Dr. Jessica Rose has given another presentation based on her analysis of the CDC and FDA VAERS (Vaccine Adverse Event Reporting System) data.

Dr. Jessica Rose has a BSc in Applied Mathematics and completed her MSc in Immunology at Memorial University of Newfoundland in Canada. She completed her PhD in Computational Biology at Bar Ilan University and then did her first Post Doctorate at the Hebrew University of Jerusalem in Molecular Biology.

To date, she has compiled some of the best analysis of the VAERS data that I have seen this year. We have published some of her previous presentations: [STUDY: Government's Own Data Reveals that at Least 150,000 Probably DEAD in U.S. Following COVID-19 Vaccines, Study: Analysis of VAERS Shows the COVID Shots are Likely Cause of Deaths, Spontaneous Abortions, Cardiovascular, Neurological, and Immunological Adverse Events](#)

Total VAERS counts and death counts for the past decade

Atypical is an understatement...

She recently made a presentation to the World Council for Health, and her analysis of the data in VAERS revealed that in 2021 there has been a 5,427% increase in deaths following COVID-19 shots, and a 1,373% increase in adverse reactions following COVID-19 shots, as compared to all other vaccines given out for the past 10 years.

Comparison of cumulative AE counts from VAERS database normalized to FV population (FV_{pop} = 186,920,000 (OWID))*

~1/324 individuals (with two doses) report an AE in context of COVID-19 products

*As of October 8th, 2021

Another incredible statistic she found was that about one out of every 324 individuals receiving a COVID-19 shot has reported an adverse event.

In one of her previous analysis' she determined that the data in VAERS is under-reported by a factor of X42. This would mean that about one out of every 8 individuals receiving a COVID-19 shot is reporting an adverse reaction.

This is the kind of analysis on the VAERS data that the CDC and FDA are supposed to be doing, and then removing experimental products that are killing and harming so many people.

But as we have exposed so many times over the past decade, these federal agencies are very corrupt, and the people running them go on to take lucrative positions with large pharmaceutical companies. See:

[All 3 FDA-Authorized COVID-19 Vaccine Companies Employ Former FDA Commissioners](#)

Public health is not their concern, but profits for Big Pharma.

Her presentation is on our [Bitchute](#) and [Rumble](#) channels.
