KJ Hamler looks on from the sideline during a preseason NFL game against the Minnesota Vikings at Empower Field at Mile High on August 27, 2022 in Denver.

[KJ Hamler](#) announced [on his Instagram account](#) he has been diagnosed with a “mild heart irritation, called pericarditis.” He said he would miss some time but intended to be back on the field this season after treatment with medication.

The Broncos waived Hamler with a non-football illness designation on Monday. Sources told ESPN the move was made to let him undergo treatment and potentially bring him back later if he is cleared.

Hamler said in his Instagram post he had experienced chest pains during workouts before training camp began.

kj\_hamler1 After feeling some chest pains while working out on the break before camp started, I got everything checked out and was diagnosed with mild heart irritation, called pericarditis. I've got a great treatment plan with medicine and am taking a quick break to get this all taken care of so I can get back to doing what I love.

I will be back on the field—better and stronger than ever—as soon as possible this season! I feel great physically and this is very frustrating for me to deal with. I know most of you have heard or know of my story and these past few years what I've been going through on and off the field.

## Browns' Marquise Goodwin suffering from 'alarming' blood clots in legs, lungs

By Miles Schachner

July 21, 2023 | 7:29pm | Updated

Veteran Browns wide receiver Marquise Goodwin has blood clots in his legs and lungs, the team announced Friday.

Goodwin, 32, was placed on the non-football illness list last Friday after feeling discomfort in his legs and shortness of breath during team workouts this spring.

Goodwin, 32, was placed on the non-football illness list last Friday after feeling discomfort in his legs and shortness of breath during team workouts this spring.

The blood clots will force the receiver, who is entering his 10th season in the NFL, to miss the start of training camp, the Browns said. "It was really alarming at first because I've experienced injury throughout my career, but it's never been anything like this that could turn into something detrimental if it's not taken care of," he told the team website.

"It was frightening at first, but now I'm at ease with it. I've prayed and just given it over to God.

Goodwin doesn't know when he will be able to get on the field again.

July 29/30, 2023 - Four bizarre retirements from NFL announced within 24 hours: ages 23, 25, 27 and 28. No explanations given for any of them!

## 'REALLY HURTS' Ex-Premier League youngster forced to RETIRE aged just 22 after being diagnosed with heart condition

dendonckerlars • Follow

dendonckerlars 1w

Hi everyone  
Where do I start.

As a child, I only had one dream. Become a professional football player. But my professional career and dream has come to a very early end. Because of my heart condition, I have decided to stop playing because of my own health. This was and will be the hardest decision ever in my life. But there is no going back and I have to look in the future. This will take time to process.

I've learned a lot throughout the years and had to sacrifice a lot. So this really hurts.

11 years at the academy of Club Bruges where I made a lot of friends. 2 beautiful years with Brighton and a loan move to St. Ives where I made my

July 10, 2023 - 23 year old Noah Fadiga, a Senegal player in French Ligue 1 Club Brest, had his contract terminated over "irregular heartbeat". He also had his license to play soccer in France revoked and must look outside of France to continue his career ([click here](#)).

## NOAH FADIGA'S BREST CONTRACT TERMINATED OVER HEART PROBLEMS

July 10, 2023

Senegal international right-back Noah Fadiga has [announced](#) this afternoon on his Instagram page that he has been released by Brest over an "irregular heartbeat" that was detected in the medical tests that the squad underwent at the end of the season.

The Club Brugge academy product indicates that he later had further tests with cardiologist Pedro Brugada, who gave him the green light to continue his professional football career.

However, Fadiga indicates that his French FA license has now been revoked as a result of the federation's zero-tolerance policy on cardiac issues. As a result, he is now a free agent, but points out that he is determined to continue his career elsewhere – he will now have to find a club outside of French football.

French soccer authorities apparently have a “zero tolerance policy on cardiac issues” which is wildly ironic.

July 4, 2023 – 22 year old Luca Beckenbauer, grandson of professional German soccer player Franz Beckenbauer, was forced into retirement due to “heart condition” allegedly caused by COVID-19 (much more likely caused by COVID-19 vaccination).

# Franz Beckenbauer's grandson left football, just 22 years old, due to illness

Luca Beckenbauer, Franz's grandson.

**Young Luca will no longer be able to play due to a heart condition. Now, he will dedicate himself to studies.**

07/04/2023 09:36 am.

**L**uca Beckenbauer, grandson of the talented German midfielder **Franz Beckenbauer**, he had everything to continue his grandfather's legacy leaving the last name at the top of German football. However, unfortunately we will never know if Luca had triumphed in the European elite, since **at 22 he was forced to leave his career due to illness** who has marginalized him from the playing field several months ago.

---

The problem that will leave Beckenbauer out of the elite **was born in late 2022, after an intense painting by Covid. This heart condition** He has forced him to stay away from the lawn since November 5, 2022, the date from which he has barely played a single match.

---

Jan. 15, 2023 - 25 year old soccer player Enock Mwepu was forced to retire from Premier League Brighton Club after suffering a suspected heart attack while driving!

## Enock Mwepu: Former Brighton midfielder in hospital after falling ill

15 January 2023 | Brighton

Mwepu retired from playing last year aged 24 because of a hereditary heart condition

**Ex-Brighton midfielder Enock Mwepu is in hospital in Zambia after falling unwell, his former club says.**

The 25-year-old was **forced to retire** from football in October because of a hereditary heart condition.

**Reports in his native Zambia** said he had suffered a suspected heart attack on Sunday while driving and was seen to fall after parking his car.

Jan. 12, 2023 – German professional soccer player Marcel Scheifl has been disabled since COVID-19 vaccination and has been fighting for a normal life for 1.5 years ([click here](#)).

Marcel Scheifl ( re. ) played as a defender at TSG 08 Roth Fußball - he is currently not thinking of sport.

---

**ROTH** - From a fit hobby athlete to a disabled person within one month: Marcel Scheifl from TSG 08 Roth suffers from "Post-Vaccine syndrome". He has been fighting for a normal life for a year and a half - and the recognition of this disease.

---

## My Take...

Mainstream media is not covering these stories, which is not surprising.

These are serious injuries that are ending the careers of athletes in their 20s - once again we see injuries typical of COVID-19 vaccination such as myocarditis, pericarditis, unspecified "heart conditions", arrhythmias and of course blood clots.

I believe there is a logical reason why the COVID-19 vaccine injured, including professional athletes, are treated so horribly.

The COVID-19 vaccine "died suddenly" individuals offer a crime scene that can be easily scrubbed and then forgotten. If an autopsy is done, an "indeterminate" result is acceptable or the cause of death is blamed on something else and everyone moves on. The "vaccine crime" can be wiped clean.

The COVID-19 vaccine injured, however, present a crime scene that cannot be scrubbed. Their untreatable injury is a constant reminder of the crimes committed by their doctors, employers, in this case sports officials, and more broadly speaking politicians, judges and health leaders.

The COVID-19 vaccine injured ARE evidence of crimes that cannot be scrubbed and won't go away quietly. They are the open crime scene that constantly points at the perpetrators of

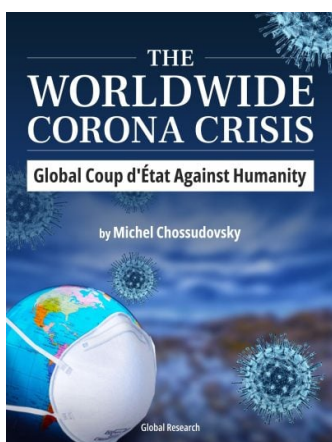

the crimes who are trying to avoid consequences.

This may explain, in part, the behavior of French soccer authorities and their “zero tolerance policy” regarding heart injuries they themselves caused and are legally liable for.

## The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
