\*\*\*

*The "lone gunman," that cartoonish figure that for the last several decades – at least since November 1963 – has regularly framed most high-profile assassinations, has struck again, this time in disobedient Slovakia. He always pops up whenever his presence is required to warn misfits and discipline even team players who are inattentive to their tasks.*

The assassination attempt on the Slovak Prime Minister Robert Fico fits that pattern. Fico's political record going back for decades may have provoked a measure of distrust in globalist circles. However, his electoral victory and return to power in the fall of last year probably would have been treated as a manageable challenge had Fico been rotten enough to act as his colleagues routinely do, saying one thing before elections and doing the opposite afterwards.

He has, instead, turned out to be a man true to his word, certainly quashing any rumours that he had ever been recruited as one of WEF's Young Leaders. At a critical juncture for the globalist string-pullers, when being a cooperative team player is considered *de rigueur*, he chose to go off the beaten path with other outcasts like Victor Orban and to champion old fashioned values, such as Slovakia's national sovereignty.

Fico however did not just insist on Slovakia's sovereignty, which would have been bad enough, but also on other despised notions, equally discredited in present-day Europe: Statehood, Nationhood, Religion, and Family. It is his adherence to those values, once the cornerstone of the European civilisation before its cultural implosion, that made Fico a lone gunman target.

But to these shortcomings several other, no less bothersome and also potentially life threatening faults, should be added. Over the last several months, as Project Ukraine was turning into a shipwreck, Fico defiantly refused to allow military aid for the Kiev regime, called for cancelling anti-Russia sanctions, and repeatedly expressed the prohibited notion that Ukraine will be defeated.

As if that were not enough, there is more. In a long-forgotten tragedy in 2006, [a Slovak aeroplane mysteriously crashed](#) whilst flying back from Kosovo. On board, in addition to Slovak peacekeepers, there was most interesting cargo. Slovakian specialists and forensic experts were involved in the exhumation of several mass graves in Kosovo where Serbian victims had been buried and they were bringing the evidence back home. It turned out that many of those victims exhibited thorax incisions which strongly suggested that they had been used as unwilling organ donors by Albanian traffickers. Readers whose memory is still unimpaired will recall the controversy about human organ extraction and trafficking in Kosovo that raged at the time, culminating in the incriminating 2010 [report on this topic submitted to the EU by Swiss investigator Dick Marty](#).

The Slovak team handed a set of the evidence it had unearthed to NATO, of which Slovakia had by then become a member. But just to make sure that their findings would not disappear in some NATO black hole, they took the precaution of carrying an extra set home with them. That evidence was on board the aeroplane that inexplicably crashed and it perished along with about 40 Slovak personnel whose mouths concerning their gruesome findings in Kosovo were thus forever sealed.

As custom ordains in such situations, a hasty and superficial investigation was conducted by Slovak authorities, its conclusions were declared a state secret, and then sealed.

Five years ago, the 2006 plane crash again was in the limelight as new evidence emerged that the event may not have been an accident after all because of an explosive device that was placed on board. The Slovak parliament opened an inquiry into the matter which Robert Fico wholeheartedly and publicly supported.

In addition to his more recent gaffes, that also must have been a huge strike against him.

Predictably, responsibility for the shooting was instantly attributed to a lone individual who allegedly bore Fico a political grudge and decided to kill him. How that risible, Jack Ruby-type explanation will pan out, we may soon see as Slovakian authorities press their inquiry.

But irrespective of what Slovakian investigators uncover and how much of it their NATO overlords allow them to publish, certain preliminary conclusions about this ghastly attempted murder may still be drawn. Based on the totality of past experience, these conclusions are bound to be ultimately corroborated and will most certainly withstand the test of time.

The gangster hit on the Slovakian Prime Minister will have had its intended effect whether he survives or not. It was an intimidatory message sent loud and clear to all concerned not even to think of challenging the rules based order. The nature and reach of the “rules” as pertaining to them was made starkly clear the other day in Slovakia. As the position of the collective West crumbles, all European leaders who might be thinking of flip-flopping or asserting their nations’ interests in preference to obediently following orders have been put on notice. If Robert Fico was vulnerable, so are they. And this applies not just to pathetic excuses for national leaders who are presently in office, but also to those aspiring to replace them. More widely, the attempted murder of Robert Fico sends a message to outstanding non-political public figures of diverse profiles, [such as Archbishop Vigano](#), whose bold statements, coherent analyses, and compelling appeals to the public threaten to collapse the manufactured consensus.

## **Rethinking Srebrenica**

By Stephen Karganovic

Rethinking Srebrenica examines the forensic evidence of the alleged Srebrenica “massacre” possessed by the International Criminal Tribunal for the former Yugoslavia (ICTY) in The Hague. Even though the ICTY created more than 3,500 autopsy reports, many of these autopsy reports were based on bone fragments, which do not represent complete bodies. An examination of the matching femur bones found reveals that there were only about 1,900 complete bodies that were exhumed. Of these, some 1,500 autopsy reports indicated a cause of death consistent with battlefield casualties. Only about 400 autopsy reports indicated execution as a cause of death, as revealed by ligatures and blindfolds. This forensic evidence does not warrant the conclusion of a genocide having taken place.

Karganovic examines the events that took place in Srebrenica in July 1995 in a wholistic manner instead of restricting it to a three-day event. The ten chapters cover:

- 1) Srebrenica: A Critical Overview;
- 2) Demilitarization of the UN Safe Zone of Srebrenica;
- 3) Genocide or Blowback?;
- 4) General Presentation and Interpretation of Srebrenica Forensic Data (Pattern of Injury Breakdown);
- 5) An Analysis of the Srebrenica Forensic Reports Prepared by the ICTY Prosecution Experts;
- 6) An Analysis of Muslim Column Losses Attributable to Minefields, Combat Activity, and

Other Causes;

7) The Genocide Issue: Was there a Demonstrable Intent to Exterminate All Muslims?;

8) ICTY Radio Intercept Evidence;

9) The Balance Sheet; and

10) Srebrenica: Uses of the Narrative.
