We are happy to offer you two important books from Global Research Publishers at discounted prices:

Seeds of Destruction, by F. William Engdahl

“Control the food and you control the people.” This is no ordinary book about the perils of GMO. Engdahl takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms.

Engdahl’s carefully argued critique goes far beyond the familiar controversies surrounding the practice of genetic modification as a scientific technique. The book is an eye-opener, a must-read for all those committed to the causes of social justice and world peace.

Today more than ever, the world’s food resources are being hijacked by giant corporations that are turning farms into factories and replacing natural resources with genetically modified “food-like” substances.

The Global Economic Crisis, Michel Chossudovsky and Andrew Gavin Marshall, Editors

In all major regions of the world, the economic recession is deep-seated, resulting in mass unemployment, the collapse of state social programs and the impoverishment of millions of people. The meltdown of financial markets was the result of institutionalized fraud and financial manipulation. The economic crisis is accompanied by a worldwide process of militarization, a “war without borders” led by the U.S. and its NATO allies.

This book takes the reader through the corridors of the Federal Reserve, into the plush corporate boardrooms on Wall Street where far-reaching financial transactions are routinely undertaken.

The complex causes as well as the devastating consequences of the economic crisis are carefully scrutinized with contributions from Ellen Brown, Tom Burghardt, Michel Chossudovsky, Richard C. Cook, Shamus Cooke, John Bellamy Foster, Michael Hudson, Tanya Cariina Hsu, Fred Magdoff, Andrew Gavin Marshall, James Petras, Peter Phillips, Peter Dale Scott, Bill Van Auken, Claudia Van Werlhof and Mike Whitney.
