Perhaps the FBI needs guys like Elias Davidsson to solve the circumstances of the 9/11 attacks. Could he have been successful within such an organization? Usually, the FBI investigators can only go so far as their superiors want them to go. That's why a highly qualified researcher such as Davidsson would have gone nowhere within the FBI.

In the 9/11 community, Davidsson is no blank sheet. He has published books on 9/11 and the follow-up terrorist attacks that set the world on fire. "Hijacking America's Mind on 9/11"[1], followed by "Psychological Warfare and Social Denial: The Legend of 9/11 and the Fiction of Terrorism" (Psychologische Kriegsführung und Gesellschaftliche Leugnung: Die Legende des 9/11 und die Fiktion der Terrorbedrohung)[2] presented a different narrative. An English translation of a condensed version would be very informative and highly useful for the English speaking public.

The elucidation of a terrorist offense suffers from the fact that governments clean up only as much as it benefits them politically. Such an approach also holds true for the Mumbai attacks. The impression given by the Indian government that all facts were on the table, is, according to Davidsson, false. As with the "9/11 Commission Report", which pretends to present the real events and the backgrounds, the same holds true for the processing of this heinous crime of 26/11, 2008. In both cases, statements of witnesses, which didn't support the official narrative were glossed over or brushed aside.

That's why Davidsson's book is so important. In 25 chapters he unravels not only the motivations and the cover-up of the Indian government but also the multifaceted interests of international actors such as Pakistan, the U.S., and possibly Great Britain, Germany, Israel, Iran, Russia, China, and even Australia.

"The book is about the betrayal of the Indian nation by a corrupt, greedy and ruthless elite for whom the lives of ordinary Indians are expendable when power and profit are at stake," writes the author.

From day one, a particular part of the official account was questioned, namely, the circumstances surrounding the deaths of three senior police officials and their assistants.

Many Indians voiced their suspicion that the authorities were covering-up facts and called for an independent and impartial investigation of the events.

To understand 26/11, the reader must not work one's way through the whole book sequentially because the author has attempted to render individual chapters independent of each other. All chapters close with a summary or conclusions. Davidsson's book is always very well documented by many footnotes. Additionally, all sources used are accessible using the following URL:

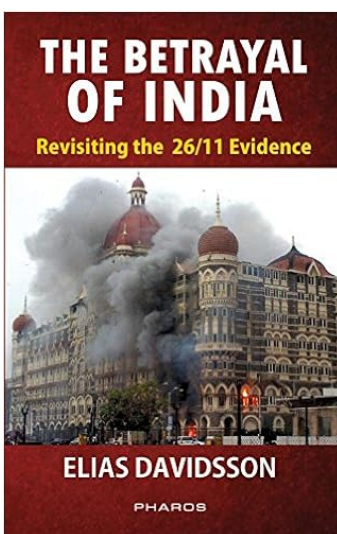

<http://aldeilis.net/mumbai/>

The author presents three definite conclusions; firstly, India's major institutions are suppressing the truth on 26/11; secondly, India's judiciary has failed its duty to seek truth and render justice; thirdly, Business, political and military circles profited from 26/11. Furthermore, entities in the U. S. and Israel also gained from the attack. The author could not find any benefits for the Pakistani government, military or businesses. The main profiteer seems the Hindu nationalist constituencies by the "elimination" of Hemant Karkare, "who was on the verge of exposing Hindutva terrorist networks.

Davidsson calls on the Indian Civil society to ask for the establishment of a National Truth Commission on 26/11 mandated to establish the facts on the attacks of 26 November 2008. The Civil society itself should demand the creation of an International Commission of Inquiry on the previous terrorist attacks under the authority of Chapter VII of the U.N. Charter, including those committed in the U. S. on 11 September 2001.

With this study, the Indian Civil society has a document at its disposal to challenge the official narrative. The overall objective of the author, however, is the exposure of all the key terror attacks, especially 9/11, which lacks to this day any evidence that 19 Muslims were the perpetrators.

This very compact but exciting book should contribute to the solving of the 26/11 crime. A must read for everybody interested in the truth.
