Burgess Hill, UK - Roz McGinty is one of the most athletic women in the world. She is also a nurse and she is COVID-19 mRNA vaccine injured.

Roz McGinty’s athletics resume is stunning: ([click here](#))

- 12 time Ironwoman

- World Long Course Triathlon Championships
- Has reached 7 podiums & 2 wins in 19 triathlons ([click here](#))
- Innumerable Triathlon and Diathlon races **spanning 22 years**
- World & European Long Course Kona 22 VI Guide
- Nurse

sprintymcginty • Follow
Ibiza, Spain

sprintymcginty World Long Course Triathlon Championships is tomorrow! Can't beat Ibiza for a fantastic location!

I qualified, I'm here, I'm surrounded by friends and @brittri teammates. I have fab support from back home from friends, family and the one and only @mcgintymartin 🍀 - thank you all! I'm excited for a fun day out. That's the main aim - always!

Huge thanks as always to those that support me - I consider myself very lucky!

@giantstalbans for my fab @livcyclinguk Trinity and for fixing her in record time recently. Love this bike so much and thanks to @ezgains.co.uk the disc cover and chain ring cover not only make her faster she looks fab too 🙌

The hard work is done thanks to top coaching and support from @tom_davis.tri plus help with training from @gllsportfoundation and @eventsatw Thanks also to @tribalactivenutrition for fuelling my racing and training - can't beat their energy smoothies!

Hope everyone racing stays safe and has a great day. Let's hope the body & bike behave 🙏

Let's go!!!!

Roz McGinty suffered serious COVID-19 vaccine injuries after her 2nd dose:

Roz McGinty is in Radlett, Hertfordshire, United Kingdom.

March 25 · 🌐

Yep, you see me swim, bike and run and I will leap higher and higher every time I hit a finishing line.

I am one of the lucky ones.

I can function.

Many have lost their lives.

Some have taken their own lives.

Many can't lead a normal life anymore.

Today marks two years since the start of my "severe post-c0vid vacc .ine syndrome" It took 9 months for a diagnosis and at times I've been extremely scared.

You may have seen me shrink in size.... 8kg lost in a few weeks when I've had stable weight for 30 yrs but.....

You cannot see or feel my tremor

You cannot feel my skin numbness

You cannot hear my tinnitus

You cannot feel my joint and muscle pain

You don't see the drugs I have had to take

You didn't see my cardiac issues

You didn't see me fear for my life

You didn't see my tears of excruciating pain

You didn't see me struggling to work,

I could go on

I live with fear, what has it done to me?

Will I ever feel "normal" again?

I did not speak out. I believed in the vacc.ine. I was one of the first in line. I did not want Long C.Ovid. We are not anti-vaxx.ers - each and every one of us voluntarily took the vacc. ine. We should not have to speak in code.

It's time the media stopped their censorship.

It's time the government helped us.

It's time we had some answers

It's time the vacc. ine issues are explored.

See us

Hear us

Believe us

Help us

I have had incredible support from my family, friends, work colleagues, tri community and UKCVFamily and thank you all ❤️

#react19 #realnotrare #canwetalkaboutit #ukcvfamily #truthbetold

WHAT'S BEEN YOUR FAVOURITE RACE TO DATE AND WHY?

Hands down it's the Ironman World Championships in Hawaii 2022. It's been a dream of mine for 13 years and I never thought that dream would come true. Unfortunately, I have a history of allergies and after suffering a severe multi-system inflammatory reaction to my second covid vaccine, I wasn't able to function to my normal level so I opted to take a year out of racing for the GB AG Team. Instead, I just focused on completing rather than competing. Little did I know that I would cruise to an AG win in Ironman Finland and therefore qualify for Kona!

My Take on Roz McGinty...

Roz McGinty is one of the most athletic people in the world. She truly believed in the COVID-19 vaccine and after her 2nd dose, she was severely injured and has been injured for 2 years and 2 months.

It is extremely rare to see a top athlete diagnosed with “severe post COVID-19 vaccine syndrome” as Roz McGinty was.

The vast majority of people never get a diagnosis of any kind that they can work with.

Such a diagnosis would never be made in Canada, where the very existence of COVID-19 vaccine injuries is denied. I have seen this kind of diagnosis made in several countries in Europe.

Roz was COVID-19 vaccine injured starting March 25, 2021. She has cardiac injury (could be myocarditis, she doesn't go into detail), several neurological injuries

(tinnitus, tremor, skin numbness), and some autoimmune injuries (joint and muscle pain).

Roz talks about **excruciating pain, struggling to work, “drugs I’ve had to take”, “fear for my life”**.

She has clearly been through a lot and has put in a great amount of work to stay on top athletically. She doesn’t tell us what treatments she has taken to deal with her COVID-19 vaccine injuries.

Germany - 11 year old boy Nabil Maytan diagnosed with “Severe Post COVID-19 Vaccine Syndrome” ([click here](#))

Please help Nabil live a normal life again

Gregory Maytan is organizing this fundraiser.

“Nabil has been sick and has not been able to attend school since November 2021. Instead of playing with friends, instead of playing sports and piano, instead of going for outings with his family **Nabil is confined to a wheelchair and needs help with everything from using the restroom to getting dressed. He can’t move his legs, he can’t talk, he can’t sit up.** He is extremely sensitive to sound which makes even going outside painful.

After over a year of doctors getting his diagnosis wrong, with treatments that made him worse doctors finally tested him for and **diagnosed him with a severe case of post-vac syndrome. Nabil’s neurological symptoms developed soon after he had the covid vaccine. The medical community is still trying to figure out what helps and what doesn’t help with post-vac since it is so new.** Also, each case can be very different with its own subset of diseases and symptoms. Right now, the agreed approach seems to be ‘trial and error’, trying various therapies and medications to see what works.

I should be clear and say that I’m not ‘anti-vax’. I know the vaccines have done a lot of good. **I just want my boy to walk and talk again and live a normal 11-year-old life.** I

also want to say that like most other vaccine-injured people, we have registered this injury with our government.”

My Take...

I believe a diagnosis such as “post COVID-19 vaccine syndrome” is very important for victims of vaccine injuries, not only for the peace of mind that a firm diagnosis brings, but also in that it gives the victims something to work with.

We need more “**Post COVID-19 Vaccine Syndrome**” diagnoses to be made, but for that to happen, doctors in Canada and the US must find their courage and ethics again.

For now, COVID-19 vaccine victims are on their own.

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

ISBN: 978-0-9879389-3-0, **Year:** 2022, PDF Ebook, **Pages:** 164, 15 Chapters
