With an estimated 58 million population, South Africa is the 25th largest country in the world. It has friendly relations dated from the Soviet times, and now with the Russian Federation. It joined BRICS, an organisation of five emerging economies, in December 2010 in line with the country's foreign policy to strengthen South-South relations.

[Heritage Practices of Small Farmers vs. "Fake Climate Change Agenda" Controlled by Big Business](#)

By [Bharat Dogra](#), July 06, 2023

[The Federal Reserve Has Been a Disaster for America. How the Fed Triggers "Bank Insolvency"](#)

By [Dr. Paul Craig Roberts](#), July 06, 2023

Like all indoctrinated economics PhDs, I used to teach students that the Federal Reserve was created as a central bank in order to provide cash to banks experiencing a run on deposits so that bank failures would not become general and collapse the money supply and, thereby, employment and output. [The Fossil Fuel Proliferation Threat](#)

By [Dr. Binoy Kampmark](#), July 06, 2023

Climate change negotiations and debates are characterised by some curious features. For one, there are interminable stretches of discussion that never seem to feature the agents of cause. Chatter about horrendous fires, toxic smoke, and environmental degradation often skirts around the culprit of anthropogenic change, so ably aided by fossil fuels.

[Ukraine Timeline Tells the Story](#)

By [Joe Lauria](#), July 06, 2023

The way to prevent understanding of the Ukraine war is to suppress its history. A cartoon version says the conflict began in February 2022 when Vladimir Putin woke up one morning and decided to invade Ukraine. There was no other cause, according to this version, other than unprovoked, Russian aggression against an innocent country.
