## Executive Summary

[Rasmussen Reports](#) has just released yet another [devastating survey about the COVID vaccine](#).

Their [latest survey](#), released at 10:30am EST on November 2, confirms (yet again) that the COVID vaccine is a train wreck, the biggest healthcare disaster in our lifetime.

The key conclusions:

1. **47%** personally know someone who was killed by the COVID virus
2. **24%** personally know someone who was killed by the COVID vaccine.
3. **42%** said it was somewhat likely or very likely they would **join a major class-action lawsuit against pharmaceutical companies for vaccine side effects**. That would make it the largest class action in US history by a long shot.

The implications are stunning:

1. **56% of people who got vaccinated are or were vaccine injured in some way**. This is because 42% want to sue but only 75% were vaccinated. So  $42/75=56\%$ . That is unprecedented; a complete train wreck for a vaccine that was touted as "safe and effective."
2. If you believe 1M people died from COVID, **then this poll suggests that 500K people died from the COVID vaccine** (computed as  $24/47 \times 1.1M$  killed from COVID virus using the two numbers above from the survey).

When the [911 terrorist attacks killed almost 3,000 people](#), it was major news. When the US government kills 500,000 Americans, there are no headlines and no investigations. This is the biggest story in America today.

Bottom line: Heads should roll. Now. Let the finger-pointing begin!

## Introduction

Earlier this year, I suggested to Rasmussen that it might be interesting to take a second look at COVID vaccine injuries.

They did.

Why? Because they are one of the few honest polling firms in the US. Nobody else wants to know about vaccine injuries and deaths. Fact check that one.

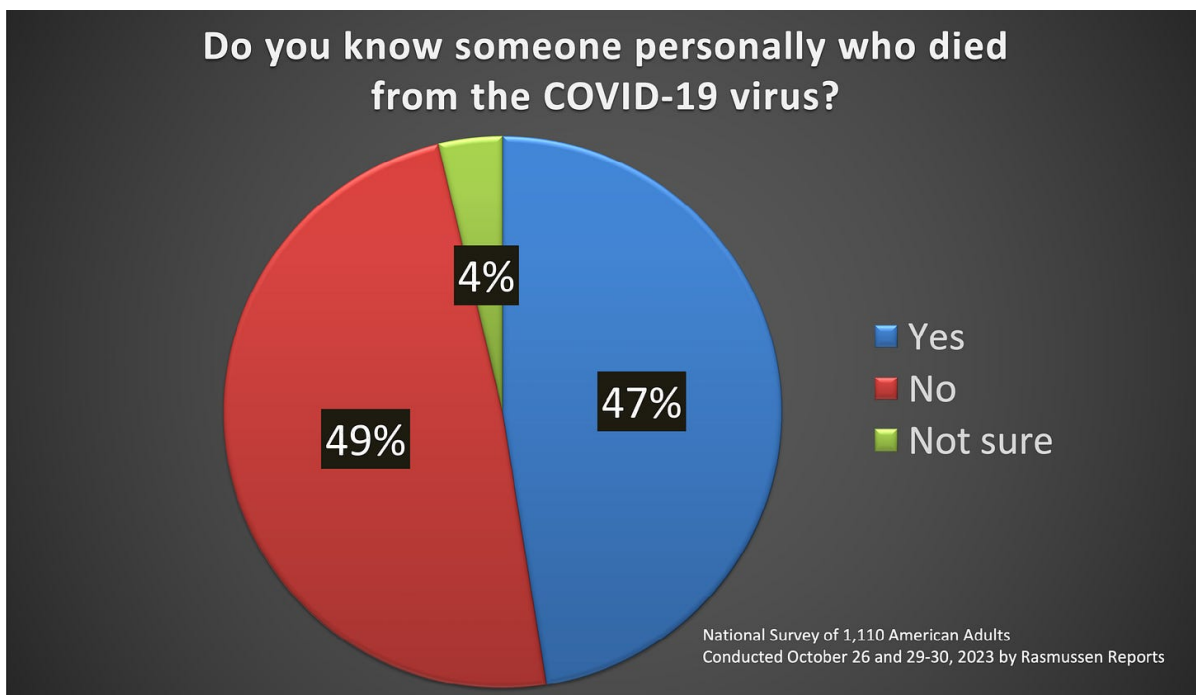

And the results are stunning as you'll see below.

## Survey Result Data

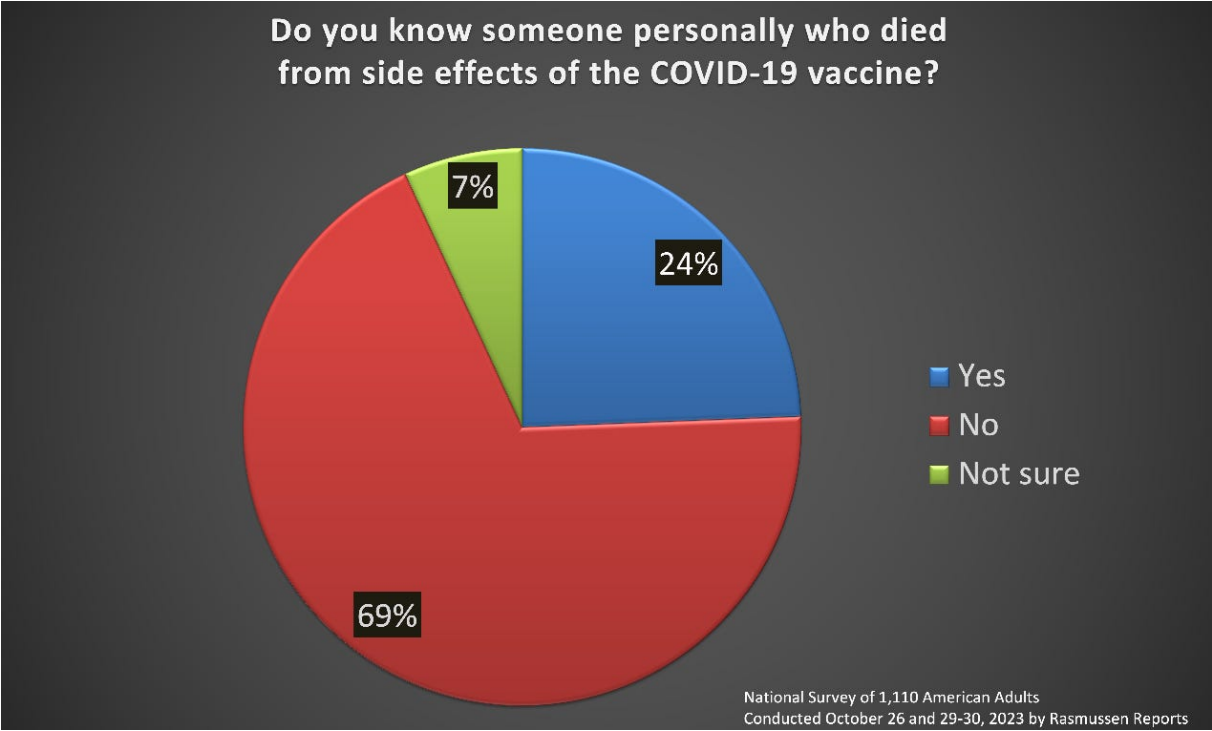

The full results ([Excel spreadsheet](#) which includes cross-tabs)

Note how the answers are very consistent regardless of demographic (scroll horizontally).

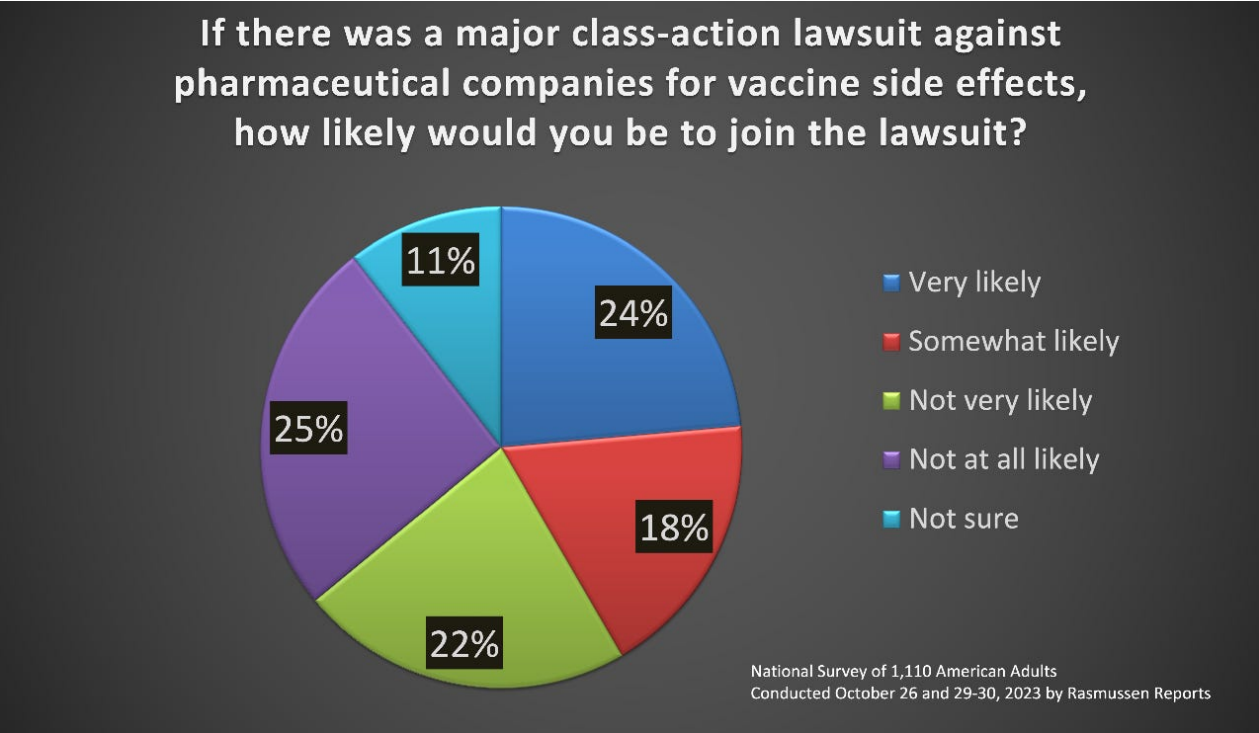

## Charts

Nearly half the people surveyed knew someone who died from the COVID virus

24% knew someone who died from the vaccine. Vax deaths are more often reported by unvaccinated people (only about 30% of vaccinated people are able to recognize a “vaccine death”). So if everyone was equally aware of these deaths, the numbers would be over 50% which is comparable to the number of deaths from COVID.

This is stunning. 42% were likely to join a class action lawsuit. This is a train wreck. This would be the biggest class action in US history. How can this happen with a vaccine that people were brainwashed into believing was safe and effective?

**Implication to Pfizer and Moderna Stock**

I think this is more likely than not to eventually cause Moderna stock to crater.

The #1 reason: 42% want to sue the drug companies if they could. It would be the largest class action in US history. But Congress, whose job it is to protect the drug companies, forbids it. But [Aaron Siri believes he can unravel the protection and has filed a lawsuit to make that happen](#). Siri doesn't waste his time on cases he cannot win.

Here's is a summary of the reasons:

**Steve Kirsch** @stkirsch · 10h

If someone you **trusted** highly recommended that you buy a product and you later found out that there's a class action lawsuit brought by 50% of the buyers of the product, would you still buy the product?

Yes	2.3%
No	88.1%
Just want to see answer	9.6%

1,135 votes · 13 hours left

13 replies · 30 retweets · 44 likes · 9.5K views

Class action lawsuit is a stronger influencer than trust

**Steve Kirsch** @stkirsch · 3h

Do you know **someone personally who died** from side effects of the **COVID-19 vaccine**?

Yes	59%
No	41%

2,500 votes · 20 hours left

82 replies · 71 retweets · 92 likes · 16K views

This is likely much closer to the truth

Steve Kirsch  @stkirsch · 4h

Promote ...

If you got the COVID shot, did you sustain an injury that required professional medical attention?

1,017 votes · 19 hours left

22 25 35 7.4K

36% of people who got a shot were injured! This aligns closely with the 42% who would join an injury lawsuit in the Rasmussen poll.

And apparently I am not alone in thinking that Moderna stock is headed downward:

Steve Kirsch  @stkirsch · 10m

Promote ...

Do you think Moderna stock will be higher or lower in 30 days from now?

259 votes · 23 hours left

2 2 5 155

X follower opinion on where Moderna is heading

Therefore, I have established a large short position on Moderna stock because I believe in putting my money where my mouth is, i.e., where I lose if I got it wrong.

And I dare anyone to invest a large sum in Moderna now. Who would with 42% of your customers livid about the product.

Financial markets have a way of exposing the truth, don't they? **All you have to do is look at Moderna's stock price to determine whether the Rasmussen poll is reflecting the truth or not.**

The very sad reality is much worse than Rasmussen's poll indicates because around half the respondents couldn't see a vaccine injury even if it hit them in their own family just like it

did to Congressman Sean Casten whose 17 year old daughter Gwen tragically died unexpectedly in a manner 100% consistent with a vaccine death. See [this article](#) and [this article](#). Did they ever rule out the COVID vaccine in Gwen's death. No. They didn't even test for it. They didn't want to know. Why don't they want to know? They urged their daughter to take the vaccine that killed her. They wouldn't be able to live with themselves if they learned the truth. **So they didn't look.**

Even worse, I called Sean Casten's office to find out the date Gwen was last vaccinated in order to expose the truth so the speculation would be over.

**They said it was "Confidential."** Really? Why is that??? If she wanted to go to a restaurant, she'd have to show her vaccine card.

Why is it suddenly confidential now after her death??

## The Last Survey

This is from Rasmussen's earlier survey which was nearly 1 year ago. Do you see how the results match up?

A good scientific study produces repeatable results. And that's exactly what we have here. A repeatable result.

The inescapable conclusion is of course that the vaccine killed at least half as many people as COVID did.

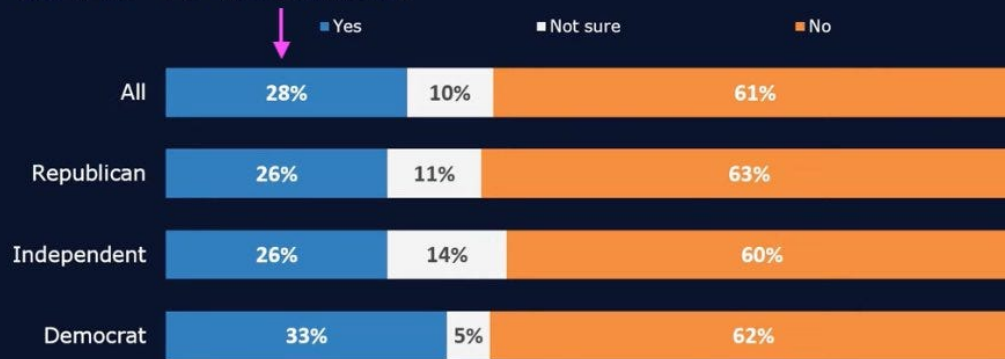

Which means the COVID vaccines have killed at least 500,000 Americans if you accept the 1M dead from COVID. Meanwhile the CDC still thinks only 9 people or so have been killed by the mRNA vaccines.

But the alternate math is that over half actually know someone who died from the vaccine, but only around half know how to spot a vaccine death (and it is near 0 if you are a member of the press writing about a death). So that means that vaccine deaths are at least comparable to COVID deaths. But COVID deaths were inflated by at least 2X (because hospitals got paid when they reported a COVID death because the government was trying to encourage hospitals to kill people so they labeled everything they could a COVID death to maximize revenue). So we're realistically looking at around 500,000 deaths caused by the vaccine if we put on our red pill glasses.

If that is true, how can these results be so consistent one year later with a completely different population sample?

Someone is lying to you. But the mainstream media and medical community do not care to know who is telling the truth. They basically follow whatever the CDC says, even though it is disconnected from reality and even though the CDC refuses to allow anyone to challenge them. When I tried, I got ghosted very quickly.

## Do you personally know anyone whose death you think may have been caused by side effects of COVID-19 vaccines?

Survey of 1,000 American Adults conducted December 28-30, 2022  
by Rasmussen Reports, MOE +/- 3%

This is from almost a year ago. Compare with the current results. They are very close. It means that around 500,000 people were killed by the vaccine.

### Limitations of the Survey

75% of the public is vaccinated. Vaccinated people are relatively poor in assessing vaccine deaths. The 25% figure is thus under-reported and it is more likely that the vaccines have killed at least as many people as COVID if not more.

### How Credible Is the Study?

Very. The 25% matches the 28% polled nearly 1 year ago. So the results are repeatable.

The poll is subject to the ability of people to assess a vaccine injury or death which means it undercounts vaccine injury.

## **The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*

### **Reviews**

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —**Dr. Mike Yeadon***

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —**Dr. Emanuel Garcia***

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —**Peter Koenig***

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —**David Skripac***

*A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom*

*loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin*
