Theme: [Biotechnology and GMO](#)

The leaders of Big Agriculture–Monsanto, DuPont, Syngenta–are determined that world’s populations remain ignorant about the serious health and environmental risks of genetically modified crops and industrial agriculture.

Deep layers of deception and corruption underlie both the science favoring GMOs and the corporations and governments supporting them.

This award-winning documentary, Seeds of Death, exposes the lies about GMOs and pulls back the curtains to witness our planet’s future if Big Agriculture’s new green revolution becomes our dominant food supply.
