TSA Officers Nigel Allen and Trenard Collier were reportedly in the middle of their duties at the airport, on April 11, 2023, when an airline pilot suddenly collapsed from cardiac arrest. ([click here](#))

"I looked over just as the pilot fell to the floor." ([click here](#))

The pilot reportedly approached a railing, staggered and fell down over his roller bags unconscious. The two TSA officers immediately came to the pilot's aid and Allen began performing first aid.

Police and firefighters arrived to perform CPR, but despite their efforts to resuscitate the pilot, the pilot's heart stopped, requiring "extended medical intervention," according to the TSA. ([click here](#))

Allen raced down the hall to grab an automated external defibrillator, which emergency responders were able to use to restart the pilot's heart and help revive him.

The pilot, who has not been identified, is recovering, and his family has expressed their appreciation for Allen's help.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
