

# **Covid Vaccine: Over 96 Canadian Children Ages 2-19 Have Died Unexpectedly in the Past Three Months. A Warning Call for Canadian Parents.**

My most important warning call on COVID-19 mRNA vaccines yet...

\*\*\*

*In the August 2022 James Gill paper titled "Autopsy Histopathologic Cardiac Findings in 2 adolescents following the second COVID-19 vaccine dose" ([click here](#)), two teenage boys died in their sleep within the first week after receiving the 2nd Pfizer COVID-19 mRNA vaccine dose. Both boys were pronounced dead at home.*

Sudden deaths of Canadian children have skyrocketed in recent months. I have tracked these deaths since November 2022, when healthy Canadian children began to die from influenza, strep, myocarditis, blood clots, strokes, sudden deaths while playing sports and sudden deaths in their sleep (!)

I have been overwhelmed with the sheer number of these sudden deaths recently and this will be my last report of this kind.

The COVID-19 mRNA vaccine status in many of these tragic cases is unknown. Some of these children were mandated to have COVID-19 mRNA vaccines to play sports or attend University or College. While it is unknown in how many of these cases mRNA toxicity played a major factor, even ONE child death due to mRNA vaccine damage and injury, is one death too many.

Due to the aggressive, unscientific and unethical rollout of COVID-19 mRNA vaccines in Canadian children in 2021 and 2022, parents must be on guard for COVID-19 mRNA vaccine toxicity, which has been implicated in severe damage to the immune system, heart, brain, kidneys, liver, endocrine system, reproductive organs, as well as autoimmune diseases and cancers.

Analysis...

## 96 children ages 2-19 died suddenly since Nov.1, 2022

Province	Total	Influenza	Strep	Meningitis	sudden
BC	14	6	1	0	7
Alberta	15	3	1	0	11
Saskatchewan	11	1	0	0	10
Manitoba	6	1	0	0	5
Ontario	27	2	0	0	25
Quebec	15	0	2	0	13
Nova Scotia	6	0	0	2	4
Newfoundland	1	0	0	0	1
New Brunswick	1	0	0	0	1
<b>TOTAL</b>	<b>96</b>	<b>13</b>	<b>4</b>	<b>2</b>	<b>77</b>

<b>Age &lt; 5</b>	<b>14</b>	<b>2</b>	<b>2</b>	<b>0</b>	<b>10</b>
<b>Age 5-11</b>	<b>21</b>	<b>8</b>	<b>2</b>	<b>0</b>	<b>11</b>
<b>Age 12-19</b>	<b>61</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>56</b>

### My Take...

There is no question that sudden and unexpected Canadian pediatric deaths are accelerating. During Canada's flu season in November & December 2022, many kids struggled with the usual childhood infections such as influenza, strep, meningitis and a number of healthy kids died from infections that they should never have died from.

I believe that COVID-19 mRNA vaccine injury to the immune system played a major role in at least some of these deaths. 13 kids died from influenza, 4 from strep and 2 from meningitis (that we know of). Many provincial governments (including Ontario) refused to release any information on the deaths of children due to influenza in late 2022. The governments knew something was very wrong and they stayed quiet.

What is even more alarming, however, are 56 sudden deaths in children ages 12-19. This is the age group that is dangerously over-vaccinated with COVID-19 mRNA, with 84% Canadian children having 1 dose and 80% having two doses.

**Table 2. Cumulative number and percent of people in Canada who have received a COVID-19 vaccine by age group and vaccination status, January 29, 2023**

Age group (years)	At least 1 dose	Primary series completed	In the last 6 months, primary series completed or booster dose received
0 to 4	9.5% (178,386)	4.8% (91,046)	4.8% (90,636)
5 to 11	52.4% (1,522,872)	40.9% (1,187,636)	10.0% (290,881)
<b>12 to 17</b>	<b>84.1% (2,126,279)</b>	<b>79.8% (2,018,517)</b>	<b>10.5% (264,248)</b>
18 to 29	85.3% (5,204,468)	83.1% (4,065,713)	9.2% (564,186)

I believe COVID-19 mRNA vaccines are playing a major role in many of these sudden deaths of Canadian children ages 12-19, and this is a public health emergency that can no longer be ignored, and must be investigated immediately.

Denmark, Sweden, Norway and Finland halted COVID-19 mRNA vaccines in children under 18 a long time ago. They clearly know something Canadian politicians and Canadian doctors don't.

COVID-19 mRNA vaccines should never have been rolled out in Canadian children of any age. They must be halted immediately.

# The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
