[May 9, 2024](#) – *EXCLUSIVE: Pfizer Whistleblower Leaks Company Email Offering “Separate and Distinct” COVID-19 Vaccines to Workers*

A Pfizer whistleblower has raised the alarm that Pfizer workers were offered a “separate and distinct” COVID-19 vaccine and were told their jab would “not impact supply to national governments in any way.”

A leaked **email from January 2021**, provided exclusively to Infowars, explained to colleagues and contractors at Pfizer’s Pearl River research site that site-essential workers would be offered COVID-19 vaccinations that are “**separate and distinct**” from the doses Pfizer committed to governments worldwide.

“The vaccine doses to be used for this program are separate and distinct from those committed by Pfizer to governments around the world and will not impact supply to national governments in any way.”

Pfizer’s Pearl River research site is located in Rockland County, New York and is one of Pfizer’s nine major R&D sites, [according](#) to its website.

Dec. 26, 2022 – Jikkyleaks reveals there are 7 Pfizer employee batches of COVID-19 Vaccine in Australia, that are not in the “Death batch log.”

Jikkyleaks

@Jikkyleaks

Do you know what else is not in the death batch log?

Any of the 7 batches reserved for Pfizer employees.

No, I'm not kidding:

FF0884

FA4598

FE3064

FA7338

FA7812

FC8736

[What is batch release assessment?](#)

[What will the TGA do for COVID-19 vaccine batch release?](#)

[TGA Laboratories testing results for COVID-19 vaccines](#)

The Therapeutic Goods Administration (TGA) ensures there is an independent quality assessment of every batch of vaccine supplied in Australia. This page provides information about the batch release assessment process for COVID-19 vaccines.

TGA Laboratories testing results for COVID-19 vaccines

TGA Laboratories have been performing batch release and testing on all batches of COVID-19 vaccines that have been supplied in Australia. Batch release assessment is a critical part of the regulatory oversight of vaccine quality. It is especially important for vaccines that are provisionally approved, such as COVID-19 vaccines.

The information available covers all COVID-19 vaccines including the Australian manufactured AstraZeneca COVID-19 vaccine.

The table of information will be regularly updated as additional batches are assessed.

[Jan.11, 2021](#) – Kildare, Ireland – BREAKING: Some Pfizer staff in Newbridge to get Covid-19 vaccine in coming days.

Pfizer is to begin offering the Pfizer/BioNTech vaccine to several employees at its Newbridge plant in coming days, it has emerged tonight.

The jabs, which are being given to “site-essential” staff, will not affect the supply being rolled out by the HSE as part of its vaccination programme.

Around 15,000 staff and contractors at Pfizer plants across the EU will receive the vaccine.

The announcement is good news for many employees based in Newbridge where several hundred are employed.

A statement from Pfizer said today:

“Pfizer has begun offering on-site vaccinations against Covid-19 to its site-essential employees, for example in manufacturing, who are critical to the vaccine effort and the continued supply of all Pfizer medicines.

“Ensuring supply of our medicines and continuation of critical research and development work across therapeutic areas, including cardiovascular disease and cancer, is a priority for global health, particularly given the current burden on health systems around the world as a result of COVID-19.

“Site-essential employees are those based at our manufacturing and R&D sites whose presence is required at a Pfizer location to ensure supply of our medicines and vaccines, the continuation of critical research and development programs, and to maintain and keep secure our labs and buildings.

“Vaccination of site-essential employees started this week at our manufacturing sites in Kalamazoo, Michigan, and Puurs, Belgium. We will expand to other Pfizer sites on a rolling basis. There are approximately 15,000 employees and contractors across Pfizer sites in the EU who are considered site-essential.

“The vaccine doses to be used for this program are separate and distinct from those committed by Pfizer to governments around the world and will not impact supply to national governments in any way.”

*

My Take...

Pfizer employees around the world received “separate and distinct” COVID-19 mRNA Vaccine batches, from those Pfizer sold globally.

In Australia, Pfizer employees received “non-lethal” COVID-19 Vaccine batches: FF0884, FA4598, FE3064, FA7338, FA7812, FC8736, FC3558. These were “separate and distinct” from the other 420 batches Pfizer sold in Australia.

On a Jan.11, 2021, Pfizer issued a press release stating that 15,000 Pfizer employees across EU would get special vaccine batches:

“Vaccination of site-essential employees started this week at our manufacturing sites in Kalamazoo, Michigan, and Puurs, Belgium. We will expand to other Pfizer sites on a rolling basis. There are approximately 15,000 employees and contractors across Pfizer sites in the EU who are considered site-essential.

“The vaccine doses to be used for this program are separate and distinct from those

committed by Pfizer to governments around the world and will not impact supply to national governments in any way.”

What does this mean?

Pfizer claims its COVID-19 mRNA Vaccine is “safe and effective”, and this claim has been echoed by politicians, public health officials, doctors, influencers and media.

Based on this claim, millions of parents injected their children and infants as young as 6 months old and millions of pregnant women took the mRNA jabs (I have documented hundreds of children and pregnant women suffering injuries or deaths after COVID-19 Vaccination).

Yet Pfizer spent millions of dollars to create “separate and distinct” batches for its employees. Logically (and logistically) this makes no sense unless one of the following is true about the vaccines Pfizer manufactured for sale:

1. The vaccines are not safe for Pfizer employees
2. The vaccines are not effective for Pfizer employees
3. Pfizer doesn’t know if the vaccines are safe enough for Pfizer employees
4. Pfizer doesn’t know if the vaccines are effective enough for Pfizer employees

Which scenario is more likely?

When the vaccines rolled out, Pfizer was very certain of the efficacy:

[Nov.18, 2020](#): “Pfizer says COVID-19 shot 95% effective, seeking clearance soon”

Safety? Much less certain. “*The company didn’t disclose safety details*”

Logically, the most probable scenario is: either Pfizer knew the vaccines were not safe for its employees, or it wasn’t sure of the safety and was not willing to take a risk giving them to employees “*who are critical to the vaccine effort*”

Safe enough for your 6 month old. But not safe enough for a Pfizer employee. How many parents are going to sit down, and think about the implications of this?

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
