*In an email to FDA officials, Pfizer executives and media, **Dr. Hooman Noorhashm** warns many more will die needlessly from COVID vaccines “if we carelessly and indiscriminately” vaccinate people already infected with the virus.*

*

From CHD’s editor: Following the March 19 death of 32-year-old [Benjamin G. Goodman](#) after receiving the [Johnson & Johnson](#) COVID vaccine, [Dr. Hooman Noorhashm](#) wrote the email below. In it, Noorhashm warns of the “clear and present danger” posed by administering [COVID vaccines](#) to [people already infected](#) with the virus.

The email is addressed to [Dr. Janet Woodcock](#), acting commissioner of the U.S. Food and Drug Administration (FDA), but Noorhashm copied others, including the FDA’s Peter Marks, several [Pfizer](#) executives, reporters at CBS News, Fox News and The New York Times, and other scientists and colleagues.

This is not the first time Noorhashm has [written to the FDA](#) recommending that people be [screened for COVID](#) before being vaccinated — in fact, it’s the third. He has yet to receive a response.

Here’s the text of Dr. Noorhashm’s email

Dear Dr. Woodcock,

Here I am writing to report to you the death of Mr. Benjamin G. Goodman of NY within a day following vaccination with the J&J COVID-19 vaccine.

[This is his obituary](#). He was 32 and otherwise healthy:

Attached, you may read his mother’s Facebook posting about his death.

Dr. Woodcock, it is untenable for you and your colleagues to be ignoring these deaths and vaccine complications without lifting a finger to do anything — simply this: These complications are mounting and CDC and FDA’s surveillance systems are missing the signal — the signal is deafening on social media!

And these are NOT Russian bots infiltrating our SM platforms, these are Americans being harmed and ignored ... by YOU and our public health system.

As an immunologist, I know that these vaccines are some of the most powerful and effective we’ve ever made. I know them, I understand them and I know that we need them to achieve [herd immunity](#).

But, as [I’ve told you before](#), we are deploying this defensive weapon wildly indiscriminately in the midst of a pandemic outbreak, while many are “the recently infected.” It is my professional opinion as an immunologist and physician that this indiscriminate vaccination is a clear and present danger to a subset of the already infected.

I know fully well that it is highly likely that many more lives will be saved from these vaccines than harmed by them in this pandemic. But THAT is no justification for relinquishing your duty as a chief public health officer in the U.S. to guard and defend the safety of this minority subset in harm’s way from indiscriminate vaccination.

So now you have a few names ... “Anecdotes,” our colleagues call them ... “N’s of 1,” know only too well ... [J. Barton Williams](#), [Kassidi Lyn Kurill](#), Benjamin G. Goodman, Marvin Hagler, [Hank Aaron](#), Larry King ... there will be many more, at the rate we are going.

But the press and all your colleagues in public health are inclined to see these as “unrelated” to our savior vaccines.

I write here, knowing that efficacy and safety are two distinct and equally critical parameters in medical care — and knowing that you all are sacrificing the latter to the former.

But you cannot go on like this — you must see Benjamin Goodman, J. Barton Williams, Kassidi Lyn Kurill, Marvin Hagler, Hank Aaron, Larry King ...

There will be many more in the coming months as we carelessly and indiscriminately vaccinate the already infected, millions a day ... It is a near certainty.

Pamela A. Everett-Goodman

Dear friends, there is nothing that can bring our son Ben back. Jeff, Hatesha, Carson and I cannot let the truth of what happened to Ben pass with any of you thinking he had some type of underlying health problems that caused his death. He didn't. Ben just celebrated his 32nd birthday, was working full time, golfing, traveling and living the best life he could in NYC. Ben knew our family history with vaccines. He knew. But everyone has been pushing the experimental travel pass and so many things we know and many others do not.

It's best to just give you the facts and I pray that maybe you can connect the dots.

Saturday 03/13/21 - Ben went to a pop up Walgreens and got injected with the Experimental Non FDA approved Johnson & Johnson vaccine in Chelsea NYC.

He tested Jeff and we were devastated. He then had a very bad headache. He was feeling ill, went to sleep and then woke up to severe fever and chills at 1 am. His fiancée was awoken to Ben having seizures at 4am, Ben went into cardiac arrest minutes later. 911 tried to revive him at his apartment on the UWS and they tried at MT. Until he was declared dead at 6:00 am Sunday morning, less than 24 hours from receiving the vaccine.

We are very aware and respect every persons choices and medical freedom. This is what happened to our son. There is no light or grey, the autopsy came back suspicious and inconclusive pending further investigation.

We don't need to wait for anything, we already know what happened. Nothing can bring him back.
