatment she needs. Her surgery was successful in removing the tumor but there was some new challenges discovered that mean she will need this additional treatment more than ever to combat this. See below:

The procedure is complete and they were able to remove the growth laparoscopically and save a substantial portion of her ovary. **However, this tumor was confirmed to be cancerous. It did rupture, and signs of cancer processes were found on several other surfaces in her abdomen.**

Johnson City, TN

My name is Porschea. I am a 32 year mother of a sweet and sometimes wild 6 year old little boy. [I was diagnosed with Ovarian cancer- Mucinous Adenocarcinoma in August 2023.](#) This is my journey and struggles thus far.

For those who do not know. I had an ovarian cyst that started at 11cm. My specialist refused to operate stating it will go away or burst and be absorbed. Fast forward it shrunk to 8cm and I was put on lupron depot to help with symptoms from the endometriosis. After starting lupron the cyst began to grow rapidly and the [specialist kept turning surgery down until the cyst was 30 cm and taking up my entire abdomen.](#) He then stated he recommends a full hysterectomy and he did not do those and told the hospital to refer me to an Obgyn. I'll skip quite a few details but I ended up finally having surgery on August 3, 2023. I was cut from sternum to pubic bone and spent 4 days in the hospital at sycamore shoals.

TOPICS **Celebrity**

Chris Evert has been diagnosed with cancer for a second time.

The 68-year-old tennis star - who was the world's number one player in the 1970s and has since become a TV commentator - was first diagnosed with ovarian cancer in 2022 and announced earlier this year that she was in remission.

However, in a statement released via ESPN, Chris revealed that her cancer has returned "in the same pelvic region" and she is undergoing treatment again.

She said: "Since I was first diagnosed with cancer two years ago, I've been very open about my experience. I wanted to give all of you an update. My cancer is back.

"While this is a diagnosis I never wanted to hear, I once again feel fortunate that it was caught early. Based on a PET CT scan, I underwent another robotic surgery this past week. Doctors found cancer cells in the same pelvic region. All cells were removed, and I have begun another round of chemotherapy.

"I encourage everyone to know your family history and advocate for yourself. Early detection saves lives. Be thankful for your health this holiday season."

Chris explained that her diagnosis and treatment will rule her out of ESPN's coverage of the Australian Open but insisted she will be back to work as soon as possible.

She added: "I will be unable to join my colleagues when ESPN makes its return to Melbourne for the Australian Open next month. But I'll be ready for

Avondale, AZ

Hey Everyone,

My Name is Ashlie Edwards and I have recently been diagnosed August 17, 2023 with Stage 3C Ovarian cancer. At the age of 31, I am learning of this news and coming to terms that my life has changed forever. I was placed on an unpaid LOA (leave of absence) from work to heal from my laparotomy (open surgery) to remove the two large cysts. **One the size of a Basketball was on my left ovary going into my lower and mid abdomen and the second mass was on my kidney.** Returning back to work was a hassle after surgery due to my employer not having light duty accommodations. I could not return to work until my doctor approved of my incision being completely healed.

Organizer
Bolivar, MO

My Granny, [Bobbi Nash](#), was diagnosed with Stage 3 ovarian cancer at the end of September of 2023. Her battle was a short and painful as the tumor took her life on November 11th, 2023 at the young age of 60, surrounded by her children, grandchildren, and doting husband, Stephen Farris. My Granny devoted her life to God, her horses, nursing, and her family. She's finally retiring in heaven with God and loved ones. Every dollar will be used to give my Granny a beautiful funeral and to allow her family and friends to celebrate the short life she had and follow her to her final resting spot next to her late husband, Clarence.

[Nov. 8, 2023](#) - 21 year old Destinee was diagnosed with a 32 by 15cm ovarian cancerous tumor in Jan. 2022.

She was diagnosed with ovarian cancer at the age of 21 – this is Destinee’s story

“It was just after New Year’s, and I went to a CrossFit session – at this point, I looked about nine months pregnant. I ended up presenting to the emergency room after and that’s when they told me that they thought I had a benign tumour. Surgery was booked for six weeks,” she says.

“Two days later, I presented back. My tumour had ruptured which caused my lungs to collapse, amongst a lot of other things. They ended up flying me to Brisbane for emergency surgery.”

Then, her entire world was turned upside down during a single phone call three weeks later when the biopsy results came back – the 32 cm by 15 cm tumour was cancerous.

“I was diagnosed [with ovarian cancer] over a five-minute phone call. And in that same phone call, I was told that I had to do chemo and that it was really recommended that I freeze my eggs,” says Destinee.

Going through the motions – incredibly frustrated with her sudden lack of independence – she spent her 22nd birthday in hospital receiving chemo. Now, after finishing her treatment in 2022, she’s living her life the way she wants to, right here in Canberra.

[Oct. 30, 2023](#) – Dayton, OH – 52 year old LAPD Police Officer Tara Kessop was diagnosed with Stage 4 Ovarian Cancer in May 2023.

Tara Kessop
Organizer
Dayton, OH

My name is Tara Kessop. I served 20 years as an LAPD Officer and retired when i was 47. I spent most of my time serving the community of Watts. I'm a 3 time Grandmother and an avid cat rescuer. I still have passion for helping those in need. I'm 52 years old and was diagnosed with stage 4 Ovarian Cancer in May 2023. Unfortunately, LAPD doesn't reimburse health insurance until age 55. When I was diagnosed, and for the first few months I didn't have any health insurance. Getting commercial insurance was difficult and took months to get. My bills have reached over 232k and I am hoping to get myself out of medical debt. I have tried to get government assistance, but unfortunately I don't meet their parameters.

Oct. 21, 2023 - TURBO CANCER - 34 year old Colombian actress & model Alejandra Villafane Osorio died from a very rare cancer Oct. 21, 2023. She fought months against **ovarian** germ cell tumor (& also breast tumors).

BEAUTY QUEEN'S BATTLE Who was Alejandra Villafaña and what was her cause of death?

Shared heartbreaking last message alongside a video before her death

Shanine Bruder

Published: 7:48 ET, Oct 23 2023 | Updated: 8:56 ET, Oct 23 2023

Who was Alejandra Villafaña?

Alejandra Villafaña, 34, was an actress, beauty pageant winner, [influencer](#) and [model](#) from [Colombia](#).

Prior to her passing, Alejandra had amassed a staggering 222,000 fans and followers on the [social media](#) platform [Instagram](#).

Throughout her time spent competing in beauty pageants, Alejandra won the Miss Earth Colombia competition in 2014 and placed in the top 16 of Miss Earth in the [Philippines](#) that same year.

Alejandra was born on October 8, 1989, and passed away on October 21, 2023, just days after her 34th birthday.

What was Alejandra Villafaña's cause of death?

On October 23, 2023, it was reported that Alejandra Villafaña had tragically died aged 34.

She passed away on October 21 following a months-long battle with [cancer](#).

The late actress underwent chemotherapy and surgery after discovering that she had three malignant tumours in her breasts and ovaries.

Her treatment initially went well but she suffered setbacks that brought her back to hospital.

On October 12, 2023, Alejandra, who often shared updates during her treatment, posted her last heartbreaking message along with a video which read: "This video is a tribute to the family that is always there, to the friends who arrived and became family."

Alejandra Villafañe: how is the germ cancer that the actress suffered?

Neither surgery nor chemotherapies worked to treat terminal cancer suffered by the 34-year-old actress

Alejandra Villafañe, actress who died of cancer. / Photo: Instagram alevillafane.

The news of the actress' death [Alejandra Villafañe Osorio](#) moved the art world. The 34-year-old Colombian suffered from a strange cancer, which, according to her family, was terminal.

Neither the surgeries, nor the treatments, nor the chemotherapies worked to eradicate the tumors that afflicted it. She herself documented her process through her social media accounts.

According [declared her cousin](#), Claudia for a program called " I know everything Colombia ", the actress suffered from germ cancer, " very aggressive and strange ", which was always going to grow.

¿What is germ cancer like, like the one Alejandra Villafañe suffered from?

According to the health care system, Stanford Medicine Children's Health, this type of cancer develops germ cell tumors and can be benign or malignant.

Germ cells are rare, and according to Stanford Medicine they can start in an ovary or testicle, although some have developed in people's brains.

[Oct. 20, 2023](#) - Pompano Beach, FL - Jessica Christie died from Stage 4 Ovarian Cancer.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by **Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global

coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
