

“Scenarios” of Sudden Disasters for Mankind: ‘Are the London Olympics a target for a False-Flag Attack?’

“The two fundamental elements for a successful Strategy are: Secrecy and Surprise!”, Juan Domingo Perón, Argentine President

It might be wise to take a closer look at some unnerving indications that the London Olympics might be the stage for a horrific “False Flag” attack, as part of the Global Power Master’s strategic need to break their present global political and economic deadlock.

“False Flag” attacks happen when a militarily strong Nation stages a controlled and very high profile military or terror attack on its own territory and interests, then immediately blaming it on a target foreign power or entity, using it as an excuse to wage war.

Such events carry their tell-tale signs; their “stigmata” so to speak because, when planned, they must include some sort of “communication or cueing mechanism” so that those in the know can make sure neither they, nor their associates, nor loved ones should happen to be in “the wrong place at the wrong time”.

Is something along these lines on Global Power Master drawing boards for the up-coming London Olympics? The question would surely sound ludicrous, were it not for a May 2010 Report issued by The Rockefeller Foundation (RF) and Global Business Network (GBN) that “predicts” exactly that.

Called “***Scenarios for the Future of Technology and International Development***”, it carries introductions by Rockefeller Foundation president Judith Rodin and GBN chairman Peter Schwartz, both members of the powerful New York-based Council on Foreign Relations (CFR) think-tank, a key geopolitical planning node of the Global Power structure embedded deep inside the US.

The Report defines its purpose in rather nondescript terms: “*The Rockefeller Foundation and GBN began the scenario process by surfacing a host of driving forces that would affect the future of technology and international development. These forces were generated through both secondary research and in-depth interviews with Foundation staff, Foundation grantees, and external experts*”.

Then, they go on to define “the matrix of four very different futures” in store for Mankind:

“(1) Lock-Step: a world of tighter top-down government control and more authoritarian leadership, with limited innovation and growing citizen pushback” (you can almost see them watering at the mouth over this one!).

“(2) Clever Together: A world in which highly coordinated and successful strategies emerge for addressing both urgent and entrenched worldwide issues” (definitely no sign whatsoever that today’s power brokers are doing anything even remotely leading to that!)

“(3) Hack Attack: An economically unstable and shock-prone world in which governments weaken, criminals thrive, and dangerous innovations emerge” (more slurpy Power Elite mouth watering with this one!), and,

“(4) Smart Scramble: An economically depressed world in which individuals and communities develop localized, makeshift solutions to a growing set of problems” (and where the powerless suffer and die, whilst the powerful go into high-tech-security ‘business as usual’ mode...)

When detailing Scenario 3 (Hack Attack), we find the following surprising “scenario building” in this Report: *“Devastating shocks like September 11, the Southeast Asian tsunami of 2004, and the 2010 Haiti earthquake had certainly primed the world for sudden disasters.*

But no one was prepared for a world in which large-scale catastrophes would occur with such breathtaking frequency. The years 2010 to 2020 were dubbed the “doom decade” for good reason: the 2012 Olympic bombing which killed 13,000, was followed closely by an earthquake in Indonesia killing 40,000, a tsunami that almost wiped out Nicaragua, and the onset of the West China Famine, caused by a once-in-a-millennium drought linked to climate change.”

“The 2012 Olympic bombing, which killed 13,000”!?!? What a “scenario”!! ...followed by three “natural” disasters” that can probably be artificially triggered by covert technologies such as HAARP and others...

Now, God forbid: but were such a scenario to come true as Rockefeller envisions, it will of course be blamed by the Western governments and its obedient media PsyWar on a grand global “conspiracy” spearheaded by Iran, seconded by Syria, Pakistan and North Korea, applauded by Venezuela, Cuba, facilitated by the Occupy Wall Street, Indignado and Assange movements, and abetted by Russia and China.

A conspiracy to end all conspiracies! ...and a hell of an excuse to “smoke them all out”, unleashing the Dogs of War barking in the nervous arsenals of the US, UK, EU and Israel, whilst clamping down on protesters everywhere. It would allow launching a revamped “Global War on Terrorism”, Version 4.1.

The Rockefeller Report then adds, *“Not surprisingly, this opening series of deadly asynchronous catastrophes (there were more) put enormous pressure on an already overstressed global economy that had entered the decade still in recession... Most nation-states could no longer afford their locked-in costs, let alone respond to increased citizen demands for more security, more healthcare coverage, more social programs and services,*

and more infrastructure repair....”

Wow!! Sounds an awful lot like the world the Global Power Masters are already building and imposing on all of us everywhere!

False Flag events require highly complex, covert and labyrinth-like mega-engineering, absolute secrecy and surprise, and solid buffers isolating the on-going government authorities, whose “total innocence” must be fully safeguarded and believable.

Presidents and ministers must be able to go live on radio and TV exclaiming with indignation that their country is a victim of “a day that will live in infamy!”, or maybe stand atop the rubble of collapsed towers and yell, megaphone in hand, “The people that did this will hear from us soon!”.

Yet, make no mistake: those who perpetrate false flags know that – in the long run – the truth comes out. The point here is to make sure that “the long run” is really very, very long. That when global public opinion finally learns the truth, 60, 80, 100 years down the road, the issue is no longer “political”, but rather a mere historical curiosity.

Whether it’s the sinking of the USS Maine in Cuba which served the US to make war on Spain in 1898, or the sinking of the Lusitania in 1915 which dragged the US into World War I, or Pearl Harbor in 1941 which (again!) dragged America into World War II, or the (non-sinking!) of the USS Maddox in the Gulf of Tonkin in ’64, or the USS Liberty in ’67... Just make sure the truth comes out generations later when nobody really cares anymore.

Problems however, started piling up on the Global Power Elite when glaring inconsistencies began surfacing over September 11th and July 5th in London, whilst they are still very political events, and definitely not yet “history”.

That’s when lots and lots of political “damage control” has to be brought to bear, with the entailing political cost.

Have the Global Power Masters learned from past mistakes and perfected their military, political and psychological warfare mechanisms?

Are they in such dire straits that they need to pull a really big one like this on the world, as a means of “escaping forwards”?

Let’s hope it won’t be London... But anyway, let’s stay alert...!
