*Tributes have been paid to a young Irish cricket player **who died days after being diagnosed with testicular cancer**. ([click here](#))*

21-year-old Daniel Donnan was rushed to the Ulster Hospital where he was **treated for a bleed to the brain, but medical tests revealed tumors which had already spread to his brain and lungs**.

Testicular cancer in young athletes

9/X) 24/9/22 Former Norwegian ski star Aksel Lund Svindal was recently diagnosed with **testicular cancer**. The former world-class skier announced this on Saturday via Instagram. He had already been operated on and the operation went well [tt.com/artikel/308326...](https://www.tt.com/artikel/308326...)

Seb Sternik @seb_sternik · Sep 22, 2022

Hertha Berlin's Jean-Paul Boëtius will have an operation after an urological examination diagnosed a tumor in his testicle.

This year alone, Timo Baumgartl, **Marco Richter** and BVB's Sebastien Haller were all diagnosed with **testicular** cancer.

All four men under the age of 30.

What is going on?

When a “**fact check**” vigorously denies something, it is very often true. Sure enough, a fact check denying the link between COVID-19 vaccines and testicular cancer exists ([click here](#)).

The fact check says “there is no evidence” but admits: “**Grain of Truth: Four football players from the German first league have got testicular cancer since the spring of 2022.**”

Except it’s not just 4 German football players ([one article claims it’s actually 14](#)). It’s also rugby players, skiers, cricket players, etc.

It’s athletes as well as non-athletes:

ILPatriot @ILstaceyk · Mar 14

...

Replying to @DrJamesOlsson

My 28 yo son died 12-22-21 from **testicular cancer**. It’s 95% curable. Late stage less than 2 months from 2nd jab. Spread everywhere! Drs couldn’t understand. I said it was the jabs. They said there was data to support. Took just 4 months to kill him!

Some cases are extremely rapidly progressive, like this one: “late stage less than 2 months from 2nd jab...spread everywhere”.

Or in the case of 21 year old Irish cricket player Daniel Donnan, only a few days from diagnosis to death.

Or the case of [VAERS 1232833](#) – a 32 year old military man who developed testicular pain 4 days after 2nd Pfizer COVID-19 mRNA dose and **20 days later was diagnosed with testicular cancer with metastatic spread to retroperitoneal lymph nodes.**

What is the link between COVID-19 vaccines & testicular cancer?

As an Oncologist, I ask how and why. Yes, the **COVID-19 vaccine spike protein localizes to the testes**, according to the Japanese Pfizer Organ bio-distribution study done with rats. **But at 48hr, the ovaries get 40x more LNP-mRNA than testes.**

Sample	Total Lipid concentration (µg lipid equivalent/g [or mL]) (males and females combined)							% of Administered Dose (males and females combined)

Perhaps the more important point is that the mRNA continues to accumulate in the testes with time. How long and to what degree? We don't know because Pfizer didn't look beyond 48hr.

More physical activity means more blood flow, with more mRNA delivered to the heart as well as the testes. So if the myocarditis and sudden cardiac death don't get you...

Truthfully, we have no idea what the COVID-19 vaccine mRNA does after it deposits in the testes, because Pfizer and Moderna did not conduct any carcinogenicity studies to verify safety.

Peter A. McCullough, MD, MPH™

@P_McCulloughMD

No preclinical safety studies for genotoxicity, oncogenicity, or teratogenicity. Now billions of recipients are asking about long term side effects. Video shows shortcomings of rushed mRNA development. [#courageousdiscourse](#) [@VigilantFox](#) [@TheChiefNerd](#)

Selecting relationships

4.2.1.3	Safety Pharmacology	No safety pharmacology studies were conducted as they are not considered necessary according to the WHO guideline (WHO, 2005).
4.2.3.3	Genotoxicity	No genotoxicity studies are planned for BNT162b2 as the components of the vaccine constructs are lipids and RNA that are not expected to have genotoxic potential (WHO, 2005).
4.2.3.4	Carcinogenicity (including supportive toxicokinetics)	Carcinogenicity studies with BNT162b2 have not been conducted as the components of the vaccine constructs are lipids and RNA that are not expected to have carcinogenic or tumorigenic potential.

Pfizer BNT162b2 Module 2.4 Appendix 1

Pfizer/BioNTech have a testicular cancer treatment ready

Coincidentally, Pfizer’s COVID-19 mRNA vaccine partner BioNTech received European approval for **new testicular cancer treatment on June 23, 2022, just as testicular cancer cases exploded across the German Bundesliga** ([click here](#)).

Interestingly, their novel treatment **targets heavily pretreated patients with relapsed or refractory advanced testicular cancer**. In other words, particularly aggressive (turbo?) testicular tumors that don’t respond to conventional treatment.

Again, it’s almost as if they knew.

My Take...

Wherever COVID-19 vaccine spike protein accumulates, we see a “spike” in cancers: bone marrow (leukemias), lymph nodes (lymphomas), liver, kidney, pancreas, ovaries, testes, breasts, colon, brain, spinal cord, thyroid gland and more.

There is undoubtedly a direct local effect by the vaccine spike protein on the tissues it accumulates in, this is not just a systemic effect of the mRNA circulating and affecting the overall immune system.

Oncologists cannot continue to turn a blind eye to these rapidly progressive cancers, or “turbo cancers” as they’ve come to be known. Sooner or later, doctors will have to face the

reality that they may have recommended something unsafe to their patients that was catastrophically damaging to their bodies.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
