

Selected Articles: Medical Doctors and Health Professionals: The Truth About COVID-19

By [Global Research News](#)

Global Research, September 17, 2020

We hope that by publishing diverse view points, submitted by journalists and experts dotted all over the world, the website can serve as a reminder that no matter what narrative we are presented with, things are rarely as cut and dry as they seem.

If Global Research has been a resource which has offered you some solace over the past few months, we ask you to make a financial contribution to our running costs so that we may keep this important project alive and well! We thank you for your support!

There is a technical issue regarding our email send-out of selected articles, which we hope to resolve.

[Ireland: 'Draconian' Restrictions Around COVID-19 Condemned by Health Service Executive Doctor](#)

By [Paul Cullen](#), September 17, 2020

Covid-19 is “much less severe” than the average annual flu and current “draconian” restrictions are no longer justified, according to a senior [Health Service Executive](#) doctor.

People at low risk from the virus should be exposed to it so they can develop herd immunity and reduce the risk to vulnerable groups, according to **Dr Martin Feeley**, clinical director of the Dublin Midlands [Hospital](#) Group.

[Open Letter from Medical Doctors and Health Professionals to All Belgian Authorities and All Belgian Media](#)

By [Docs4opendebate](#), September 17, 2020

We, Belgian doctors and health professionals, wish to express our serious concern about the evolution of the situation in the recent months surrounding the outbreak of the SARS-CoV-2 virus. We call on politicians to be independently and critically informed in the decision-making process and in the compulsory implementation of corona-measures. We ask for an open debate, where all experts are represented without any form of censorship. After the initial panic surrounding covid-19, the objective facts now show a completely different picture - there is no medical justification for any emergency policy anymore.

[A Huge Number of Medical Doctors Ask for a Reassessment of the Corona Measures](#)

By [Docs4opendebate](#), September 17, 2020

In the Netherlands, doctors have come together and drafted an open letter addressed to colleagues and the government pleading for proportional measures. This letter aims to stimulate an open and frank debate on how to tackle the Covid-19 outbreak and was signed by more than 800 doctors. [The petition](#) has been stopped by now.

[COVID-19: Guidance for School Reopening. Report by The Hospital For Sick Children and Unity Health Toronto](#)

By [SickKids](#), September 16, 2020

Multiple reports from around the world indicate that children and youth account for less than 5-10% of SARS-CoV-2 symptomatic infections.[12-14] In Canada, of 114,597 COVID-19 cases reported as of July 27, 2020, 8,747 (7.5%) were in individuals aged 0-19 years.[15] While this may, at least in part, be related to testing strategies and test performance in children and youth as well as early school closure, there is some data to suggest children, particularly those under 10 years of age, may be less susceptible to SARS-CoV-2 infection and potentially less likely to transmit the virus to others.

[Video: Irish Doctor Speaks Out About Covid-19 Lies](#)

By [Mark Taliano](#), September 15, 2020

She first knew the pandemic was “fake” when the WHO first declared pandemic with an announcement of 4,291 deaths globally. This, she says, represents 1 death per 1.8 million people. Context is important.

When rules were changed around Death Certificate coding, as happened in North America and beyond, it was the first time in her professional career that she had witnessed this. It meant that COVID data could not be compared to previous outbreaks, it couldn't be compared to "what had happened before".

[Video: COVID-19 the "Pandemic" Is Over. "A Novel Virus Closely Related to Corona Viruses Which Contribute to the Common Cold"](#)

By [Dr. Mike Yeadon](#) and [Julia Hartley-Brewer](#), September 14, 2020

Mike Yeadon, Pfizer former chief scientific advisor: Ferguson's model has no validity in the view of most scientists:

"Yes, its a novel virus but its very closely related to at least four other viruses that circulate freely in the population, which are all **corona viruses and contribute to the common cold, so bluntly it was naive of them (government etc) to assume everyone was susceptible..**"

["We Have a Lot of Evidence that It's a Fake Story All Over the World" - German Doctors on COVID-19](#)

By [Arjun Walia](#), September 14, 2020

Many of the claims these doctors make have been 'debunked' by mainstream media, federal health regulatory agencies and 'fact-checkers' that are patrolling the internet. Any information that does not come from the (WHO) is not considered reliable, truthful or accurate, and that would include the information presented in this article and information shared by these experts in the field. People are being encouraged to visit the WHO's website for real and accurate information about COVID-19 instead of listening to doctors and scientists who oppose the narrative of these health authorities.

[Face Masks Pose Serious Risks to the Healthy](#)

By [Dr. Russell Blaylock](#), September 14, 2020

Researchers found that about a third of the workers developed headaches with use of the mask, most had preexisting headaches that were worsened by the mask wearing, and 60% required pain medications for relief. As to the cause of the headaches, while straps and pressure from the mask could be causative, the bulk of the evidence points toward hypoxia and/or hypercapnia as the cause. That is, a reduction in blood oxygenation (hypoxia) or an elevation in blood CO₂ (hypercapnia).
