Robert F. Kennedy, Jr. and Dafna Tachover, Director of 5G and Wireless Harms Project of [Children's Health Defense](#) (CHD), signed onto the UK [EM Radiation Research Trust](#) (RRT) letter calling on UK **Prime Minister Boris Johnson** and political leaders to protect the public from the proven harms of wireless radiation and 5G.

The [Open Letter of Complaint](#) was written in response to an article published by [First News](#) in their children's online newspaper titled "[There is no 5G Conspiracy](#)", claiming 5G is absolutely safe. RRT, which is a trusted and leading UK group dedicated to education about wireless radiation health effects, has been receiving emails and phone calls from parents, school children and teachers asking RRT to respond to the article.

The letter was written by RRT's Chairwoman, Eileen O'Connor, and the group's US based advisor, Susan Foster, and responds to the unsubstantiated and false claims by *First News* of the absolute safety of 5G. The letter provides ample scientific evidence of proven harms by wireless radiation and addresses how Big Telecom is defrauding the public.

"The RRT believes that it is one thing to comfort children with respect to the lockdown and the corona virus," said Ms. O'Conner, "but not at the cost of the truth about the very real harms from these dangerous exposures."

Since 5G infrastructure is based primarily on 4G, and on pulsed and modulated radio and microwave frequencies that have been proven harmful in thousands of studies, harms that have been confirmed by courts around the world, there is no doubt that 5G is harmful as well.

"Children need to be told the truth: cell phones and cell towers emit radiation," commented Ms. Foster. "It is ludicrous and shameful to tell children that a great deal of research has been done to prove 5G safe when decades of science on the biological effects of electromagnetic radiation have proven it harmful."

RFK, Jr., Dafna Tachover and CHD are calling for the protection of those who have already been harmed by wireless technology radiation, including many children, and for the prevention of further and imminent harm by halting 5G deployment.

5G deployment is exponentially increasing our exposure to this harmful radiation and technology. Of special concern is the installation of cell phones antennas in close proximity to people's homes and children's bedrooms. As a result, growing numbers of countries and

municipalities around the world have banned the deployment of 5G.

Children's Health Defense joined this effort as it is aligned with the organization's mission to protect children from environmental toxins. 5G and wireless radiation constitute toxins which are significantly involved in the increase of sickness in children. Sadly, in the UK, a 15 y/o girl, [Jenny Fry committed suicide](#) after becoming sick from wireless and as a result of the mistreatment she has experienced because of her sickness.

RFK, Jr., Dafna Tachover and CHD are calling for the protection of those who have already been harmed by wireless technology radiation including many children, and for the prevention of further and imminent harm by halting 5G deployment.
