On his show today, Alex Jones read an email sent by a listener. "I work at the National Institutes of Health and we received an email about the upcoming International Swine Flu Conference that will be occurring in Washington, D.C. Aug 19 - Aug 21, 2009," the listener writes. "They're talking about mass fatality management and continuity of government. They're going to hit us with a massive biological false flag attack."

The email contains a [PDF](#) attachment of a brochure for the Swine Flu Conference. Breakout sessions detailed on the brochure include discussions on mass fatality planning, business continuity planning, and COOP or Continuity of Operations and Continuity of Government Planning. Additional sessions cover enforced quarantines, mass vaccinations, and how to "control and diffuse social unrest and public disorder." The brochure is also available for download on the [International Swine Flu Conference](#) website sponsored by ISFC New-Fields Exhibitions.

"Top leaders and key decision-makers of major companies representing a broad range of industries will meet with distinguished scientists, public health officials, law enforcers, first responders, and other experts to discuss pandemic prevention, preparedness, response and recovery at the 1st International Swine Flu Conference," the website announces.

The conference is further evidence the government plans to launch a false flag attack under the cover of an engineered H1N1 flu pandemic and impose martial law.

Prison Planet and Infowars have covered the story of a manufactured flu pandemic in detail, including:

On July 25, the [Los Angeles Times](#) reported the Centers for Disease Control and Prevention expects the flu pandemic expected this autumn to kill hundreds of thousands. “The number of potential deaths is much higher than that usually seen in seasonal flu, which kills an estimated 36,000 Americans a year, and is even higher than the nation’s most recent pandemic.” The 1957 pandemic of Asian flu killed 70,000. The 1918 Spanish Flu claimed between 500,000 to 675,000 lives in the United States.

The CDC has announced that it will no longer keep track of the number of people killed by the virus. “Health officials from the CDC said the virus was too widespread to continue counting,” the [Digital Journal](#) reported. “Health experts say millions have likely been infected worldwide.”

The U.S. government has bought 195 million doses of H1N1 swine flu vaccine for a possible autumn vaccination campaign, a U.S. federal official told [Reuters](#) on July 23. The U.S. Health and Human Services Department has also contracted for 120 million doses of adjuvant, a compound to stretch the number of doses of vaccine.

In late 2007, the Bush administration issued a “directive” establishing a “National Strategy for Public Health and Medical Preparedness” based on [Biodefense for the 21st Century](#). Prior to this, in May of 2007, the U.S. military had the foresight to “plan for a possible avian flu pandemic that could kill as many as three million people in the United States in as little as six weeks,” according to [Yahoo News](#). Guidelines and “planning assumptions for US military services and combatant commands” were published in a document entitled “Implementation Plan for Pandemic Influenza.”

“Possible scenarios include US troops being called in to put down riots, guard pharmaceutical plants and shipments, and help restrict the movement of people inside the country and across its borders,” Yahoo summarizes. “The plan envisions fast moving, catastrophic waves of disease that would overwhelm health facilities and cripple the ability of state and local authorities to provide even basic commodities or services.”

The “hidden agenda consists in using the threat of a pandemic and/or the plight of a natural disaster as a pretext to establish military rule” and “suspend Constitutional government and allow the Military to intervene in civilian affairs in violation of the Posse Comitatus Act,” author Michel Chossudovsky wrote in 2005.
