Climate engineering is a completely runaway juggernaut of total insanity. The planet's climate system is unraveling by the day as the geoengineers try frantically to control it with ever more desperate and destructive measures ([which were a primary cause of the climate disintegration in the first place](#)). As the photograph below clearly shows, powerful radio frequency transmissions have a profound effect on clouds that have been aerosolized by the jet aircraft spraying of toxic electrically conductive heavy metals.

RF transmissions over the Prince Edward Islands can be seen in the image below.

The following image is from the Eastern Pacific, June 26, 2015. The 90 degree angle cut out of the aerosolized cloud cover is a signature of RF influence.

After over 65 years of climate “intervention”, very real damage has been done to the Earth’s life support systems (along with countless other forms of anthropogenic destruction to the biosphere). The climate engineers are now appear to be attempting to use the very same intervention methods which caused the damage in the first place, to mitigate the harm already done. There is no sanity in this equation. The visible RF influence in the noctilucent cloud image below indicates probable [evidence of project “LUCY” and project “ALAMO” at work](#). The ongoing [radio frequency saturation in our atmosphere is extremely harmful to living organisms, including us](#).

The 2 minute video below is an excellent capture of RF manipulation on weather systems, it is shocking and well worth the time to view.

If we are to have any chance whatsoever of salvaging the planet’s life support systems, climate engineering must be exposed and halted. Make you voice heard.
