

Switzerland - 5G [DAB-plus], Blinding Vehicle LED-Lights and Chemtrails

Open Letter to Swiss Federal Council

By [Peter Koenig](#)

Distinguished Federal Councilors,

Although this letter addresses particularly issues related to the Swiss Federal Department in charge of Environment, Transport, Energy and Communication, currently held by the right-wing Swiss People's Party, the letter is, indeed, directed at the Collective Federal Council, responsible for decisions in unanimity.

The letter concerns three major topics:

- (i) 5G radiation (5th Generation of wireless cellular technology), especially DAB-plus (**D**igital **A**udio **B**roadcasting);
- ii) Ultrabright Car LED-Lights (LED - Light Emitting Diode); and
- iii) Chemtrails - weather modification and poisoning air, soil and water with dangerous chemicals and heavy metals.

*

5G Radiation is already everywhere, despite the moratorium once asked for by the Cantons of Geneva and Vaud. 5G-antennas are lining the Swiss highways by the thousands, emitting their unhealthy and potentially dangerous electromagnetic waves (EMW) into all households, via cellphones, internet, computers; and now SRG (German acronym for Swiss Radio and Television Corporation), plans to further inundate our homes with 5G EMW via DAB-plus.

5G is 100 times faster than 4G, and 6G is 10,000 times faster than 5G. That means in concrete terms, 100, resp. 10,000 more powerful EMWs are shot into our bodies and homes than was the case with the 4G technology. By the time 6G will be imposed in Europe, our brains may be so damaged, that hardly anybody notices the difference.

While science is divided about the potential harm caused by 5G - and maybe soon to come 6G - it is certain that these waves are aggressing the human body, brain and especially the human Pineal Gland - the gland giving us the sense of perception, with the capacity of awakening spiritual insights and enhancing connection to higher consciousness.

The emerging World Order does not want humans with functional Pineal Glands.

In addition, through 5G, the human brain can be robotized or transhumanized, as **Klaus Schwab** from the World Economic Forum (WEF) calls it.

Does the Swiss Government want this for the inhabitants of Switzerland whose best interest they have been elected or appointed to defend?

*

Ultra-Bright LED-Car lights are more visibly damaging, they are extremely blinding and gradually damaging people's eyesight, but going also much deeper in causing harm, they are also attacking the highly sensitive Pineal Gland.

In addition, LED-lights may interfere with circadian rhythms (the body's internal clock) and sleep patterns. Also, prominent psychiatrists warn of the potential effects of LED lighting on mental illness. See this from [BBC](#).

The road risks of these lights are so obvious, it is a surprise that the Federal Council allows these dangers and risks to prevail. For more than half a decade all new cars are equipped with these LED-lights; there seems to be no way around them.

Did instructions come from Brussels?

For good reasons, there are no statistics on accidents caused by these ultra-bright, at times even blueish LED-lights. These headlights are clearly not for the good of the people and should be banned immediately.

*

Chemtrails - There is no need to explain what they are.

You, Dear Federal Councilors, know it very well. Not even the Federal Council can ignore the ever-present crisscrossing of white stripes in the skies.

However, as a reminder, Ladies and Gentlemen of the Federal Council, as well as the readers of this letter, their prime purpose is modifying the weather, and geoengineering the climate, along with the US HAARP (High-frequency Active Auroral Research Program).

This science has been developed in the early 1940s, and has since been perfected to the ability of causing extreme weather conditions, hurricanes, floods, droughts, even earthquakes, that destroy entire cities, agriculture, food - and finally humanity, so it can be blamed on "climate change".

Climate Change itself is designed to destroy western economies, with the invalid argument that CO2 is bad for the environment, thus gradually banning the use of hydrocarbon energy and supposedly replacing it with renewable energy.

You may remember that during the first UN-sponsored Global Environment Conference in Rio de Janeiro in 1992, when total worldwide energy was generated to the tune of 87% from oil and gas, the emerging anti-CO2 narrative propagated departing from hydrocarbons. Today, more than 30 years later, the proportion of hydrocarbon energy use has hardly changed. It is still around 85%. Worldwide alternative energies amount to less than 5%.

Besides, those pushing for abandoning CO2 may be reminded that without CO2 there would be no life. CO2 is vital food for trees and plants which transform it by a process called *photosynthesis* into oxygen, required by virtually every living being. Any excess amount of CO2 is automatically absorbed by the earth's oceans, and given off again in a perfectly harmonious balancing act when needed.

Also to refresh your memories, dear Federal Councilors, chemtrails contain thousands of highly poisonous nanoparticles of chemical and heavy metals, such as aluminum, cadmium, mercury, zinc, and many more. They are poisoning our air, soil, and water, and eventually animals, vegetables, our food, and finally our brain and bodies.

In the name of my co-citizens, I ask you, Federal Councilors, to ban, effective immediately, chemtrails, the blinding LED-car lights, and to instruct SRG to continue broadcasting their programs by ultra shortwaves (UKW), instead of, or in addition to, DAB-plus, for those who want to protect their health from an ever-more intense flood of 5G electromagnetic waves in their homes and bodies.

Thank you.

Peter Koenig
