[The Horrific Minneapolis Police Killing of George Floyd](#)

By [Kassandra Frederique](#), May 29, 2020

The drug war did not create institutional racism or disregard for Black life in the US. However, it feeds and bolsters the racist structures that snuff out Black life daily. This tragic case is no different. Officer Thao invoking drug use as a warning to bystanders and later as pretext for Mr. Floyd's death is unconscionable, but the real cause of his death was his brutal mistreatment at the hands of police who repeatedly ignored not only his desperate pleas for mercy but also those of bystanders. The real danger we should be drawing awareness to is not drugs, but the ways in which the color of one's skin, one's perceived gender—as our trans siblings know all too well—or one's socio-economic status make them a target for harassment and, far too often, death.

[The Toronto G20 Riot Fraud: Undercover Police engaged in Purposeful Provocation](#)

By [Terry Burrows](#), May 29, 2020

Minneapolis May 2020. Toronto June 2010. This article was published ten years ago. Toronto is right now in the midst of a massive government / media propaganda fraud. As events unfold, it is becoming increasingly clear that the 'Black Bloc' are undercover police operatives engaged in purposeful provocations to eclipse and invalidate legitimate G20 citizen protest by starting a riot. Government agents have been caught doing this before in Canada.

[Trump the "Peace Candidate": Contemplating War During Pandemic against Two Global Competitors. Nuclear Weapons "Tests" against China and Russia](#)

By [Philip Giraldi](#), May 29, 2020

Let us consider why the Donald Trump White House is currently considering [detonating a nuclear weapon](#). It would be the first “test” of a nuke since 1992 and is clearly intended to send a message that those weapons sitting around in storage will be available for use. The testing is in response to alleged development of low-yield tactical nuclear devices by Beijing and Moscow, a claim that is unsupported by any evidence and which is likely a contrivance designed to suggest that there is strong leadership coming out of Washington at a time when the Administration has been faulted for its multiple failures in combatting the coronavirus.

[The Volleys of an Information War Against China](#)

By [Leonid Savin](#), May 29, 2020

A strategic information campaign against a particular state usually involves a number of elements and layers. While officials and diplomats gradually increase the aggressiveness of their rhetoric, “independent” media outlets publish a range of articles from life stories to special investigations. They may differ in tone and subject matter, but they all have the same goal. Campaigns like these are of particular importance to the US, where there is a tradition of enlisting the support of public opinion. Therefore, to ensure the success of foreign policy actions, the public must be prepared.
