Pfizer has been caught hiding sudden deaths during the clinical trials for the pharmaceutical giant's Covid mRNA "vaccine."

The hidden deaths were discovered during a major 1 and half year investigation by a team of researchers.

The team, volunteering for the non-profit news outlet [The Daily Clout](#), revealed that these deaths were covered up to hide serious adverse reactions from the public.

During the investigation, the team of researchers, including physicians, a data expert, and a former United States Army Intelligence officer, analyzed thousands of pages of documents relating to the study.

They found that Pfizer had failed to report the deaths of two women during the trial.

One woman died in Kansas and the other one was in Georgia.

Not only did Pfizer fail to report the deaths, but the company actively covered them up.

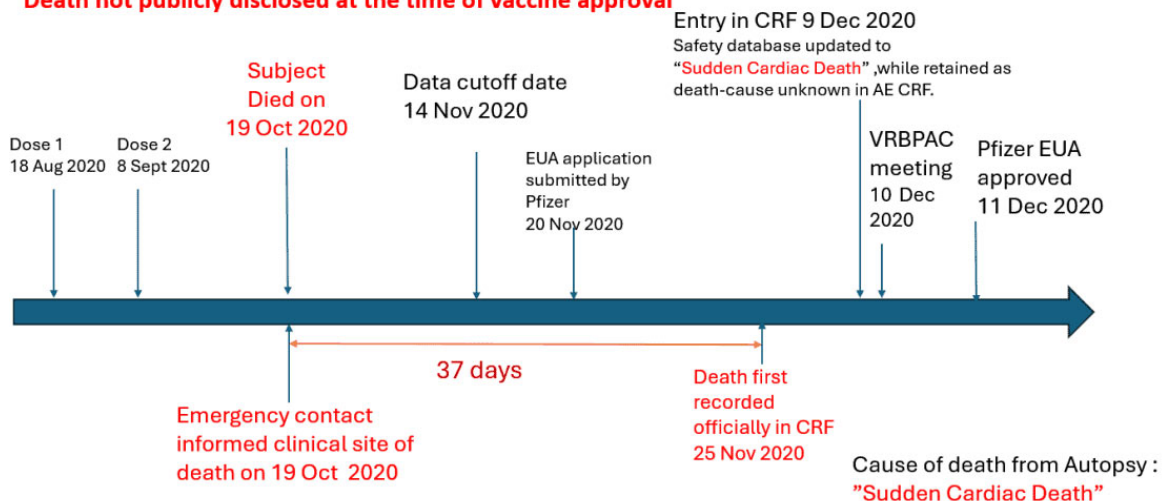

It appears that the deaths were hidden because regulators would have considered the "vaccines" too dangerous for public use.

According to [Dr. Jeyanthi Kunadhasan](#), an anesthetist and perioperative physician in Australia; who was part of the team, the study protocol required that any "death or serious adverse effect" had to be reported within 24 hours.

In the Kansas case that did not happen for 37 days.

**Subject 11141050 from Alliance for Multispecialty Research LLC , Newton, Kansas
63-year-old white female - participant in Pfizer Covid 19 vaccine trial C4591001**

Death not publicly disclosed at the time of vaccine approval

Study protocol - Death and Serious Adverse Event (SAE) to be reported to Pfizer SAE form no later than 24 hours

CRF – Case Report Form. AE Adverse Event

The Kansas case was a 63-year-old woman who had her first dose of the Pfizer mRNA vaccine on August 18, 2020.

The woman received her second dose on September 8, 2020.

She died of a sudden cardiac arrest on October 19, 2020.

The woman’s emergency contact immediately informed the clinical site — Alliance for Multispecialty Research LLC, in Newton, Kansas.

Thirty-seven days later, on November 25, 2020 — 11 days after the data reporting cutoff date — the death was finally recorded in a “case report form.”

The death was added to the report five days *after* the emergency use application was submitted to the U.S. Food and Drug Administration (FDA) by Pfizer.

The participant’s death was not reported in the trial results in the prestigious New England Journal of Medicine or to the FDA’s Vaccines and Related Biological Products Advisory Committee (VRBPAC), which approved the EUA.

According to a [letter](#) Kunadhasan sent to Kansas Attorney General Kris Kobach — who is [suing](#) Pfizer over the vaccine — an autopsy recorded the cause as “sudden cardiac death.”

Pfizer physicians ruled her death was not related to the vaccine, citing “risk factors” for heart disease to include hypertension and obesity.

However, according to Kunadhasan, the patient was hardly obese but rather mildly overweight, at approximately 5 feet 4 inches tall and 163 pounds.

“To be eligible for inclusion in this clinical trial, participants had to be deemed healthy

based on medical history, physical examination (if required), and the clinical judgment of the investigator.

“The protocol allowed healthy participants with pre-existing stable disease – defined as disease not requiring significant change in therapy or hospitalization for worsening disease during the six weeks before enrolment – to participate in the clinical trial,” Kunadhasan wrote.

“This patient was medicated with two different antihypertensives and had encountered clinical trial personnel at least three times with no mention of any worryingly high blood pressure readings.

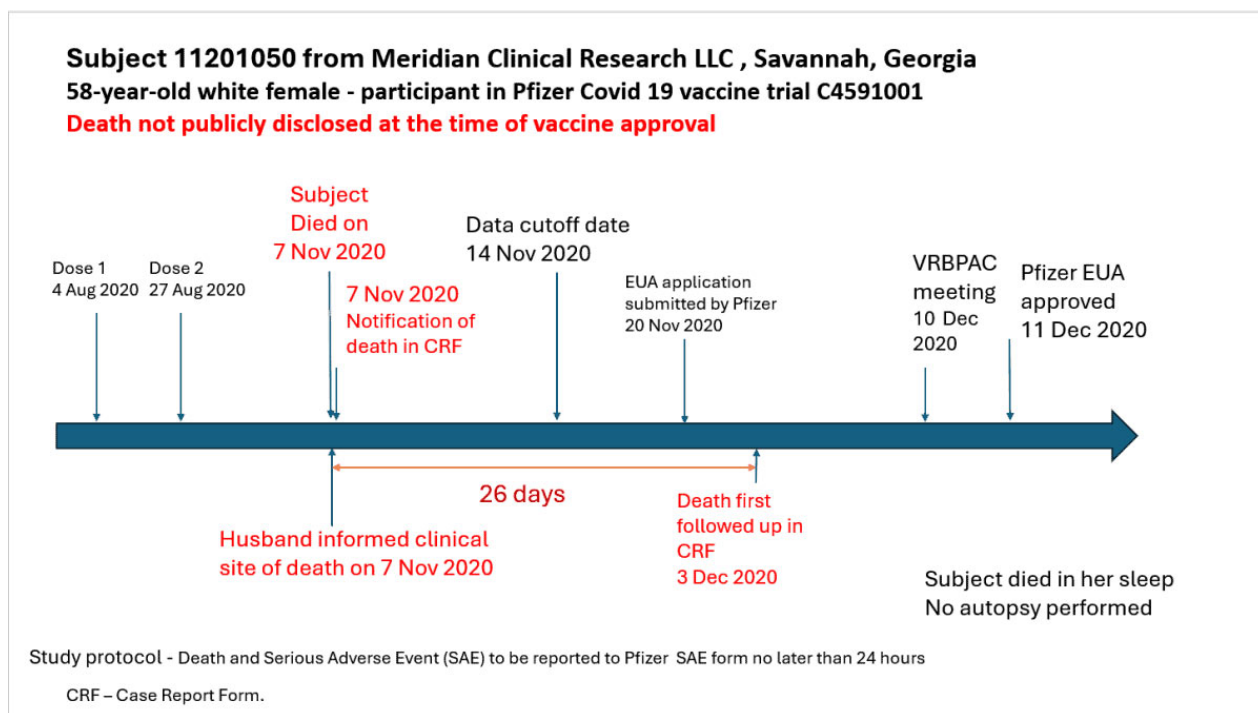

“In fact, I cannot find any blood pressure reading in her publicly available case notes.

“Consequently, I can only assume the patient’s high blood pressure, from which she had suffered since January 1st, 2010, was well-controlled when she was admitted to the trial.”

The patient was 165cm tall and weighed 74.1kg.

Her BMI (body mass index) of 27.2 put her in the overweight category, not obese.

The second hidden death was a 58-year-old woman in Georgia.

She received her first dose on August 4, 2020, and a second on August 27, 2020.

The woman died suddenly of a cardiac arrest in her sleep on November 7, 2020.

Her husband immediately informed the clinical site.

The death was not added to the data for 26 days and first followed up on December 3, 2020 — again well after the Nov. 14 data cutoff date.

The woman had taken a muscle relaxer and valium for chronic back pain prior to going to bed, but both were medications “previously used by the subject.”

In a [letter](#) to Texas **Attorney General Ken Paxton**, who [is also suing](#) Pfizer, Kunadhasan notes that there was no autopsy.

A coroner was simply called to pronounce death.

The trial investigator simply declared there was “no reasonable possibility that the cardiac arrest was related to the study intervention.”

However, without an autopsy, how can anyone know?

The information has emerged as Pfizer has just suffered a major legal blow.

As Slay News [reported](#), a federal judge has just ordered the U.S. Food and Drug Administration (FDA) to release the sealed documents for pharmaceutical Pfizer’s Covid mRNA “vaccine” trials.

Pfizer and the FDA have been battling in the courts to keep the documents hidden from the public for 75 years.

However, the Public Health and Medical Professionals for Transparency (PHMPT) brought a high-profile case against the FDA to force the release of over one million pages of documents.

The United States District Court for the Northern District of Texas has just ruled against the FDA and ordered the release of the Pfizer docs.

The files are related to the FDA’s Emergency Use Authorization (EUA) for the Pfizer-BioNTech Covid mRNA “vaccine.”

The decision mandates the FDA to release the EUA file for the Pfizer injection no later than June 30, 2025.

The case stemmed from a Freedom of Information Act (FOIA) request by the PHMPT.

The PHMPT is a group of scientists and public health professionals seeking comprehensive data on the vaccine’s approval process.

The FOIA request sought comprehensive data related to the Pfizer “vaccine.”

The FDA had tried to keep the documents sealed for the next few decades, or until most adults alive during the pandemic were no longer around.

The federal agency claimed it would need up to 75 years to process and release the requested documents.

However, President Donald Trump-appointed U.S. **District Judge Mark Pittman** rejected this argument.

The Texas judge cited the importance of government accountability and gave the FDA just under seven months to release the documents to the public.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a

relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.
—**Peter Koenig**

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –**David Skripac**

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –**Edward Curtin**
