

Petition to Canada's House of Commons: Stop the Implementation of 5G Technology!

By [Richard Bernier](#)

Global Research, April 21, 2019

Region: [Canada](#)

Theme: [Police State & Civil Rights](#), [Science and Medicine](#)

Whereas:

- *Wi-Fi systems and 5G technology have very harmful effects on human, animal and environmental health;*
- *Wi-Fi systems and 5G technology seem to be especially harmful to newborns, children, people who are ill and seniors;*
- *5G technology is similar to, but worse than, the problems that have already been linked to early generations of telephones because it uses pulses of waves;*
- On January 1, 2019, 247 scientists in 42 countries recommended a moratorium on the deployment of 5G technology in the telecommunications sector;
- A major study by the National Toxicology Program in the United States showed that rats exposed to waves developed cancers;
- The International Association of Fire Fighters (IAFF) opposes the installation of cellular towers and antennas on their firehalls for health reasons;
- The precautionary principle is not implemented seriously or rigorously; and
- Since 5G technology was deployed in New York City, a number of people and their pets have fallen ill.

We, the undersigned, **concerned citizens and residents of Canada**, call upon the **House of Commons** to enact a moratorium, or temporary halt, on implementation of 5G communication technology across Canada until an independent House of Commons-mandated team of qualified researchers has proven that the dangers of 5G technology to human, animal and environmental health are in fact minimal and have no serious consequences.

[Link to the petition](#). It is open for signature until August 16, 2019, at 3:04 p.m. (EDT).
