'Pfizer Took My Career Away'

Tim McAdams, a 59-year-old pilot, health enthusiast, husband and father was content with his job training pilots for Airbus Helicopters — a job he held for over a decade — until Airbus mandated the COVID-19 vaccine for its employees.

Tim received his first Pfizer shot on Oct. 17, 2021, and the second on Nov. 7, 2021. Three weeks later he had two cerebellar strokes, a rare stroke in the cerebellum that accounts for only 1-4% of total strokes.

In the hospital, the McAdams asked the doctors repeatedly what could have caused this rare event, but "they always shrugged."

Soon after, Tim started suffering from repeated brain swelling, resulting in a craniectomy and over 80 days in the hospital.

He also had double pneumonia, lung failure, and vocal cord damage from a tracheotomy and feeding tube. Today, Tim is still working to recover from the injury he received, and is unable to fly due to the physical limitations he now suffers from.

Pilot Larry Talks About Pilots Having Problems Passing EKG Tests

This video is making the rounds on social media, however, I have not been able to verify the

exact identity of the pilot.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
