***Weight Loss Influencer Mila De Jesus Dead at 35 - The Brazilian mom of 4 rose to fame online after undergoing bariatric surgery in October 2017.***

- De Jesus' cause of death has "not yet been revealed". The content creator leaves behind four children and her husband George Kowszik, whom she married in September 2023.
- De Jesus — who was born in Brazil and lived in Boston, Massachusetts — rose to fame online after undergoing bariatric surgery in October 2017 and sharing her weight loss journey with her 59,000 Instagram followers.
- Her last health update came in November 2023, posting a before and after photo of her progress.
- "13 years between one picture... 6 years since a decision that changed my life in so many ways," she wrote at the time. "On one side Mila age 22 and on the other Mila age 35. How much we change huh, how we grow and how we learn. Pride girl pride ☺☺ [#beforeandafter](#)"
- De Jesus was also known for her popular makeup tutorials for her 103,000 [YouTube](#) subscribers.

[New York Post:](#)

- The Instagram star, who was born in Brazil but lived in Boston, passed away Friday, four months after tying the knot with her husband, George Kowszik, Jam Press reported.
- She leaves behind four children from a previous marriage.
- Just months prior, the content creator announced that she'd been suffering from psoriasis — a skin [disease](#) that causes a rash with itchy, scaly patches — since July.
- "It's been three months dealing with this situation, 80% of my body is affected," De Jesus wrote in an October Instagram post to [her nearly 60,000 followers](#). "Juggling doctors, medications, ointments, and taking a deep breath."
- The influencer's followers, friends and family members were devastated over her loss.

### **Psoriasis After COVID-19 mRNA Vaccination - Cases Published in Peer-reviewed Journals**

[2022 Oct \(Tachibana et al\)](#) - Japan - Pfizer Two cases of generalized pustular psoriasis after Pfizer COVID-19 mRNA Vaccine. (a-d) Case 1: 60 year old woman 8 days after 2nd mRNA; (e-h) Case 2: 18 year old woman 7 days after 1st mRNA.

## Flare-up of generalized pustular psoriasis following Pfizer-BioNTech BNT162b2 mRNA COVID-19 vaccine: Two cases without mutations of *IL36RN* and *CARD14* genes

Kota Tachibana ✉, Yoshio Kawakami, Mayu Tokuda, Shiho Sato, Satoru Sugihara, Tomoko Miyake, Kazumitsu Sugiura, Shin Morizane

First published: 13 May 2022 | <https://doi.org/10.1111/1346-8138.16442> | Citations: 4

Case 1 was a 60-year-old woman who was admitted due to fatigue and diffuse erythema 8 days after the second dose of Pfizer mRNA COVID-19 vaccine. She was

Case 2 was an 18-year-old woman who was admitted with high fever and skin rash 7 days after the first Pfizer mRNA COVID-19 vaccine dose. Her mother had PsV. The patient was diagnosed with PsV at 5 years old. She had been treated with

[2022 Apr - \(Frioui et al\)](#) - A case of new-onset acute generalized pustular psoriasis following Pfizer-BioNTech COVID-19 vaccine.

- A 20-year-old man presented to the emergency department with a 3-week history of an acute, rapidly progressive erythematous rash associated with fever, and poor general condition. The patient had a history of mild plaque psoriasis adequately controlled with topical betamethasone.
- The first dose of mRNA-CV was given 4 days before the onset of the rash

[2022 Mar - \(Tran et al\)](#) - Generalized erythrodermic psoriasis triggered by vaccination against severe acute respiratory syndrome Coronavirus 2.

- Two people had 1st dose Moderna and 2nd dose Pfizer, then developed “Generalized erythrodermic psoriasis” - a rare and potentially life threatening variant of psoriasis.

[2022 Feb - \(Nia et al\)](#) - Erythrodermic psoriasis eruption associated with SARS-CoV-2 vaccination.

- 58-year-old male presented to the hospital for 6 days of generalized rash covering his body with partial sparing of the medial thighs and feet.
- It started a day after he received the Pfizer COVID-19 mRNA vaccine

[2021 Dec \(Huang et al\)](#) - Exacerbation of Psoriasis Following COVID-19 Vaccination: Report From a Single Center.

- 68 yo man had psoriasis exacerbation 14 days after Moderna mRNA vaccine.

**A****B****C****D**

[2021 Aug \(Bostan et al\)](#) - Exacerbation of plaque psoriasis after inactivated and BNT162b2 mRNA COVID-19 vaccines: A report of two cases.

- Case 1: 51 yo man diagnosed with psoriasis 1 year ago, had 1st Pfizer mRNA jab and his lesions started to enlarge and then accelerated 2 weeks after 2nd dose.
- Case 2: 52 yo man had Coronavac (inactivated SARS-CoV-2 vaccine, China), 1 month after 2nd dose presented with skin rash on buttocks.

[2021 Aug \(Sotiriou et al\)](#) – Psoriasis exacerbation after COVID-19 vaccination: a report of 14 cases from a single centre

- 14 Greek patients presented to a single ER from Jan.1, 2021 to May 10, 2021 after taking COVID-19 vaccines and were diagnosed with Psoriasis.
- 5 had Pfizer, 7 had AstraZeneca, 1 had Moderna

Table 1

Patient demographics, vaccination details and psoriasis flare details

	Sex	Age	Vacc	Dose	Days	PASI	Pstype	Nails	Treatment
1	F	69	AZ	2	8	10.2	Plaque	Yes	PUVA
2	F	82	Moderna	2	10	6.7	Plaque	No	Calcip/betam
3	F	62	Pfizer	2	6	5.4	Plaque	No	Calcip/betam
4	M	73	Pfizer	2	7	8.2	Plaque	No	Calcip/betam
5	M	66	AZ	1	22	14.4	Plaque	Yes	Risankizumab

F, female; M, male; Vacc, vaccine type; AZ, AstraZeneca-Oxford AZD1222; Moderna, Moderna mRNA-1273; Pfizer, Pfizer mRNA BNT162b2; Dose, number of doses after which psoriasis flare occurred; PASI, Psoriasis Area and Severity Index score at presentation in our department following the psoriasis flare; Pstype, psoriasis type; Nails, Presence of nail psoriasis; Calcip/betam, topical calcipotriol/betamethasone combination.

## [2022 Sep \(Wu et al\)](#) - New Onset and Exacerbations of Psoriasis Following COVID-19 Vaccines: A Systematic Review.

A systematic literature search was conducted

7 studies reporting new-onset psoriasis, 32 studies reporting psoriasis flares, and 4 studies reporting both

mRNA vaccines, produced by Moderna and BioNTech/Pfizer, were frequently associated with psoriasis episodes.

First, second, and third vaccine doses were associated with psoriasis incidents, with the second dose most frequently associated with psoriasis flares.

Delayed onset was observed, ranging from 2 to 21 days in the new-onset group and from 1 to 90 days in the flare group

### **My Take...**

COVID-19 mRNA Vaccines can cause a wide variety of autoimmune diseases and the sudden

development of any autoimmune disease in an mRNA Vaccinated person should implicate the vaccine.

The tragic case of Brazilian Influencer Mila De Jesus is important because it shows that a sudden onset of an autoimmune disease in a COVID-19 Vaccinated person is a very bad sign – it signals other kinds of internal damage as well.

In her case, she had a sudden cardiac arrest, most likely from cardiac damage in addition to her new onset psoriasis which she was diagnosed with a few months prior to her death, and went on to involve 80% of her body.

UPDATE: WHO VigiAccess database shows 4955 reports of Psoriasis after COVID-19 vaccination as of Jan. 22, 2024.

## **The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*

## Reviews

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon*

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia*

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig*

*Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac*

*A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. —Edward Curtin*
