In the framework of the 4-country agreement signed on 8 August between Ukraine, the Netherlands, Belgium and Australia, information on the progress and results of the investigation of the disaster will remain classified.

This was confirmed at a briefing in Kiev under the auspices of the office of the Prosecutor General Yuri Boychenko. In his words, the results of the investigation will be published once completed only if a consensus agreement of all parties that have signed the agreement prevails.

Any one of the signatories has the right to veto the publication of the results of the investigation without explanation.

Following the signing of this agreement, the Verkhovna Rada of Ukraine ratified the agreement and allowed for the participation of Malaysian staff to participate in the investigation.

International experts admit that for the survey of the wreck Malaysian Boeing 777 will take several weeks.

The second phase will involve searches pertaining to the remains of the victims of the crash of flight MH17.

Thus, it is safe to assume the results of the investigation are actually classified and the final expert opinion will not be released. (or only after a few years, when the political causes of the disaster will lose their relevance).

The conclusion is simple - the intermediate results of the investigation directly prove the innocence of Russia and/or the Donesk militia.
