[Nov. 13, 2023](#) - 21 year old Emilia Brangefalt was a professional Swedish trail runner (for Adidas Terrex) who won bronze in the 2022 Trail World Championships. She took her own life on Nov.13, 2023 after developing an extremely high heart rate in July 2023 that ended her training and running.

emiliabrangefalt  Been a while since I've posted anything here. And that's because since the end of July my body shut down. Haven't been able to train anything due to a extremely high heart rate. (120-150 bpm) just standing up. Just taking a walk is painful right now. Have been to the hospital and visit the medical over 20 times but every single blood test/ ekg/ cycle test is good. Still my body is super stressed although I have given it so much love the past months☐☐ Maybe it was to much for a 21 year old girl to run Transvulcania 48k and WMTRC 45k with less then one month in between.

I am super sad because running and training means so much. But now, just living a normal life is difficult. I have spent more hours in bed than on my feets this past month.

Maybe one day I will be back. Or I won't. I hope my body can recover from this ☐☐❤

November 4

Story by R.Ghosh, lbtimes.sg, Nov.23, 2023

Swedish trail runner Emilia Brangefalt has died by suicide.

She was just 21 years old. The accomplished long-distance runner won a bronze medal in the 40km race at the 2022 Trail World Championships in Chiang Mai. This year, she achieved a fifth-place finish in a world championship race in Innsbruck.

However, Brangefalt had to take a prolonged hiatus from the sport after being diagnosed with an exceptionally high heart rate. In a post shared to her Instagram account on November 4, Brangefalt openly discussed the physical and mental challenges she was facing after being compelled to take a break from the sport.

"Just taking a walk is painful right now," Brangefalt wrote. "Have been to the hospital and visit the medical over 20 times but every single blood test/ ekg/ cycle test is good. Still my body is super stressed although I have given it so much love the past months."

“Maybe it was too much for a 21 year old girl to run Transvulcania 48k and WMTRC 45k with less than one month in between. I am super sad because running and training means so much,” the athlete added.

“But now, just living a normal life is difficult. I have spent more hours in bed than on my feet this past month. **Maybe one day I will be back. Or I won't.** I hope my body can recover from this.”

On Wednesday evening, the Swedish Athletics Federation officially confirmed that Brangefalt had taken her own life earlier this month.

“During her last months, Emilia felt very bad, both physically and mentally. She had good support from those closest to her, but on November 13, she ended her life,” a statement from the Swedish Athletics Federation read.

Tributes Pour In

The statement also contained remarks from Kasja Bergqvist, the captain of the Swedish Athletics Federation (SAF), who said that Emilia Brangefalt's death was **“so deeply tragic”** that she struggled to find words to convey the sorrow.

“I didn't know Emilia personally but have understood that she was a very nice person, a forward-thinking, lovely, talented girl with her whole life ahead of her,” she said.

Brangefalt's running association, Vasteras FK, also released a statement on its website expressing that **they are all “in mourning” over her sudden death.**

The club plans to commemorate Brangefalt's life at their annual gala on Friday.

In a tribute to his sister on Instagram, Brangefalt's [brother](#), Adam, shared that she sought psychiatric support on November 12 but was unable to receive treatment due to a “lack of staff.”

Adam paid tribute to his sister's athletic prowess and passion, writing, “Your love for your [sport](#) and being able to move, was indescribable. A love for sports that we have always shared. All the hundreds of kilometers we skied, all the jumps we made and all the nice memories we created through movement.

“But love is difficult. When your love for what you [loved](#) most painfully rips from you and your body. You couldn't take it anymore.”

My Take

Emilia is presumed to have been COVID-19 Vaccinated. The only question is how many COVID-19 Vaccines did she take and when did she take them?

She was **sponsored by Adidas Terrex** and she traveled extensively for competitions, including the Nov.3-6, 2022 World Trail Championships in [Chiang Mai, Thailand](#). Thailand required proof of COVID-19 Vaccination until Oct.1, 2022 and she was preparing for the competition for months.

“Since the end of July (2023), my body shut down. Haven't been able to train

anything due to a extremely high heart rate (120-150 bpm) just standing up.”

She may have developed **COVID-19 Vaccine Induced POTS** which is an extremely common side effect.

Postural orthostatic tachycardia syndrome (POTS) is a condition that causes your heart to beat faster than normal when you transition from sitting or lying down to standing up

- **Postural:** Related to the position of your body.
- **Orthostatic:** Related to standing upright.
- **Tachycardia:** A heart rate over 100 beats per minute.
- **Syndrome:** A group of symptoms that happen together.

[Dec. 1, 2023](#) - UK - 39 year old Kelly Louise Smith-May, mother of four, has spent the last 18 months battling a long Covid 'death sentence' that has left her 'imprisoned' in a dark room in constant agony and unable to care for her children - she wants to end her life in Switzerland and is raising funds for it. Her husband believes it was the COVID-19 Vaccine.

Kelly Louise Smith-May, 39, from Chipping Sodbury in Gloucestershire, is seeking £10,000 to travel to an assisted dying facility 'to end her suffering'

Mrs Smith-May's condition gradually deteriorated after she caught Covid in December 2021.

It has now gotten so bad that the 39-year-old, from Chipping Sodbury, Gloucestershire, has 'reached the point where dying would end her suffering'.

After a loved one launched a £10,000 fundraiser to finally end her 'torture', Mr. May shared his heartbreaking account of how they have come to this decision.

Speaking to MailOnline from his home, Mr. May — who has become his wife of eight year's full-time carer, quitting his job as a digger driver in order to do so — said they wanted to make the most of what might be their last Christmas together.

Mr. May said: 'I had no choice but to give up work and step in and do absolutely everything.

'People say we've got a lovely home but that's all the stuff we had when Kelly was fit and well.

'Kelly was very house proud, she wanted the best for her children like any mum.

'But for more than 18 months she's been bed bound - I wash her hair once a month and I have to turn her over. She's in so much pain.'

Mr May said his wife was diagnosed with long Covid shortly after catching the virus nearly two years ago.

She was, it is claimed, later diagnosed with chronic fatigue syndrome, also known as myalgic encephalomyelitis (ME).

But, although unable to prove it, Mr May believes the Covid vaccine, which his wife received in April 2022, exacerbated her symptoms.

'I know it's difficult to prove,' he said.

'At first doctors said it was psychological, then she was diagnosed with long Covid.

'After they said it was chronic fatigue and ME but they didn't know which because the symptoms are the same.'

There is no scientific evidence the job is responsible for Kelly's condition or if the timing was a coincidence.

Regardless of the trigger, Mr May said the process of getting his wife help has been a terrible ordeal.

'Kelly has been let down by doctors for the last two years and now she has reached the point where dying would end her suffering,' he said.

Mr May said that, at first, the GP didn't believe Kelly was ill and 'tried to fob her off with the mental health team'.

He said: 'They made out she was lying. They said [cancer](#) patients could get themselves to the surgery so Kelly should be able to.

'The doctors treated her badly, they were ignoring what she was telling them when she was in so much agony she couldn't get off the bed.

'They wanted her to go into respite care for two weeks but it was a place where you had to do your own cooking and look after yourself. Kelly wasn't able to do any of those things.

'Every doctor we've had come round here has not really believed her. All the health professionals who have seen her don't give a toss.'

Mrs Smith-May, once a bubbly, loud and creative person, hasn't left her bedroom at the couple's three-bedroomed house since June last year.

Mr May said: 'The health service has left her like a dying dog. She's been left to suffer, a doctor comes out every few weeks but we are not getting anywhere.

'The blinds are down, she has no TV, there's just an electric bed and a commode in there. It's torture, like being prison.

She was in regular contact with a woman from [Florida](#) seriously ill with ME, who travelled to Switzerland to end her life at the Swiss Pegasos clinic.

Mr May said: 'That's where the idea came from, we've talked about it a lot and it's what Kelly wants.

Mrs Smith-May, a stay-at-home mum, previously described her illness as 'being poisoned every minute of the day' and a 'living death sentence',

My Take

I believe the husband is absolutely correct - whatever COVID-19 Vaccines she took would have made her Long COVID symptoms much worse.

Describes her illness as “being poisoned every minute of the day” and a “living death sentence”.

This is what COVID-19 Vaccines have done to millions of people.

[June 1, 2023](#) - 41yo model and Hollywood actress Katerina Pavelek ended her life at an assisted suicide clinic in Basel, Switzerland on June 1, 2023, due to COVID-19 vaccine booster injuries (ME, CFS, ALS).

Hi guys, over last 10 days I became severely ill again homebound unable to do much. My body is too weak to fight this illness and I have no more strength so I made decision to end my life at Pegasos association in Switzerland. I was diagnosed with untreatable chronic neurological illness ME/CFS caused by booster jab on top of having suspected respiratory ALS. This illness made me disabled, unable to work or have social life and unable to enjoy life all together. Breathing have become more and more difficult and painful for me and my lung function has been declining. Thank you for all your friendship and support over last year. The booster jab I received over year ago destroyed my health, my body and my life completely. There is no other way to end my suffering other than the decision I made.

U.S. NEWS

Sick From the Jab, A Young Actress Chose To End Her Own Life

Kat Pave documented the progress of her disorders caused by the jab on Instagram. Finally, she was unable to go on living.

Claudio Rais had his first two COVID-19 mRNA vaccine doses with Pfizer in 2021, and then had a Moderna booster shot on Feb. 10, 2022.

He had a successful swimming summer season of 2022, winning multiple championships.

But by September 2022, he described suffering horrible injuries from his Moderna COVID-19 booster shot. In his own words:

Claudio Rais

September 27, 2022 · 🌐

But how do you still dare ...?

... y'all really so cocky to seriously think that a person who's dedicated his all to sport, physical activity and the wellbeing of himself and others... can from one day to the next stop everything and spend thousands of euros on visits of all kinds because are we dreaming of an illness?

I have been damaged by a reaction that along with the effects of covid has created very serious damage on a neurological and physiological level that is literally STOPPING me from leading a normal and respectful life.

From the outside you can't and will never be able to understand, but that doesn't mean that you're allowed to shoot sentences without any restraint

If this was real how some of y'all claim you wouldn't have any problem admitting it.

The fact is that it's not so unfortunately and I emphasize UNFORTUNATELY ... coz every passing second is proof of it... and me with what little strength and clarity I have left... im desperately trying to find the life that was taken from me and i will until my heart beats.

Many people would have put a rope around their necks without thinking twice. My situation is aggravating with more and more frightening symptoms that I don't know how I am still able to bear.

Joints, skin, organs and above all cognitive deficits to be compared with those of a severe brain trauma. Sensitivity, cognition, thermoregulation, balance, sight, appetite, thirst, impulses, desires, organic functions, emotions, perceptions, pain... in one word L Y I E !

I'm scared, I can't find a cure even though unfortunately I think there won't be much to do... Hope is the last to die, but even dignity cannot be trampled on.

So please, put one hand on your conscience and the other on your heart and since you can't understand what really happened, that I've lived and am experiencing, at least have the common sense to not judge.

I hope that these words of mine helped to understand at least in part the damage I have suffered.

Luckily there are many people who have never doubted for a moment and who support me in this exhausting war.

My thanks are for you, for those who really know me.

Claudio

By December 2022, he was seriously contemplating suicide:

Claudio Rais

December 6, 2022 · 🌐

Ends here, ends today...

Fate wanted my life to be totally stripped of its essence. One in a billion cases, maybe not even... it's my turn.

I'd rather walk away and not burden anyone but especially not burden myself for the rest of my days.

I thank God for everything he has given me every single day of these years and all the wonderful people he has brought me to meet.

Now all I can do is swim freely in the clouds 🌈

I hope I will stay forever in your hearts ❤️ ❤️

Good bye friends 🙏☁️

Nov. 3, 2022 - Hungary - 36 year old Timike Timea Balogh took her own life on Nov. 3, 2022. "Since the two Moderna shots, my body is constantly inflamed and my hair loss is unstoppable. I've tried everything" "Please somebody help me."

Timike Balogh
September 25, 2021 · TheCOVIDBlog.com

Dear Relatives, Friends, Acquaintances!
I have written about this in many forums, but I still raise the question!
THOSE WHO HAVE BEEN vaccinated, what side effects have you experienced since then??
Joint problems, hormone failure, HAIR WEAKNESS AND LARGE HAIR LOSS, feeling of weakness-shaking-random temperature increase?
I CAME OUT ALL OF THESE....
PLEASE HELP ME TO PL IF SOMEONE HAS SUCH AN EXPERIENCE, WHAT WILL YOU DO ABOUT IT?? (ESPECIALLY IN THE HAIR !!!!!)
Thanks for your help !! ❤️

Dear Team Members, Dear Physicians!
I've had so many side effects since the Moderna shot , I'm absolutely distressed with my terrible hair loss and hair loss .
I could cry all day ;-(
Please someone help me evaluate my blood work so I know where to go !!
Is vaccination real or some other disease?
Please somebody help me !! I'm scared , I don't wanna get bald
For being a 35 year old girl and I am very close to it. I experience hell every day 😞
in the summer everything was fine, and two months after vaccination the side effects came
....
joint pain, random weakness and temperature increases, menstrual flare, knee cyst, HAIR LOSS AND WEAKNESS, BALD...
PLEASE , SOMEBODY HELP ME !! THANK YOU !

"Since the two Moderna shots (one year ago), my body is constantly inflamed and my hair loss is unstoppable. High blood pressure! I've already tried everything: quercetin, black cumin seed oil, evening primrose, linseed oil, omega 3 fish oils, olive leaf capsules, algae, and krill oil. How can I mitigate this? I want this hair issue sorted out. At the age of 36, I bought a wig on New Year's Eve. S.O.S !!! THANKS!!!"

"Timike was my primary school classmate. One year before this, I called in this group more after vaccination became a problem for her. The poor girl could do a lot of things. She finally decided to end it. Timike, may the Angels guard your dreams."

Annamária E. Bakos
Wow... I saw a writing about her, and the result was that two committed suicide, she couldn't take it... 😞

Tekei Tímea Anita
Annamária E. Bakos yeah, I suspect that too

Dr. William Makis is a Canadian physician with expertise in Radiology, Oncology and Immunology. Governor General's Medal, University of Toronto Scholar. Author of 100+ peer-reviewed medical publications.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —**Dr. Mike Yeadon***

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —**Dr. Emanuel Garcia***

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —**Peter Koenig***

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —**David Skripac***

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
