Cancer Genomics Expert Dr. Phillip Buckhaults Testifies to the SC Senate on the DNA Contamination Found in mRNA COVID Vaccines

"The Pfizer vaccine is contaminated with plasmid DNA, it's not just mRNA...I'm kind of alarmed about the possible consequences of this...It could be causing some of the rare, but serious, side effects like death from cardiac arrest...

This DNA can and likely will integrate into the genomic DNA of cells that got transfected with the vaccine mix...It's different from RNA because it can be permanent...

It could cause theoretically...a sustained autoimmune attack towards that tissue.

It's also a very real theoretical risk of future cancer in some people.

There's probably about 200 billion pieces of this plasmid DNA in each dose of the vaccine...This is a bad idea."

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
