

Selected Articles: Climate Change and the Green New Deal

By [Global Research News](#)

Global Research, October 01, 2019

In spite of online censorship efforts directed against the independent media, we are happy to say that readership on [globalresearch.ca](#) has recently increased. We wish to thank all of you who share our articles far and wide.

We cover a diversity of key issues you would be hard pressed to find on any other single online news source. This is truly independent news and analysis, a dying breed.

Our costs have increased and our revenue has gone down over the past year. We are running a monthly deficit. Help us keep the independent voice alive by [becoming a member](#) or [making a donation](#) today!

[Climate Is Changing, Relations of Exploitation Are Not](#)

By [Enzo Pellegrin](#), October 01, 2019

The climate, but not only the climate, is undergoing changes resulting from the pollution of production methods and economic development. This was previously said by both the international scientific community and by other politicians and scientists who had spoken to the United Nations several times, without the mainstream media ever having given them the proper echo.

[Climate and the Money Trail](#)

By [F. William Engdahl](#), September 25, 2019

The very mega-billionaires behind the globalization of the world economy who have wreaked so much damage to our environment are the leading backers of the “grassroots” climate movement. Is it pangs of guilty conscience, or could it be a deeper agenda of the financialization of the very air we breathe and more?

[Weather Warfare: Beware the US Military's Experiments with Climatic Warfare](#)

By [Prof Michel Chossudovsky](#), September 24, 2019

Rarely acknowledged in the debate on global climate change, the world's weather can now be modified as part of a new generation of sophisticated electromagnetic weapons. Both the US and Russia have developed capabilities to manipulate the climate for military use. Environmental modification techniques have been applied by the US military for more than half a century. US mathematician John von Neumann, in liaison with the US Department of Defense, started his research on weather modification in the late 1940s at the height of the Cold War and foresaw 'forms of climatic warfare as yet unimagined'.

[Global Warming and the Ozone Layer: What's More Dangerous, CO2 or Nuclear War?](#)

By [Prof Michel Chossudovsky](#), September 29, 2019

While climate activists express their concern regarding the nefarious impacts of global capitalism on climate, including those pertaining to militarization (and defense spending), the scientific analysis of climate under the auspices of the IPCC largely focusses on a single variable: Carbon Dioxide (CO2), i.e. the impact of increased emissions of CO2 derived from fossil fuels (including fracking) on average global temperature.

[Greta Thunberg and Big-Biz' Climate Charade](#)

By [Tony Cartalucci](#), September 29, 2019

And just like the "war on terror" where the US was caught in fact arming and funding the very terrorists they were supposed to be fighting - all as a pretext to advance otherwise indefensible wars of aggression, "Fridays for Future" is supported by and being advanced for the very worst environmental offenders on Earth to advance an agenda that allows for otherwise indefensible and unpopular policies - many of which will be easily delayed or redirected in the West while forced on developing nations.

[The Rockefeller Way: The Family's Covert 'Climate Change' Plan](#)

By [The Energy & Environmental Legal Institute](#), September 24, 2019

Who is funding the "Protest Movement". "Beginning in the 1980s, the Rockefeller Brothers Fund became leading advocates of the global warming agenda. ... In their Sustainable Development Program Review, the Rockefeller Brothers Fund boasts of being one of the first

major global warming activists, citing its strong advocacy for both the 1988 formation of the U.N. Intergovernmental Panel on Climate Change (IPCC) and the 1992 establishment of the U.N. Framework Convention on Climate Change.” (excerpt from Report)

[The Climate Action Summit Fiasco](#)

By [Dr. Arshad M. Khan](#), September 29, 2019

UN Secretary General Antonio Guterres wanted a commitment to the higher ambition of limiting global warming to 1.5C instead of 2C. He got excuses, and of course no promise of net zero by 2050 from any major polluter. Net zero implies balancing carbon emissions with carbon removal. He also wanted a commitment to no new coal plants beyond 2020. Instead China, India and Turkey will be shamelessly expanding coal power well beyond that date.

[Toronto Climate Strike: Let a Hundred Posters Bloom. Corporate Society Gone Mad](#)

By [Eric Walberg](#), September 29, 2019

The culmination of Toronto’s Global Climate Strike on Friday September 27, 2019 made history. 20,000 demonstrators [flooded downtown Toronto](#) with a dazzling array of colourful, often witty, some devastating posters, vowing to stay the course in the battle with corporate society gone mad in a race to destroy the planet.

[Green New Deal and the Climate Movement. Trojan Horses for the Billionaire Class?](#)

By [Michael Welch](#), [Naomi Wolf](#), and [Cory Morningstar](#), September 29, 2019

To be certain, human-induced climate disruption is a reality acknowledged by the [vast majority of climate science experts](#), and therefore a legitimate focus of public concern. Aggressive measures are certainly called for to address an environmental catastrophe posing a clear and present threat to humans and to all life on Earth.

[Dr. Gottschalk’s “World War II Heat Bump”: Did the War Contribute to Air Pollution and Global Warming?](#)

By [Ian Baldwin](#), September 25, 2019

On January 19, 2017 a New York Times front-page story, “For Third Year, the Earth in 2016 Set Heat Record,” featured a complex NOAA chart showing multiple global temperature readings taken from 1880 to 2016. Studying the front-page chart, Harvard physicist Dr. Bernard Gottschalk noticed an intriguing anomaly, a brief but suggestive ‘bump’ in

temperatures that coincided with WW2 (1939-1945).
