We’re in a long war. I’ve written about many aspects of the struggle in a variety of essays and articles, drawing primarily upon my own personal experiences. The war, so far as I can tell, is unique in its scope, stealth and breadth, and the prosecutors of this war upon the people of our Earth are ruthless, vicious, amoral and lawless.

Many of us who have been victims of specifically directed acts of hostility from the authorities who serve as henchmen for the Global Warlords — and here I am thinking of doctors and lawyers who have been subjected to professional strictures, complaints, have had to defend themselves in tribunals against charges that are ludicrously baseless — have nonetheless retained some measure of faith in the judicial system and in the fairness and common goodness of the System. There have been a few important victories, but for the most part the System has failed the cause of justice.

Much of our energy — we in the resistance — has gone into demonstrating the dangers of the various covid inoculations, and for the most part rightly so. The jabs are both unnecessary and dangerous. (In fact, I myself have authored a [petition to ban all mRNA medical interventions in New Zealand](#).) Yet notwithstanding these ‘shortcomings’, notwithstanding the turbo-cancers and strokes and myocarditis and deaths, the propaganda machine and the covid operation itself have been extraordinarily successful in persuading the many of the jabs’ necessity and safety. So successful has been the campaign, that a friend of mine who suffered a heart attack a week after his second Pfizer injection blithely ignored any possible connection between the jab and his cardiac event.

The evidence that has accrued about the deceptions and malfeasance involved in the production of the jabs, in their contents, and the morbidity and mortality associated with their use worldwide has been enormous; yet the ordinary Joe who continues to feed on mainstream media is neither aware of these data, nor interested.

Those of us who however *are* cognizant of the astounding breadth of the slow-motion

genocide — and I use the word ‘genocide’ with care — are at our wits’ end. How can so many be so blind to what is so obvious?

Therefore we plod and push and prod, hoping for a game-changing bombshell to shake the masses from their ignorance and stupor, hoping for the smoking gun, or the snowball that will create the avalanche, or for a miracle. ‘If only we show them the real numbers of deaths and cancers and strokes and tics and paralyses and pain!’ So goes our hope, and with it the lion’s share of our strategic energies.

There are several problems.

First, there is the matter of [differing batches](#) and varying outcomes according to batch number of the jabs.

Second, there is the issue of complexity in medical causation.

It is notoriously difficult to demonstrate irrefutable causality in the domain of medicine — and our opponents know this quite well. If I, for example, as a psychiatrist had prescribed fluoxetine to a patient, and two weeks later that patient suffered a stroke, questions may be raised and inferences made, but no firm conclusion could be arrived at to implicate the antidepressant, especially if the patient in question had preexisting cardiovascular risk factors. And if untoward event occurs, there is always ‘long covid’ to blame, never you mind about anything else.

Third, those people who lined up for the jab may not be so keen to see that they have endangered their health, and their response to our presentations of danger will be to turn away from them, and turn their anger onto us for trying to foist such unpalatable facts upon their consciousness.

Fourth, as long as mainstream media maintain their stranglehold on vast swaths of the population, their message will be the accepted reality. An army of epidemiologists and statisticians and an array of graphs and charts presented by alternative media will not amount to a hill of beans.

While I do not believe that these problems are insuperable, I think we must temper our expectations of any sudden awakening. Truth will out, in the end, but it may take quite a while, and although we should continue our attempts to hold jab pushers — governments, health organizations and the like — to account, we must not fail to direct our attentions toward the other assaults — on our fundamental human rights, on our money, on our privacy, on our ability to travel, and so forth.

After all, the climate scam is simultaneously in full swing and carbon credit systems are already being planned to augment social credit programs. We are under attack from several fronts — control, surveillance, impoverishment, depopulation by several means, destruction of family and social ties — all pushing to obliterate any notion of individual autonomy and strong human connection with anything or anyone but the ruling One World Autocrats. The jab is but one of an array of potent weapons in their armamentarium.

The more fruitful tactic now is to engage the Other Side on issues of their personal freedom and trust in the Authorities, on the creeping measures that are being attempted to make us more and more subservient, on the sanctity of our bodies and souls, and on living a life that accepts risk and is not contorted by never-ending fear.

And if a whistle-blower should come to me with sensitive information to present, I would figure out a way to ensure that the data are both unimpeachable and *transparently verifiable*. I would insist that he or she seek legal protection and remain absolutely anonymous. I would work in silence until the time is right to show my hand. I would be patient, not expecting much, except to carry on.

It's a long war.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin

ISBN: 978-0-9879389-3-0, Year: 2022, PDF Ebook, Pages: 164, 15 Chapters
