

# Stevens-Johnson Syndrome After Pfizer and Moderna COVID-19 mRNA vaccines.

700% Increase Since Vaccination Started, Up to 25% Are Fatal

*July 3, 2023 - BRAZIL - 52 year old singer and composer Frank Aguiar is married to 31 year old Caroline Aguiar, who revealed on social media on her birthday that she had Stevens-Johnson Syndrome that "burns the body" and was hospitalized in the ICU for 10 days, almost died.*

# details Frank Aguiar's wife's hospitalization in the intensive care unit for a rare disease: "It burns the body"; He watches

GILLIAN HALL · JULY 4, 2023 · LEAVE A COMMENT

---

Singer Frank Aguiar's wife, Caroline Aguiar, has revealed that she has had a serious health problem recently. The 31-year-old shared the impressive report on her social networks, on Monday (3). According to the testimony, she was diagnosed with Stevens-Johnson Syndrome, a rare disease that causes a series of skin burns.

*"I decided to come here today, on my birthday, because I am celebrating my life. My 31 years and the second chance God gave me. The Stevens-Johnson disease that I had is a rare and serious disease that burns the body,"*she said in a video in Stories.

---

Caroline was hospitalized for 10 days in the intensive care unit to treat her injuries. *"I thought I was going to die. I even made a video saying goodbye, I swear I thought I was going to die. And God gave me another chance."*celebrate.

In a post shared to the feed, the woman showed pictures of how she got the spots and told more information about her hospital stay. *"Details: My mouth was absolutely sore. I lost seven kilos. I couldn't do simple things, like walking, eating hurt a lot, urinating, but I'm a daughter of a living God and I'm here today to tell you."*I remembered.

She also took advantage of the moment and thanked her husband for their support and the entire medical team who were involved in her recovery. *"I want to thank my husband, who, in spite of everything, never left my side, and we are a couple like everyone else, we have our ups and downs"*he wrote. *"I would like to thank the professionals at Assunção Hospital, the angels of God who have appeared in my life. The entire medical team is my eternal gratitude. In the midst of so much pain, I had the most beautiful encounter with God and it deserves all that I have been through!"*he finished.

This is now a recognized reaction to Pfizer & Moderna COVID-19 mRNA Vaccines:

October 2022 - 22 year old Charish Chambers worked as CNA for the VA. She developed Stevens-Johnson Syndrome after her COVID-19 vaccine. She now suffers from Neuropathy.

Charish Chambers ▸ Steven's Johnson Syndrome Support

October 16, 2022 · 🌐

Hi everyone so I got sjs back in April my lips and everything blistered and so I was in the hospital for that week to get iv steroids and make sure my throat don't close up I never in my life and I'm 22 y/o I would have to go through something that is so trama if that makes sense I'm grateful that I don't need breathing tube down my throat and im so grateful for that to this day but I do have scars and I do have some scar tissue but im not sure like im trying to research this and I'm new like I said and I don't know anything so I'd greatly appreciate like anything bc I'm trying to put peace's together and it's not maken sense I truthfully feel like it was my Covid vaccine because I am young and I was healthy Intel I got the Covid vaccine like I got the first pt of the vaccine and a week later I got Covid and ever since then I've been dealing with really bad migraines and now this like it's not maken sense and I had a allergic reaction to "lamictal" and after I got sjs somehow I got hands feet and mouth so one top of the sjs I had hands feet and mouth and I don't work with little kids .....

Hi guys so I was wondering if yinz have like any neuropathy or anything like that... It's been a year since I got sjs and dam does it suck! Like what do u guys do with neuropathy or did u guys don't have neuropathy.. im fallowing up with a pain clinic but do u guys have like any tips im 23 years old and I shouldn't have neuropathy at my age know that I know sjs is genetically in the family... like what do you guys do ?

Jan. 2023 - Julie Mitchell Peel is a photographer, her daughter Lia was diagnosed with Stevens-Johnson Syndrome/TEN. She lost 74% of her skin and was intubated but has recovered.

What Is Stevens-Johnson Syndrome?

Stevens-Johnson syndrome (SJS) is an acute hypersensitivity reaction that causes extensive necrosis of the mucous membrane and skin.

SJS results from a cytotoxic immune reaction in keratinocytes, which leads to widespread keratinocyte apoptosis (cell death).

Although bacterial and viral infections are considered causative factors in the syndrome, medications also are thought to be a major cause.

SJS has also been reported with vaccines: [influenza](#), [measles](#), [varicella](#), [tetanus](#).

Often described as [SJS/TEN](#) (TEN = toxic epidermal necrolysis)

- It is SJS if < 10% of the body surface is involved
- It is TEN if > 30% of the body surface is involved

According to earlier studies, the prevalence of SJS is fewer than 1 to 2 cases per million people per year.

[Mortality rate is approximately 25-30%.](#)

### Saudi Arabia Reported First SJS Case after Pfizer mRNA

- [Elboraey and Essa](#) reported the 1st SJS case after Pfizer mRNA in Oct.2021:
- It was a middle aged female in Saudi Arabia
- She developed lesions 5 days after 2nd Pfizer dose (nothing after 1st dose!)
- they theorized Pfizer mRNA stimulates immune cells, cytotoxic T cells and Natural killer cells that secrete granulysin which destroys cells in skin and mucous membrane by dysregulation of specific protein pathways.

### South Korea Reported First SJS Case after Pfizer Booster

- [Mihn-Sook Jue et al](#) reported another case:
- 20 year old South Korean woman had 3rd Pfizer COVID-19 mRNA vaccine
- next day she came to ER with fever & skin lesions (had no issues with dose 1 or 2)
- she needed 5 weeks of IV steroids.

**Figure 1.** Clinical photographs of the 20-year-old woman (A, B) 6 days (C) 9 days after Pfizer vaccination. (D) 11 days after steroid treatment (12 days after third dose vaccine). Skin biopsy showed full thickness epidermal necrosis and detachment from the dermis (E: H&E,  $\times 40$ , F: H&E,  $\times 200$ ).

## Croatian Doctors Take a Shot at “Anti-vaxxers” and Fail

- A hilarious 2022 paper by Croatian doctors [Dodig et al](#):
- “SJS (clinical) presentation is impressive and anti-vaxxers’ misinformation regarding COVID-19 vaccination campaign was focused on SJS to increase vaccine hesitancy”
- Conclusion: “SJS after COVID-19 vaccination seems to be a possible but exceedingly rare adverse drug reaction. The potential signal identified in our short analysis, regarding Moderna vaccine, deserves further in-depth analysis and could be due to the substantially higher dose used by the Moderna vaccine”

## USA (Minnesota)

- [Padniewski et al](#). reported a 46 yo Ethiopian woman who had 1st Moderna mRNA
- she presented in ER 3 days later with skin and mucosal lesions

## Australia

- [Stanley et al](#) - Doctors in a burn unit in a Hospital in Sydney, Australia published:
- 7-fold increase in SJS since start of COVID-19 vaccination
- 8 patients all mRNA vaxxed (3 were double, 4 were triple, 1 was quadruple jabbed)
- Theorized that spike protein may bind T helper type 1 cells leading to clonal expansion of cytotoxic T cells that may abnormally release granules that cause apoptosis in skin
- Although theorized that spike protein could “prime” the immune system for a future drug to cause SJS/TEN.

### AstraZeneca COVID-19 Vaccine Did this Too

- [Gouveia et al](#), Brazilian researchers reported SJS with AstraZeneca COVID-19 vaccine also
- 40 year old black woman had 1st AstraZeneca COVID-19 jab, 2 days later presented with this

### My Take...

Stevens-Johnson Syndrome was a rare hypersensitivity reaction, reported to occur with over 200 drugs, including influenza vaccines (flu shots) and other vaccines.

Since COVID-19 vaccines rolled out, there has been a 7-fold (700%) increase in SJS.

SJS is now a known reaction to Pfizer & Moderna COVID-19 mRNA vaccines, with 296 cases reported to WHO database VigiAccess.

## Stevens-Johnson syndrome (296)

### Clinical Picture:

- Mortality rate of SJS/TEN [can be up to 25-30%](#)
- starts with fever, cough, lymph nodes
- rash first appears on mouth (look for lip sores), neck and arms
- can spread all over the body with blisters and crusting
- skin may get detached
- may involve mucosa: esophagus, vagina, rectum and the eyes (risk of blindness)
- disfiguring scars may develop

SJS/TEN is evidence of a dysfunctional immune system response.

The theory is that this is a delayed type hypersensitivity reaction, T-cell mediated, which can occur anywhere from 6 hours to weeks after mRNA vaccine injection.

The COVID-19 Vaccine spike protein is expressed on keratinocytes in the skin and stimulates an abnormal immune response resulting in cytotoxic T-cells that release enzymes that lead to apoptosis (cell death) in the skin and mucous membranes.

You can get this reaction with any mRNA dose, even if you had no reaction to previous doses, this is probably due to the batch to batch variability of the contents of mRNA vials.

SJS/TEN is a MEDICAL EMERGENCY that responds to IV steroids, but after getting immediate medical attention for this reaction, detoxing the spike protein is still very important!

Spike protein detox is the usual:

- Spike breakdown: Nattokinase, Bromelain (Serrapeptase, Lumbrokinase)
- Spike binding: Quercetin, Olive Leaf, Black Seed, Curcumin, Dandelion extract
- Antioxidants: NAC, Taurine, Vitamin C, Resveratrol, CoQ10
- Immune Support: Vitamin D, Zinc, Magnesium, Selenium, Melatonin, etc
- Autophagy: 3-day water fast

(Special thanks to [Nashville Angela](#) on Twitter for bringing attention to these painful mRNA vaccine injury cases and trying to wake people up!)

## The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
