A new report this week found America is turning the tide on several major cancers.

But while older people's [cancer](#) rates are falling, a more [worrying trend has emerged](#)—cancers are rising in children and young adults, including blood cancers.

And because the youngsters are so young and historically at such low risk, their [diagnoses is often not made](#) until it is too late.

Alizabeth Rhodes, from [Michigan](#), is one of the growing number of American minors to be struck by the disease that normally hits the elderly.

The 16-year-old's family first knew something was wrong when she started to be exhausted and lack energy far more than usual.

She was taken to the ER in her home state with ['non-specific' symptoms](#) at the age of 16 years — which may have included swollen areas in her neck and armpit and a fever or night sweats.

Tests revealed she had stage four peripheral T-cell lymphoma, or an aggressive type of non-Hodgkin's lymphoma where T-cells, a type of which blood cell, start to divide uncontrollably.

By the time it was diagnosed, the cancerous cells had already spread to multiple organs.

She was taken out of school in July 2023, after the cancer was detected, and spent nine months in and out of hospital receiving chemotherapy, radiation and then a bone marrow transplant.

Ms Rhodes is now in remission with doctors describing her as 'extremely resilient' — while her family said she was a 'real fighter'.

But questions remain over why the youngster — who is now 17 and is still yet to return to the classroom — developed the cancer.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. -Edward Curtin

ISBN: 978-0-9879389-3-0, **Year:** 2022, **PDF Ebook,** **Pages:** 164, 15 Chapters
